Barry Point Fire

Incident Action Plan

SATURDAY-SUNDAY

August 18-19, 2012

Night Operational Period

1800-0600

OR-FWF-120680

FS - P6G47N

BLM – G47N

INCIDENT OBJECTIVES	1. Incident Name Barry Point	2. Date Prepared 08/18/2012	3. Time Prepared 2100

4. **Operational Period** – 8/18/-8/19/2012 NIGHT 1800-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
    - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
    - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
    - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
    - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

9. Prepared By (Planning Section Chief)	10. Approved By (Incident Commander)

ORGANIZATION ASSIGNMENT LIST

1. Incident Name	Barry Point		
2. Date	8/18/2012	3. Time	2200
4. Operational Period	8/18-8/19/2012 NIGHT		1800-0600

5. Incident Commander and Staff	
Incident Commander	Mike Morcom
Deputy	Chris Hoff
Safety Officer	Craig Dixon/Greg Vergari/Sam Phillips (t)

INCIDENT Weather Forecast

FORECAST NO: 20

NAME OF FIRE: Barry Point

PREDICTION FOR: Night **SHIFT**

UNIT: Fremont-Winema NF

SHIFT DATE: Aug. 18-19, 2012

SIGNED: *Carl S Cerniglia Jr*

TIME AND DATE FORECAST ISSUED: Aug. 18, 2012, 1200 PDT

Incident Meteorologist

WEATHER DISCUSSION: There is a slight chance of thunderstorms this evening mainly near the higher terrain surrounding the fire. Outside of that it will be a mostly clear night. The air mass will be more humid and stable with cooler temperatures. Southwest breezes during the evening will ease up through the evening hours and become light during the early morning hours.

WEATHER FORECAST: Tonight

WEATHER: Partly cloudy. Slight chance of an evening shower or thunderstorm.

MIN TEMPERATURE: 43-48 valleys and 48-52 ridges.

MAX HUMIDITY: 65-75%.

20 FT WINDS:

BRANCH II: West to southwest wind 4 to 8 mph with early evening gusts to 15 mph easing through the evening becoming light after 0100.

BRANCH III: Southwest wind 6 to 10 mph with early evening gusts to 20 mph easing through the evening becoming south 2 to 5 mph after 0200.

BRANCH I & IV: Southwest wind 6 to 10 mph with early evening gusts to 20 mph easing through the evening becoming southwest 2 to 5 mph after 0200.

HAINES INDEX: 4 (Low).

LAL 2 dropping to 1 by midnight.

OUTLOOK FOR SUNDAY: Mostly sunny. Highs 78-84. Minimum RH 15-20%. Southwest winds 2 to 5 mph becoming west 5 to 10 mph in the afternoon.

EXTENDED FORECAST:

MONDAY: Mostly clear. Lows 42-47. Highs 81-86. Minimum RH 15-20%. West winds 5 to 10 mph.

TUESDAY: Partly cloudy. Lows 42-47. Highs 79-84. Minimum RH near 15%. Southwest winds 10 to 15 mph and gusty.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #20	**TYPE OF FIRE: Wildland**
FIRE NAME: Barry Point	**OPERATIONAL PERIOD: Night 08/18/2012**
DATE ISSUED 08/18/2012	**TIME ISSUED: 1200**
UNIT: FRF	**SIGNED: /s/ Todd Gregory FBAN**

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and timber **with understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. ***Live fuels will contribute to fire intensity and rate of spread.***

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Forecasted weather conditions will assist crews with control strategies. Elevated humidity, fuel moisture, and possible precipitation will diminish spotting potential and, therefore, minimize spread distances. Flare-up in pockets of heavier fuel are still going to be common but movement of the fire perimeter will be minimal. There will be very little activity in the fine fuel moistures after midnight as humidity recovery will moisten fuels to extinction. Wind again will play a role in fire behavior and higher wind speeds can cause the fire to move but that is not expected.

*** Fine fuel moisture nearing or surpassing 15% tonight.**
Bitterbrush moisture 90%, Sagebrush 50%-60% Probability of Ignition (PIG) 10-20%

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	**0-6 ch/hr.**	**0-2 feet**	**0.1 mile**
Grass with mixed shrub (GS2)	**0-3 ch/hr**	**0-1 feet**	**0.1mile**
Timber with Understory (TU5)	**2-4 ch/hr**	**3-5 feet**	**0.1mile**
GS2 - primary spread fuel type	***forecasted winds**		***from flare-ups**

SPECIFIC:

DIV A, B, C, D, AA, L, M, N, Z Patrol and Mop-up.

DIV E, F, G If there is any activity in the grass fuel types it will happen early in the shift. Activity will diminish as humidity increases and fine fuel moisture increases. Activity will linger longer into the shift in the timber fuels and perimeter movement is possible where no precipitation was received and higher winds are present.

DIV J Flare-ups are possible in tighter crown spaced areas. The probability for spotting is fairly low but the potential still exists. Unlined perimeter will spread in the timber fuel type but the threat of rapid spread rates is minimal. Watch for locally gusty conditions as this will contribute to fire spread.

- **All Division watch for gusty outflow winds if T-storms develop in the area.**

AIR OPERATIONS: No issues with smoke anticipated.

FIRE BEHAVIOR SAFETY

Even though we received some moisture please remember that larger fuels are still dry. Fine fuels dry quickly in wind so fire spread is still possible. Keep your SA updated and watch for those snags.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire	OPERATIONAL PERIOD: Night 08-18-12

TOPICS:

Thunderstorms
High Reliability Organizations
Fireline Leadership

NARRATIVE:

Thunderstorms Thunder storms pose several significant risks.

- Use the thunder storm guidelines in the IRPG, page 19.
- Review IMET Weather forecast with crew members
- Post lookouts for incoming cells.
- Beware of down draft risks (increased fire behavior, snags, etc.)
- Preplan your escape routes due to slippery roads, flash floods.

High Reliability Organizations (HRO)

- HRO's are organizations that operate in dynamic, high risk environments with very few errors.
- Whether we are working on the flight deck of an aircraft carrier or on a wildfire, the principles are the same.
- Key principles of HRO's include listening to weak signals of potential failure & resiliency.
- Pay attention to the little things that go wrong, talk about them within your crew, and act on the weak signals in order to prevent a larger problem.
- When you suffer a setback, implement plan B, adjust and continue your forward progress.
- Make it a crew goal to be a High Reliability Organization.

Fireline Leadership

- Provide effective briefings.
- Give clear instructions.
- Check for understanding and ask for feedback.
- Provide leader's intent.
- When issuing instructions, explain:
  - Task,
  - Purpose,
  - End State.
- Resources know where to go and what to do if conditions change.

REMEMBER EVERYONE GOES HOME!

SAFETY OFFICER	Craig Dixon SOF / Greg Vergari SOF / Sam Phillips SOF (t)

8. Medical Emergency Procedures

In the event of a medical emergency provide the following information to the Communications Unit:

1. Declare the nature of the emergency
   Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).
4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).
5. Identify on-scene personnel by position and name (i.e.EMT Freshwater).
6. Identify preferred method of patient transport.
7. Request any additional resource and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.

Identify any changes in the on-scene point of Contact or medical personnel as they occur.

Incident Radio Communications Plan	1. Incident Name: BARRY POINT	2. Operational Period: 08/18/12 Saturday Night Shift 1800 - 0600

3. Basic Radio Channel Utilization

Radio Type	Channel	Function	Frequency/Tone	Assignment	Remarks
King	1	TAC 1	(b) (6) [redacted]	Division AA/A/B/N/Z	(Narrow)
King	2	TAC 2		Division L/M	(Narrow)
King	3	TAC 3		Unassigned	(Narrow)
King	4	TAC 4		Division D/E/C	(Narrow)
King	5	TAC 5		Division F/G	(Narrow)
King	6	Command 6		Branches II & III	Grizzly Peak (Narrow)
King	7	Forest Net Rptr		All DIV	(Narrow)
King	8	Command 8		Branches IV	Sugar Hill (Narrow)
King	9	Command 9		Branches III & IV	Fitzwater (Narrow)
King	10	Command 10		BR. 1 SW of Fire	Blue Mt. (Narrow)
King	11	PRI A/G		All DIV	Primary (Narrow)
King	12	Sec A/G		All DIV	Secondary
King	13	TAC 13		Unassigned	(Narrow)
King	14	AIR GUARD		All DIV	AIR/GRND EMER. CONTACT (Narrow)
King	16	AIR GUARD		All DIV	AIR/GRND EMERGENCY CONTACT (Narrow)

Hours of Operations

Fuel

-ICP 0600-2200 (accepts visa/mastercard/voyager)

South of HWY 140

-Hunters RV (accepts visa), Hwy 395 North near Ranger Station, Mon-Fri 0600-2000, Sat/Sun 0700-2000

ICP Ground Support/Mechanic 0600-2200

ICP Medical 0530-2200

ICP Communications 24/7

Showers 0500-2300

Supply Cache 0530-2200

Ordering 0600-2200

Food Breakfast 0500-1030 and Dinner 1700-2230

Laundry Drop off at Supply anytime. If dropped of by 0900, will be ready by 0900 next day.

Five frogs are sitting on a log .

Three decide to jump.

How many frogs are on the log???

Answer: 5 deciding to jump require no action. Jumping does. Think about this when you brief Safety and Mutual Respect. It is easy to brief it but doing it requires action. Encourage your folks to action.

Thanks from your HRSPs:

Bill Otani 503-705-5980

Michael Donch
