

CORRECTED

Barry Point Fire

Incident Action Plan

WEDNESDAY-THURSDAY

August 22-23, 2012

24 HOUR Operational Period

0600-0600

OR-FWF-120680

FS - P6G47N

BLM - G47N

INCIDENT OBJECTIVES

1. Incident Name
Barry Point

2. Date Prepared
08/21/2012

3. Time Prepared
2100

4. Operational Period – 8/22-23/2012 24 hr 0600-0600

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with ODF, the District and Forests resources regarding resource considerations, and WFDSS inputs.
- Develop strategies that have high probability of success for the overall suppression efforts on the incident.

Operational Objectives:

- Continue to implement strategies for engaging the fire that will help ensure coordinated efforts for mission success.
 - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters.
 - Where it can be safely done, minimize acreage burned, damage to private property and improvements.
 - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
 - Assess daily the validity of the strategy and tactics and assure planned tactics will meet suppression objectives.
 - Implement guidelines provided in the Barry Point Turnback Standards Plan.
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical:
- Provide timely initial attack assistance to the forest and local agencies within the TFR or as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their established work areas.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and familiarities with medical extraction points.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage the fire on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics will be employed with consideration of values at risk noted above as well as communities, private property, and infrastructure. Tactical actions are based on the principles of point defense and a mix direct / in-direct effort as dictated by the situation.

The following are guiding principles.

- The **Right Plan** (i.e., as informed by the Risk Decision Framework)
- In the **Right Place** (i.e., where we have a reasonable probability of success)
- At the **Right Time** (i.e., when we have favorable conditions for efficient and effective suppression)
- With the **Right Assets** (i.e., those suppression assets needed to safely implement tactics in support of reasonable objectives)
- For the **Right Duration** (i.e., release resources as soon as they are no longer needed)

9. Prepared By (Planning Section Chief)

10. Approved By (Incident Commander)

ORGANIZATION ASSIGNMENT LIST

1. Incident Name	
Barry Point Fire	
2. Date 8/21/2012	3. Time 1800
4. Operational Period 8/22-8/23/2012 0600 - 0600	
5. Incident Commander and Staff	
Position	Name
Incident Commander	Mike Morcom
Deputy	Chris Hoff
Safety Officer	Craig Dixon/Greg Vergar/Sam Phillips (t)
Medical Unit	Dale Pospisil / Richard Warthen
Information Officer	Virginia Gibbons/Jim Whittington
Human Resources	Bill Otani / Michael Donch
Liaison Officer	Dwight Robanske (t)

6. Agency Representative	
Agency	Name
US Forest Service	Fred Way / Rick Newman
US Forest Service	Tyrone Kelley / Kimberly Anderson

INCIDENT Weather Forecast

FORECAST NO: 25
PREDICTION FOR: Day/Night **SHIFT**
SHIFT DATE: Aug. 22-23, 2012
TIME AND DATE
FORECAST ISSUED: Aug. 21, 2012, 2000 PDT

NAME OF FIRE: Barry Point
UNIT: Fremont-Winema NF
SIGNED: *Carl S. Corniglia Jr*
Incident Meteorologist

WEATHER DISCUSSION: After a cool morning with decent humidity recoveries, today will be a seasonally normal day temperature wise with afternoon minimum RH values generally in the mid to upper teens. Winds will be significantly lighter today and generally terrain driven until the early afternoon when a light west flow will develop across the area. With the cool start, stable air mass and light wind, the inversion will be slower to lift and break today. Tonight, winds will become light with RH recoveries not quite as good across the ridges as last night. Another upper level trough is expected to generate gusty winds on Thursday.

...Gusty Afternoon and Evening Winds Expected Thursday...

WEATHER FORECAST: Today

WEATHER: Sunny with a few afternoon cumulus clouds.

MAX TEMPERATURE: 76-81.
MIN HUMIDITY: 15-20%.

20 FT WINDS:

BRANCH II: Terrain driven winds 2 to 5 mph becoming west 3 to 6 mph after 1400.

BRANCH III: Terrain driven winds 2 to 5 mph becoming west to southwest 3 to 6 mph after 1500.

BRANCH I & IV: East to northeast wind 1 to 4 mph becoming southwest 4 to 7 mph after 1300 then west 4 to 8 mph with gusts to 12 mph.

HAINES INDEX: 3 (Very low).
MIXING HEIGHT: Near 1000 ft. AGL rising to 8,000 ft. AGL. Inversion lifting and dissipating around 1400.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Clear.

MIN TEMPERATURE: 45 to 50 ridges and 38 to 43 valleys.
MAX HUMIDITY: 40-50% ridges, 65-75% valleys.

20 FT WINDS:

BRANCH II: Northwest wind 3 to 6 mph becoming light after 2100.

BRANCH III: West to northwest winds 3 to 6 mph easing to north to northeast 1 to 5 mph after 2100.

BRANCH I & IV: Northwest winds 4 to 8 mph easing to north 2 to 5 mph after 2100 then becoming northeast 1 to 4 mph after 0300.

HAINES INDEX: 2 (Very low)
MIXING HEIGHT: 1,000 – 1,500 ft. AGL.

EXTENDED FORECAST:

THURSDAY: Mostly clear. Lows 40-45. Highs 79-84. West to southwest winds 5 to 15 mph with gusts around 25 mph.

FRIDAY: Mostly clear. Lows 38-44. Highs 75-80. Northwest winds 5 to 15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #25	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: 24 hr 8/22/12
DATE ISSUED 08/21/2012	TIME ISSUED: 1900
UNIT: FWF	SIGNED: /s/ Todd Gregory FBAN 

INPUTS

FUELS

Fuels in the fire area are primarily composed of cured grass, mixed grass and brush (less than 2 ft. tall), and timber with understory. Primary timber species include mixed-sized Ponderosa Pine, Western Juniper, and True Fir (at higher elevations). Brush and understory includes Mountain Mahogany, Bitterbrush, conifer dog-hair thickets, sagebrush, and Ceonothus (at higher elevations). Snags are common throughout timbered areas and may contribute to spotting. Live fuels will contribute to fire intensity and rate of spread.

WEATHER SUMMARY

See fire weather forecast for detailed information.

FIRE BEHAVIOR INPUTS

Expect the fire to remain fairly docile today. Late afternoon warming and drying still poses a risk for flare-ups and spotting. Early detection is key in containing spots. Tonight will be very similar to last night as temperatures fall and humidity rises, activity will diminish quickly. Some isolated pockets of heavier fuel and stumps will likely be visible but infrequent.

* Fine fuel moisture of 4% (exposed fuels) and 6% (shaded fuels) today.

* Fine fuel moisture nearing or surpassing 15% tonight.

* Probability of Ignition (PIG) 75% today, 10-20% tonight.

Bitterbrush moisture 90%, Sagebrush 50%-60%

Today

Fuel Type	Rate of Spread	Flame Length	Spotting Distance	*15 mph wind and 40% Slope
Grass (GR2)	15-30 ch/hr.	3-4 feet	0.2 mile	130-140 ch/hr 8-10FL
Grass with mixed shrub (GS2)	8-14 ch/hr	3-4 feet	0.2 mile	125-140 ch/hr 11-12FL
Timber with Understory (TU5)	4-6 ch/hr	5-6 feet	0.2 mile	30-35 ch/hr 13-14 FL
*GS2 - primary spread fuel type	*low wind condition		*from flare-ups	*High intensity condition Spotting Dist. 0.7mi w/30 mph ws

Tonight

Fuel Type	Rate of Spread	Flame Length	Spotting Distance
Grass (GR2)	0-4 ch/hr.	0-1 feet	0.1 mile
Grass with mixed shrub (GS2)	0-2 ch/hr	0-1 feet	0.1 mile
Timber with Understory (TU5)	2 ch/hr	3-4 feet	0.1 mile
*GS2 - primary spread fuel type	*forecasted winds		*from flare-ups

SPECIFIC:

All Divisions

Expect interior islands to continue to burn through the day shift. There will be noticeably less activity today than in the last couple days.

Night shift will continue to see steady decreases in activity through tomorrow night.

AIR OPERATIONS: No issues expected

FIRE BEHAVIOR SAFETY

Complacency is a killer! Remember the task at hand. Keep alert for hazards and changing conditions. Have a good shift.

Safety Message

PNW Team 2

INCIDENT: Barry Point Fire

OPERATIONAL PERIOD: Day/Night 08-22-12

TOPICS:

Common Denominators of Tragedy Fires

Mop Up

Complacency

NARRATIVE:

Common Denominators of Tragedy Fires

- On relatively small fires or deceptively quiet areas of large fires.
- In relatively light fuels, such as grass, herbs and light brush.
- With unexpected shifts in wind direction or wind speed.
- When fire responds to topographic conditions and runs uphill.
 - How many of these are present on your fire?

Mop Up

The Barry Point Fire is in Mop Up stage and this is a time when many accidents and injuries occur because we lose focus and situational awareness. It takes a lot of self-discipline to mop up day after day. Remember to wear all your appropriate PPE, maintain communications with your crewmates, take frequent breaks and keep eyes on your crewmates.

- Wear appropriate PPE, goggles, hearing protection, gloves, helmet.

Complacency

- Stay sharp, even during routine assignments.
- Always maintain LCES when engaged.
- Resist the temptation to extend mop-up into areas where snags have not been mitigated.
- Take more frequent breaks to manage fatigue.

REMEMBER EVERYONE GOES HOME!

SAFETY OFFICER

Craig Dixon SOF 1, *Greg Vergari* SOF 1, *Sam Phillips* SOF (t)

8. Medical Emergency Procedures

- In the event of a medical emergency provide the following information to the Communications Unit:
1. Declare the nature of the emergency
Medical injury/illness? If injury/illness is it Life Threatening?
 2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.
 3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).
 4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).
 5. Identify on-scene personnel by position and name (i.e. .EMT Freshwater).
 6. Identify preferred method of patient transport.
 7. Request any additional resource and/or equipment needed.
 8. Document all information received and transmitted on the radio or phone.
 9. Identify any changes in the on-scene point of Contact or medical personnel as they occur.

Incident Radio Communications Plan

1. Incident Name
BARRY POINT

2. Operational Period
08/22/12 Wednesday DAY Shift 0600 - 0600

3. Basic Radio Channel Utilization

Radio Type	Channel	Function	Frequency/Tone	Assignment	Remarks
King	1	TAC 1	(b) (6)	Divisions A/B,F & L/M Night Division A/A/B/N/Z	(Narrow)
King	2	TAC 2	(b) (6)	Divisions AA/C & G Night Division L/M	(Narrow)
King	3	TAC 3	(b) (6)	Divisions J & Z	(Narrow)
King	4	TAC 4	(b) (6)	Divisions D & N Night Division D/E/C/F	(Narrow)
King	5	TAC 5	(b) (6)	Division E Night Division G/J	(Narrow)
King	6	Command 6	(b) (6)	Branches II & III	Grizzly Peak (Narrow)
King	7	Forest Net Rptr	(b) (6)	II DIV	(Narrow)
King	8	Command 8	(b) (6)	Branch IV	Sugar Hill (Narrow)
King	9	Command 9	(b) (6)	Branches III & IV	Fitzwater (Narrow)
King	10	Command 10	(b) (6)	R. 1 SW of Fire	Blue Mt. (Narrow)
King	11	PRI A/G	(b) (6)	II DIV	Primary (Narrow)
King	12	Sec A/G	(b) (6)	II DIV	Secondary (Narrow)
King	13	TAC 13	(b) (6)	Rehab Group	(Narrow)
King	14	AIR GUARD	(b) (6)	II DIV	AIR/GRND EMER. CONTACT (Narrow)
King	16	AIR GUARD	(b) (6)	II DIV	AIR/GRND EMERGENCY CONTACT (Narrow)

Michael Donch, HRSP

Thanks for Sharing!

A letter to share regarding food donations from camp: "Dear Firefighters, the Lake County Food Share received 3 big boxes from you. We thank you very much. We understand there may be more and we are grateful that you think of us as we try to meet the needs of them in our community. Thanks again!"
