Barry Point Fire

Incident Action Plan

Friday

August 17, 2012

DAY Operational Period

0600-1800

OR-FWF-120680

FS - P6G47N

BLM - G47N

INCIDENT OBJECTIVES

1. Incident Name

Barry Point

2. Date Prepared
08/16/2012

3. Time Prepared
2100

4. Operational Period – 8/17/2012 DAY 0600-1800

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

INCIDENT Weather Forecast

FORECAST NO: 17

NAME OF FIRE: Barry Point

PREDICTION FOR: Day SHIFT

UNIT: Fremont-Winema NF

SHIFT DATE: Aug. 17, 2012

SIGNED: *Carl S Corniglia Jr*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: Aug. 16, 2012, 2000 PDT

WEATHER DISCUSSION: A thermal trough over the Cascade crest will move across the area through the day which has the effect of enhancing the instability over the region. Due to light winds within thermal troughs, heavy smoke can linger over the fire which can limit the ability of the fire to tap the instability. Temperatures will be warmer today with slightly lower RH values. Upper level moisture moving north will bring a threat of thunderstorms to the area late in the day with an increasing chance of showers and thunderstorms through tonight. Thunderstorms imply the possibility of gusty and erratic winds under and a distance away from the thunderstorm.

...Red Flag Warning in Effect from 4 pm PDT Today Through 8 pm PDT Saturday for Abundant Lightning and Dry Fuels...

...Hot...Dry and Unstable Conditions...

WEATHER FORECAST: Today

WEATHER: Sunny then becoming partly cloudy with a slight chance of showers and thunderstorms late. Areas of smoke.

MAX TEMPERATURE: 89-95

MIN HUMIDITY: 12-16%.

20 FT WINDS:

BRANCH II: Light terrain driven wind becoming west 2 to 5 mph late in the day.

BRANCH III: Northeast wind 3 to 5 mph becoming southeast late morning then west late in the day.

BRANCH I & IV: Northeast wind 3 to 7 mph swinging around to south late morning then to west late in the day.

HAINES INDEX: 5 (Moderate).

MIXING HEIGHT: Near 1,000 ft. AGL rising to 11,000 ft. AGL.

OUTLOOK FOR TONIGHT: Mostly cloudy with a chance of showers and thunderstorms. Lows 58-64. Maximum RH in the absence of rain 45-55%. Northwest winds 5 to 10 mph.

EXTENDED FORECAST:

SATURDAY: Mostly cloudy with scattered showers and thunderstorms. Highs 82-87. Minimum RH 20-25%. South to southwest wind 5 to 15 mph and gusty.

SUNDAY: Partly cloudy. Slight chance of showers and thunderstorms in the morning. Lows 49-54. Highs 80-85. Minimum RH around 20%. Southwest winds 5 to 15 mph.

FIRE BEHAVIOR FORECAST

| | |
|-------------------------------|---|
| FORECAST NUMBER: #17 | TYPE OF FIRE: Wildland |
| FIRE NAME: Barry Point | OPERATIONAL PERIOD: DAY 08/17/2012 |
| DATE ISSUED 08/16/2012 | TIME ISSUED: 1900 |
| UNIT: FRF | SIGNED: /s/ Todd Gregory FBAN |

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, **mixed grass and brush** (less than 2 ft. tall), and **timber with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. *Live fuels will contribute to fire intensity and rate of spread.*

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Slightly hotter and more instability will result in a higher probability for large fire growth. As we approach higher Haines indices, the potential for plume dominated fire increases. This fire has already shown its ability to overpower its environment under Haines 5 and 6.

* Fine fuel moisture of 2% (exposed fuels) and 4% (shaded fuels). Bitterbrush moisture 90%, Sagebrush 50%-60%
Probability of Ignition (PIG) 80-95%.

| Fuel Type | Rate of Spread | Flame Length | Spotting Distance | *15 mph wind and/or 40% Slope |
|---------------------------------|---------------------|--------------|-------------------|-------------------------------|
| Grass (GR2) | 35-45 ch/hr. | 4 – 6 feet | .3 mile | 90-110 ch/hr 7-9 FL |
| Grass with mixed shrub (GS2) | 20-25 ch/hr | 5 – 7 feet | .5mile | 50-60 ch/hr 8-9 FL |
| Timber with Understory (TU5) | 8-10 ch/hr | 7-9 feet | .5 mile | 15-20 ch/hr 10-12 FL |
| *GS2 - primary spread fuel type | *low wind condition | | *from flare-ups | *High intensity condition |

SPECIFIC:

DIV A, B, AA, N, Z Patrol and Mop-up.

DIV C, D Westerly winds in the afternoon will continue to support line construction and holding. Keep a watch for shifting winds especially near any thunderstorm development.

DIV E, F, and G Where fuels are continuous expect fairly rapid rates of spread, nearing 50 ft/min, where there is open, unchecked fire perimeter. Look for opportunities to tie lines into sparse fuels and natural barriers such as rock sprees. Fire may be less intense in these divisions but expect rapid rates of spread anywhere topography and wind align. Individual torching trees will result in spotting.

DIV J, L These divisions will again be very active. Active fire behavior is expected anywhere open fire perimeter exist. Intense flare-ups will be common and will spread rapidly. Be cautious when taking action on spot fires in tree canopies as they could transition quickly to crowns. Any unchecked fire edge will continue to move towards Goose Lake and Fitzwater. Be heads up for thunderstorm development.

DIV M Any thunderstorms in the area could push the fire to the north and east. Monitor radios for weather updates as southwest winds will test containment lines.

AIR OPERATIONS: Smoky conditions will persist until the inversion lifts. Thunderstorm development is possible in the afternoon.

FIRE BEHAVIOR SAFETY

Anywhere the inversion vents and breaks will cause activity to increase. Fuels are still very dry and fire behavior will respond quickly to any breeze. Keep Situational Awareness (SA) up on wind direction and speed. Any wind and topography alignment will result in very active fire behavior.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire

OPERATIONAL PERIOD: Day 08-17-12

TOPICS:

Hazard Trees - Snags
Ten Standard Fire Orders

NARRATIVE:

Hazard Trees – Snags

Hazard Trees or snags account for approximately 10% of the wildland firefighter deaths annually. Our incident has numerous snags. Mitigations include:

- Identify Hazard Trees/Snags. Flag them and report them to your Division or Group Supervisor.
- Have hazard trees felled by qualified fallers. NEVER work near hazard trees.
- Look up, look down, and look around.

The 10 Standard Fire Orders are broken into three groups:

- A. Gathering information about the fire,
- B. Putting safety measures in place, and
- C. Fireline leadership.

A. The fire information group deals with what the firefighter will encounter - weather, fire status, fire behavior.

1. Keep informed on fire weather conditions and forecasts.
 2. Know what your fire is doing at all times.
 3. Base all actions on current and expected behavior of the fire.
- Did you receive or request an adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture and local factors?
 - Do you have map of the fire? Do you know what to expect for topography, type of fuels and direction of the fire spread?

B. The fireline safety group emphasizes personal safety.

4. Identify escape routes and safety zones and make them known.
 5. Post lookouts when there is possible danger.
 6. Be alert. Keep calm. Think clearly. Act decisively.
- Make sure LCES is in place before engaging the fire.
 - Review factors that could disrupt your primary plan and develop alternate, contingency, and emergency plans.

C. The fireline leadership group is centered around tactical decisions.

7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
 8. Give clear instructions and insure they are understood.
 9. Maintain control of your forces at all time.
- When giving instructions, describe the task, purpose, and end state.

After you have considered, discussed and acted on the previous nine orders:

10. Fight fire aggressively, having provided for safety first.

| 8. Medical Emergency Procedures | | | | | |
| In the event of a medical emergency provide the following information to the Communications Unit: | | | | | |
| 1. Declare the nature of the emergency Medical injury/illness? If injury/illness is it Life Threatening? | | | | | |
| 2. If Life threatening, then request that the designated frequency be cleared for emergency traffic. | | | | | |
| 3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith). | | | | | |
| 4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates). | | | | | |
| 5. Identify on-scene personnel by position and name (i.e.EMT Freshwater). | | | | | |
| 6. Identify preferred method of patient transport. | | | | | |
| 7. Request any additional resource and/or equipment needed. | | | | | |
| 8. Document all information received and transmitted on the radio or phone. | | | | | |
| Identify any changes in the on-scene point of Contact or medical personnel as they occur. | | | | | |

Human Resource Message

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct on the basis of gender, adversely affects a person's ability to do their job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- ↓ Unwelcome sexual advances
- ↓ Requests for sexual favors
- ↓ Discussing sexual activities
- ↓ Telling off-color jokes
- ↓ Unnecessary touching
- ↓ Displaying sexually suggestive pictures
- ↓ Using demeaning or inappropriate terms
- ↓ Using indecent gestures
- ↓ Using crude and offensive language
- ↓ Commenting on physical attributes

"Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated". Fireline Handbook, Chapter 6, Common Responsibilities.

/s/ Mike Morcom

Incident IC Signature

Incident Human Resource Specialists are: Bill Otani, Michael Donch & Todd Buchholz

Location: Inside corner of blue metal building
