

Barry Point Fire

Incident Action Plan

SUNDAY

August 19, 2012

DAY Operational Period

0600-1800

OR-FWF-120680

FS - P6G47N

BLM - G47N

INCIDENT OBJECTIVES

1. Incident Name

Barry Point

2. Date Prepared

08/18/2012

3. Time Prepared

2100

4. Operational Period – 8/19/2012 DAY 0600-1800

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

INCIDENT Weather Forecast

FORECAST NO: 21

NAME OF FIRE: Barry Point

PREDICTION FOR: Day SHIFT

UNIT: Fremont-Winema NF

SHIFT DATE: Aug. 19, 2012

SIGNED: *Carl S Cerniglia Jr*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: Aug. 18, 2012, 2000 PDT

WEATHER DISCUSSION: More seasonally normal conditions have returned to the area with respect to temperatures and relative humidity levels and the degree of instability across the area. Skies are expected to start the day clear with some cumulus buildups during the afternoon hours, mainly over higher terrain and north. Light winds in the morning will pick up a bit from the southwest to west.

WEATHER FORECAST: Today

WEATHER: Sunny. Some afternoon cumulus buildups.

MAX TEMPERATURE: 79-84.

MIN HUMIDITY: 14-19%.

20 FT WINDS:

BRANCH II: Light wind becoming west 3 to 6 mph in the afternoon.

BRANCH III: South wind 2 to 5 mph becoming west to southwest 4 to 8 mph in the afternoon.

BRANCH I & IV: Southwest wind 2 to 5 mph becoming west 5 to 10 mph during the afternoon.

HAINES INDEX: 3 (Very Low).

MIXING HEIGHT: Near 1000 ft. AGL rising to 8,000 ft. AGL. Inversion lifting and dissipating around 1200.

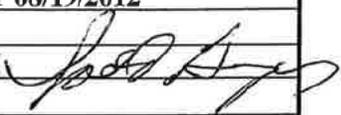

OUTLOOK FOR TONIGHT: Clear and cooler. Lows 40-45 valleys and around 50 ridges. West wind 5 to 10 mph becoming north overnight.

EXTENDED FORECAST:

MONDAY: Mostly clear. Highs 81-86. Minimum RH 15-20%. West winds 5 to 10 mph.

TUESDAY: Partly cloudy. Lows 42-47. Highs 79-84. Minimum RH near 15%. west winds 10 to 15 mph and gusty.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #21	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: DAY 08/19/2012
DATE ISSUED 08/18//2012	TIME ISSUED: 1900
UNIT: FRF	SIGNED: /s/ Todd Gregory FBAN 

INPUTS

FUELS

Fuels in the fire area are primarily composed of **cured grass**, mixed **grass and brush** (less than 2 ft. tall), and timber with **understory**. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. ***Live fuels will contribute to fire intensity and rate of spread.***

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Expect an increase in activity today as fuels continue to dry and internal islands burn out. Expect a slight increase in spotting potential but due to the normalizing of the weather, burn periods will be shorter as night time humidity levels continue to rise.

* Fine fuel moisture of 4% (exposed fuels) and 7% (shaded fuels). Bitterbrush moisture 90%, Sagebrush 50%-60%
Probability of Ignition (PIG) 60-75%

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	40-50 ch/hr.	4 – 6 feet	0.2 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	20-25 ch/hr	5 – 7 feet	.5mile	125-140 ch/hr 11-12FL
Timber with Understory (TU5)	8-10 ch/hr	7-9 feet	.5 mile	30-35 ch/hr 13-14 FL
*GS2 - primary spread fuel type	*low wind condition		*from flare-ups	*High intensity condition

SPECIFIC:

DIV A, B, C, D, AA, M, N, Z Patrol, improve and Mop-up.

DIV E, F, G Continuous fine fuels and drying will increase the chance of flare-ups. Heat will hold under the drip lines of trees and under rocky areas where fuels were sheltered from the rain we received.

DIV L Islands of green will continue to burn through the period. Any flare-up near control lines is a concern as westerly winds will increase the chance of spots outside of containment lines.

DIV J Unburned pockets along the fire-line are a concern as Westerly winds will try to move the fire east. The potential for spotting is on the rise and any flare-ups near containment lines are a threat.

AIR OPERATIONS: No issues expected

FIRE BEHAVIOR SAFETY

Be especially cautious when working in and around pockets. Fire behavior will continue to increase as warming occurs. Keep your head up and know what is going on around you.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire

OPERATIONAL PERIOD: Day 08-19-12

TOPICS:

Common Denominators of Tragedy Fires
Emergency Medical Response
Heat Illness

NARRATIVE:

Common Denominators of Tragedy Fires

- On relatively small fires or deceptively quiet areas of large fires.
- In relatively light fuels, such as grass, herbs and light brush.
- With unexpected shifts in wind direction or wind speed.
- When fire responds to topographic conditions and runs uphill.
 - How many of these are present on our fire?

Emergency Medical Response

- Review Block 8 of the medical plan with your crew. Knowing ahead of time what you will do, Who you will call, and where you will go in the event of a serious injury will save time and potentially save a life.
- We have Advanced Life Support Medics and EMTs strategically positioned on this fire to serve your emergency medical needs.

Heat Illness

- Expect very hot weather today. Normal body temperature is 98.6 degrees F. When the air temperature is near or above this level, you are depending on sweat to dissipate body heat.
- Begin early in the day to build hydration. *DRINK BEFORE YOU ARE THIRSTY*. Balance electrolytes by eating well and drinking water. Gatorade must be mixed 1 to 5 with water.
- Heat exhaustion is serious; heat stroke can be fatal if not treated promptly.
- In the heat of the day, rotate crewmembers out for rest – find shade to cool down.
- Pay attention to yourself and crewmembers. Stop and find shade if symptoms of heat illness are noted.
- If any of the symptoms of heat stroke exist (flushed skin, hot to the touch, nausea, general weakness) this is a medical emergency. Move patient to shade, call for help, wet clothing with lots of water, and prepare for immediate medical transport.

EVERYONE GOES HOME!

SAFETY OFFICER

Craig Dixon SOF 1/*Greg Vegari* SOF 1/ *Sam Phillips* SOF (t)

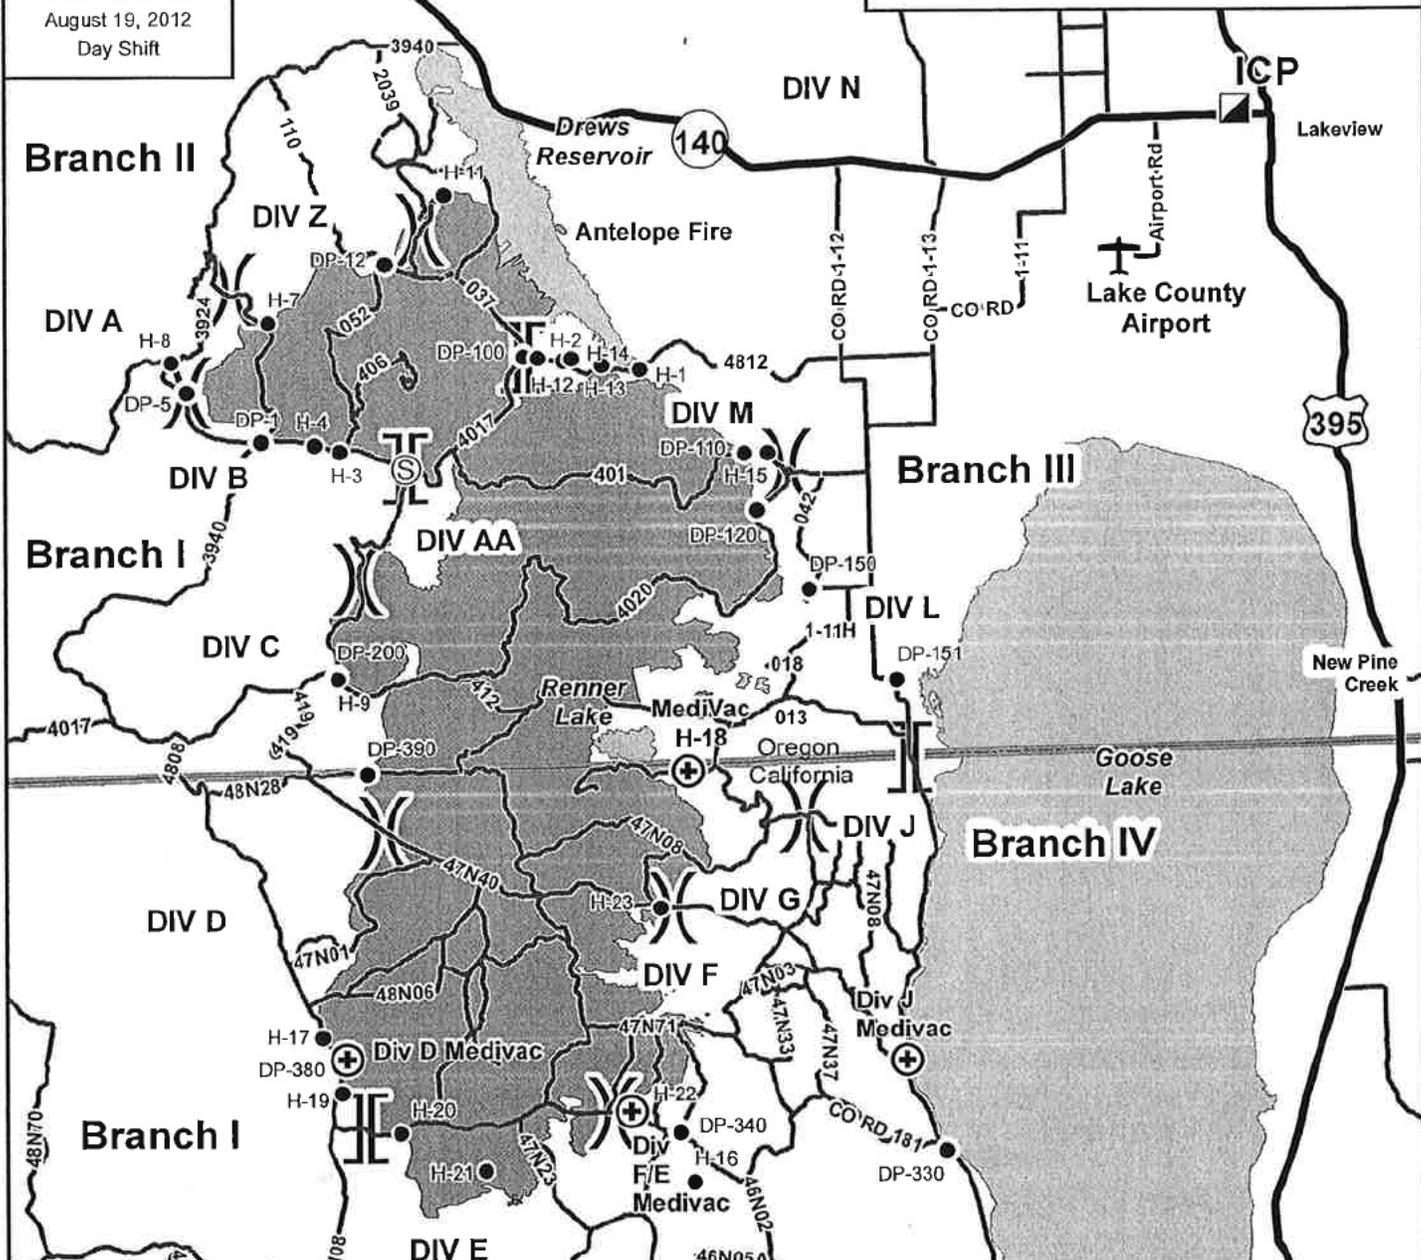

MEDICAL PLAN	1. Incident Name Barry Point	2. Date Prepared 8/19/12	3. Time Prepared 1800	4. Operational Period 0600 to 1800

8. Medical Emergency Procedures					
In the event of a medical emergency provide the following information to the Communications Unit:					
1. Declare the nature of the emergency Medical injury/illness? If injury/illness is it Life Threatening?					
2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.					
3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).					
4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).					
5. Identify on-scene personnel by position and name (i.e.EMT Freshwater).					
6. Identify preferred method of patient transport.					
7. Request any additional resource and/or equipment needed.					
8. Document all information received and transmitted on the radio or phone.					
Identify any changes in the on-scene point of Contact or medical personnel as they occur.

Hours of Operations

Fuel

-ICP 0600-2200 (accepts visa/mastercard/voyager)

South of HWY 140

-Hunters RV (accepts visa), Hwy 395 North near Ranger Station, Mon-Fri 0600-2000, Sat/Sun 0700-2000

ICP Ground Support/Mechanic 0600-2200

ICP Medical 0530-2200

ICP Communications 24/7

Showers 0500-2300

Supply Cache 0530-2200

Ordering 0600-2200

Food Breakfast 0500-1030 and Dinner 1700-2230

Laundry Drop off at Supply anytime. If dropped off by 0900, will be ready by 0900 next day.

Five frogs are sitting on a log .

Three decide to jump.

How many frogs are on the log???

Answer: 5 deciding to jump require no action. Jumping does. Think about this when you brief Safety and Mutual Respect. It is easy to brief it but doing it requires action. Encourage your folks to action.

Thanks from your HRSPs:

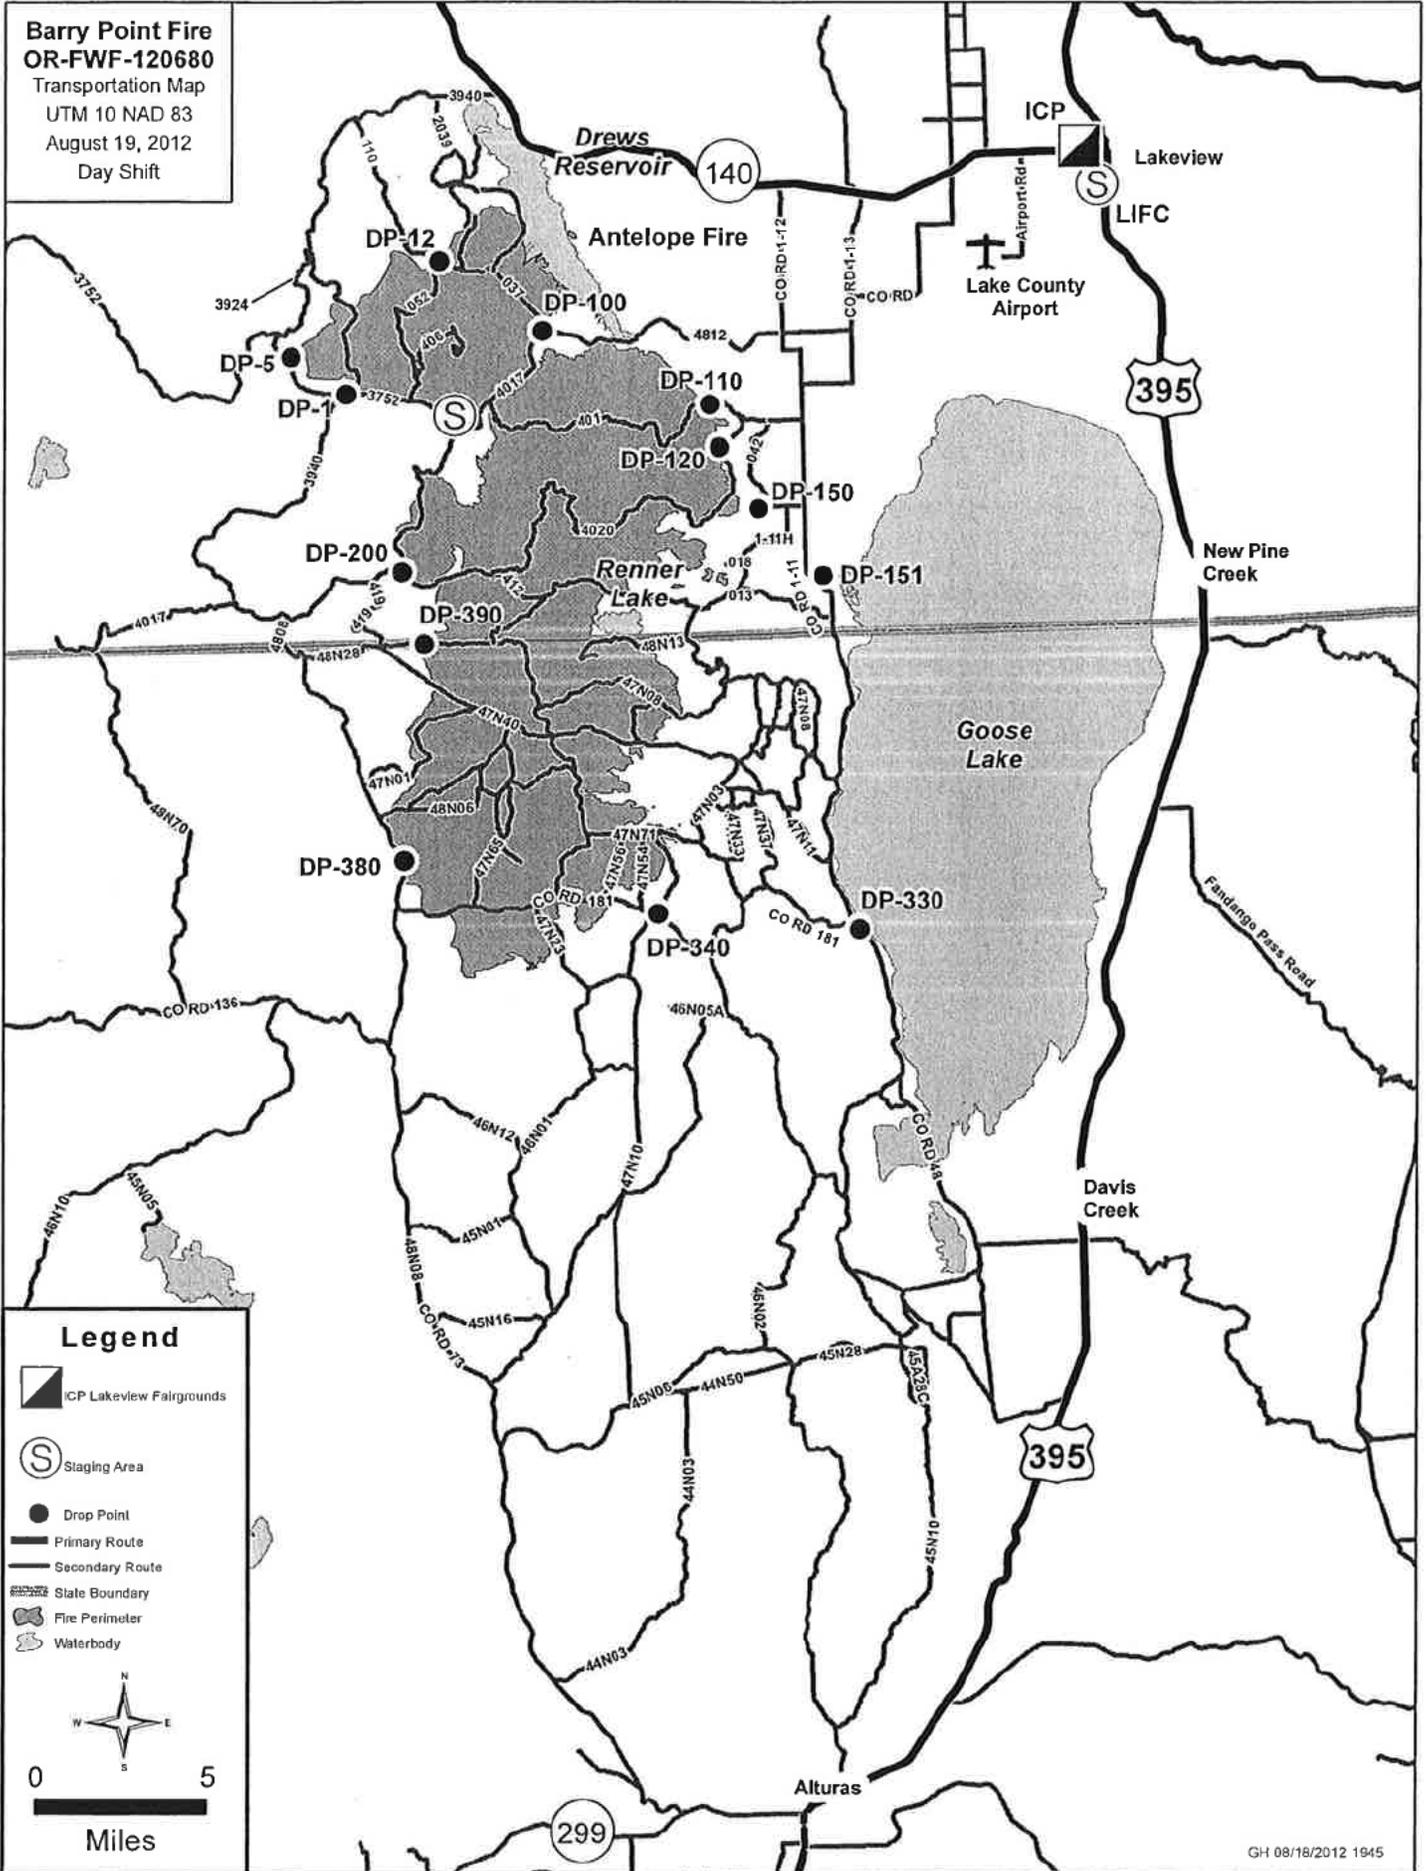

Bill Otani 503-705-5980

Michael Donch
