BARRY POINT FIRE

Incident Action Plan

Day Operational Period
Tuesday, August 28, 2012
0700-2000

OR-FWF-120680
P6G47N
BLM-G47N

INCIDENT OBJECTIVES	Barry Point	2. Date Prepared 08/27/2012	3. Time Prepared 1600

4. Operational Period – 08/28/2012 Day 0700 - 2000

Mission: Maintain current fire suppression efforts to keep fire within established control lines. Shift operational activities to fire suppression repair while ensuring safety, integrity, and positive community relationships are maintained.

Strategy: The Barry Point incident management strategy is based on "Values at Risk." Firefighters, the public and other incident responders being the highest value. We will engage in our operational activities on our terms at the appropriate tempo, where probability of success is high and the risk is acceptable. A combination of tactics and lines of effort will be employed with consideration of values at risk noted above as well as communities, private property and infrastructure.

Management Objective:

- Implement good risk management practices in order to provide for firefighter, other responder and public safety. Use good risk analysis processes, the principles of the 10 Standard Fire Orders, LCES and the 18 Watch-Out Situations as the foundation for risk decisions at all levels.
- Use aggressive outreach to insure timely and accurate dissemination of information regarding fire related activities is provided to the public, land owners, cooperators, elected officials and other stakeholders.
- Utilize efficient and effective business practices to manage the fire cost, which should be in alignment with the identified values to be protected. Cost to be tracked in accordance with the approved cost share agreement and maintain records and systems that allow for daily apportionments.
- Ensure that relationships are maintained or enhanced with local land owners, business owners, the general public and other key stakeholders.
- Coordinate with identified personnel from ODF, the Districts and both Forests regarding resource considerations, and WFDSS inputs.
- Maintain property accountability within national direction for acceptable fire loss / use rates.

Operational Objectives:

- Continue to implement strategies for engaging in operational activities that will help ensure coordinated efforts for mission success.
    - Implement identified actions at the appropriate time to allow for the right operational tempo to accomplish mission and reduce risk to fire fighters, other assigned personnel and the public.
    - Utilize resource advisors for input to help minimize environmental concerns related to operational activities.
    - Validate daily the strategy / tactics and assure planned tactics will meet operational objectives.
    - Comply with Federal Aviation Policies on federal lands.
    - Implement the guidelines for fire suppression repair and other activities contained in the "Barry Point Turn Back Standards Plan."
- Utilizing operational strategies and tactics that minimize, impacts to private lands and structures, resource damage, economic impacts, and minimize the disruption to local activities and businesses where practical.
- Provide timely initial attack assistance to the forest and local agencies as requested.

Commanders Intent: To meet the intent of these objectives to provide the highest level of customer services for all involved with or affected by the incident, all incident assigned personnel should be prepared to take the appropriate actions regarding:

- Maintaining good situational awareness within the sphere of their operational area or work area.
- Utilize an approach based on doctrine and good management or business practices in all activities when engaging the fire or involvement with your incident assignment.
- Personal interactions with others both inside and outside the incident management organization or incident operational areas.
- Managing an incident-within-an-incident and knowing where the medical extraction points are located.
- Establishing and maintaining good 360-degree communications structures to ensure all critical and important messages reach the appropriate people in a timely manner.

Spot Forecast for Barry Point Fire
National Weather Service Medford
413 PM PDT Mon Aug 27 2012

IF CONDITIONS BECOME UNREPRESENTATIVE,CONTACT THE NATIONAL WEATHER SERVICE.

SPOT FORECAST FOR BARRY POINT...BLM LAD
NATIONAL WEATHER SERVICE MEDFORD OR
413 PM PDT MON AUG 27 2012

FORECAST IS BASED ON REQUEST TIME OF 1537 PDT ON AUGUST 27. IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER SERVICE.

...RED FLAG WARNING IN EFFECT FROM 2 PM TO 8 PM PDT TUESDAY FOR GUSTY WINDS AND LOW RELATIVE HUMIDITIES...

.DISCUSSION...THE LOW PRESSURE CENTER OFFSHORE WILL PERSIST TONIGHT INTO TUESDAY...THEN GRADUALLY MOVE INLAND OVER THE REGION TUESDAY EVENING INTO WEDNESDAY. THIS SYSTEM WILL CONTINUE TO BRING GUSTY SOUTHWEST WINDS INTO THE BURN AREA THIS EVENING AND AGAIN TUESDAY. WINDS THIS EVENING WILL REMAIN GUSTY TILL AROUND 2100L THEN WILL DECREASE AND BECOME SOUTH TO SOUTHEASTERLY. ON TUESDAY AS THE TROUGH MOVES INTO THE COAST...EXPECT INCREASED SOUTHWEST
WINDS TO DEVELOP OVER THE AREA WITH VERY GUSTY WINDS TUESDAY AFTERNOON AND EVENING.

A LINGERING TROUGH REMAINS OVER THE AREA WEDNESDAY WITH A DECREASE IN TEMPERATURES BY SEVERAL DEGREES AND AND INCREASE IN HUMIDITIES BY AROUND 5 PERCENT. WINDS WEDNESDAY WILL BE LIGHTER AND WESTERLY.

.TUESDAY...

SKY/WEATHER.....SUNNY. AREAS OF SMOKE.
MAX TEMPERATURE.....74-79.
MIN HUMIDITY.....9-13 PERCENT.
EYE LEVEL WINDS.....SOUTHEAST WINDS 2 TO 3 MPH EARLY IN THE MORNING EXCEPT SOUTH 2 TO 5 MPH NEAR THE TOP OF THE BURN...BECOMING SOUTH 4 TO 6 MPH LATE IN THE MORNING...THEN BECOMING SOUTHWEST 7 TO 10 MPH WITH WITH GUSTS OF 15-18 MPH IN THE AFTERNOON.
MIXING HEIGHT.....500 FT AGL INCREASING TO 5000 FT AGL LATE IN THE MORNING...THEN INCREASING TO 7000 FT AGL IN THE AFTERNOON.
MIXING WINDS.....SOUTH 6 TO 12 MPH INCREASING TO 10 TO 20 MPH IN THE LATE MORNING THEN BECOMING SOUTHWEST AROUND 20 TO 30 MPH IN THE AFTERNOON.
CWR.....0 PERCENT.
LAL.....1.
WIND (20 FT).....SOUTHEAST WINDS AROUND 5 MPH EARLY IN THE MORNING EXCEPT SOUTH 5 TO 10 MPH NEAR THE TOP OF THE BURN...BECOMING SOUTH 8 TO 12 MPH LATE IN THE MORNING...THEN BECOMING SOUTHWEST 14 TO 18 MPH WITH WITH GUSTS TO AROUND 30 MPH IN THE AFTERNOON.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #3	TYPE OF FIRE: Wildland
FIRE NAME: Barry Point	OPERATIONAL PERIOD: 08/28/2012 0700-2000
DATE ISSUED: 08/27/2012	TIME ISSUED: 2000
UNIT: Fremont Winema National Forest/ Modoc National Forest	SIGNED: /s/ Tod Johnson

INPUTS

Fuels in the area are primarily cured grass and mixed grass and brush less than two feet tall, and timber with understory. Primary timber types are Ponderosa Pine, Western Juniper, and true fir. Brush and understory includes Mountain Mohagany, Bitterbrush, Sagebrush and Ceonothus. Snags are common throughout the area.

Fire behavior observations from 8/27/2012:
Creeping and smoldering continued well within the perimeters. Most fire activity contained to the timber litter at the bases of Juniper and Ponderosa pine trees.
Weather observations: high temps 73-74, low humidity 13%, wind S/SW 4-5 with gusts to 8.

WEATHER SUMMARY

RED FLAG WARNING FOR HIGH WINDS AND LOW RELATIVE HUMIDITIES

Eye level winds
Light southeast winds in the morning becoming 3-5 with gusts to mph, then expect becoming southwest 7 to 10 mph with gusts of 15-18 mph in the afternoon.
20 ft winds
Southeast to 5 mph in the morning becoming south 8-12 late morning then switching to southwest 14 to 18 mph in the afternoon with gusts to 30 mph.
Expect continued clear skies to persist through this forecast period.
Minimum humidity ranging from 9-13%. Max temps 74-79.

FIRE BEHAVIOR GENERAL

General: As sun, wind and slope align with warmer afternoon temperatures and lower humidity expect continued burnout of interior islands. Flame lengths 2-3 feet in pockets of timber with possibility of individual and group tree torching. Upwards of 1500 ft. spotting distances may be anticipated form torching trees exposed to todays 20 ft wind speeds.

FIRE AREA:

Anticipate islands of fuel to burnout within the perimeter. Watch for torching trees and lofting embers that can spot east of the established lines. Probability of ignition 70-80%.
The Fire behavior characteristics shown below are to be used as estimates for the type of fire behavior that can be anticipated should a spot occur outside the perimeter during peak forecast wind conditions and low humidity in divisions on the east side of the fire.

Short Grass: 25-30 chains per hour with 2-3 foot flame length

Grass and Shrub: 20-26 chains per hour with 5-6 foot flame length

Continued smoldering and creeping will continue within the unburned islands throughout the fire area.

AIR OPERATIONS: Expect another day of hazy flying conditions throughout the day. Sustained winds with and gusts in the afternoon.

SAFETY

Base your actions on current and expected fire behavior.
Take wind speed and direction into consideration during felling operations. Fire weakened trees may fall at any time when during high winds.
Remember the problem with communication is the illusion that it has taken place. Be sure to thoroughly brief personnel and be sure your instructions are understood and can be repeated.

Safety Message

INCIDENT NAME: Barry Point	OPERATIONAL PERIOD: Day 08/28/12

MAJOR HAZARDS:

- Driving
- Snags/Hazard Trees
- Chippers
- Active Logging Operations
- Public Traffic
- Ruby Pipeline
- Multi-jurisdictional Response
- Livestock on Roads
- Red Flag Warning - Gusty Winds
- Dehydration
- Fatigue
- ATVs/UTVs

NARRATIVE:

Risk Management

"Risk management doesn't get in the way of doing the mission - it is the way we do the mission."

We may be in a mop-up, patrol, and rehab mode but that doesn't made all the hazards have gone away. In fact the log truck traffic now occurring in our fire area has introduced a new hazard. It is important that we stay on top of the risks involved in our actions throughout the day. Use the following process to quickly assess risk for the situations you face throughout the day.

Step 1 - Identify the hazards. Make this an ongoing, continuous process in your daily decision making routine. Gather as much information as possible.

Step 2 - Assess the risk levels. The probability and severity of an undesirable outcome linked to identified hazards **= RISK**.

Step 3 - Analyze and select control or mitigation measures. **Limiting exposure is almost always an option.**

Step 4 - Reassess risk level with controls in place (residual risk).

Step 5 - Make your risk informed decision based on the residual risk. Ask the **risk vs. gain** question - is the benefit of the action I'm considering worth the risk I'll be taking?

Step 6 - Monitor the situation

USE THE RISK MANAGEMENT PROCESS PRIOR TO STARTING OPERATIONS AND AS THEY CHANGE THROUGHOUT THE DAY.

SAFETY OFFICERS:	John Prendergast, Ken Paul, Alan Johnston, Greg Vergari, and Barry Hogge

8. Medical Emergency Procedures

In the event of a medical emergency provide the following information to the Communications Unit:

1. Declare the nature of the emergency
   Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene point of contact (POC) by Resource and last name (i.e. PIC is TFLD Smith).
4. Identify nature of the incident, number injured, patient assessment (s) and location (geographic and GPS coordinates).
5. Identify on-scene personnel by position and name (i.e. .EMT Freshwater).
6. Identify preferred method of patient transport.
7. Request any additional resource and/or equipment needed.
8. Document all information received and transmitted on the radio or phone.
9. Identify any changes in the on-scene point of Contact or medical personnel as they occur.

The Simple Demobilization Guide

1. Section Chiefs should provide tentative release dates to the DMOB unit at least 24 hours for ground and 48 hours in advance for air travelers.

2. The IAP contains your Last Work Day (LWD) within the ICS-204, the IAP also contains a Tentative Release Schedule, and (towards the back) this should show your demobilization day to be one day after your LWD.

3. If traveling by air you should have completed your commercial air travel request form at check-in, if not do so at least 48 hours prior to your scheduled departure.

4. For air travelers, plan on approximately 5.0 hours ground travel to Reno, and 4.0 hours to Redmond.

5. Please make sure your time is posted and up to date prior to starting your DMOB process.

6. Exercise courageous patience during DMOB – Remember: Our job is to send you home safely; the lack of proper planning on your part does not constitute an emergency on our part!!!

REMEMBER:

A tactful DEMOB person can tell you where to go in such a way that you look forward to the trip!

It's been a pleasure working with all of you.
I hope that you continue showing the same
respect to each other that you have so far.
Be safe and take care for
this fire season is not a sprint but a
marathon, so pace your self.
I hope to see you on the next one.
Yolanda Barnett will be your new HRSP.

Thanks and keep on smiling

Michael Donch
