

USDA Forest Service Rocky Mountain Region

Outreach Notice Medicine Bow-Routt National Forests & Thunder Basin National Grassland

Are you passionate about the outdoors and natural resources management? How about working outdoors with the mission of helping provide products and services that Americans depend on every day from national forests? If so, the Medicine Bow-Routt National Forests and Thunder Basin National Grassland (MBRTB) may be for you (www.fs.usda.gov/mbr).

Numerous Temporary/Seasonal Positions (listed in tables below) will soon be filled by the MBRTB, with duty locations of Steamboat Springs, Walden and Yampa, Colorado, as well as Douglas, Laramie and Saratoga, Wyoming.

This notification is being circulated to inform prospective and interested applicants of these upcoming opportunities. Please see the following information on the positions and the Medicine Bow-Routt National Forests and Thunder Basin National Grassland.

Positions will be filled at the GS-3 (~\$11.95/hr) to GS-7 (~\$18.59/hr) levels. Applicants must be U.S. citizens and at least 18 years old at the time of employment. In order to qualify for a GS-3 (or entry level) position, applicants must have at least 6 months of general work experience. Most college upperclassmen or those with additional work experience could qualify at the GS-4 level. Graduates and/or those with other related work experience could qualify for the GS-5 to GS-7 levels. Most positions would begin work in late May or early June, and candidates can potentially work through September.

These positions assist with natural resource management duties on the Forest and include both field and office work. Field work requires the ability to hike, wade, lift, carry and use equipment in rugged terrain and in all types of weather. The ability to work safely and work well in a team environment is necessary, including the ability to enjoy living in remote mountain or grassland settings. A valid driver's license is required, and overnight travel to different locations on the Forest may also be required. Certain crews may be required to camp out overnight during the week. The following positions are anticipated to be available for the 2013 field season:

Administrative Positions:

Biological Science Technician (Wildlife)	GS-0404-07	Yampa, CO	Not in USAJOBS yet	Melissa Dressen	mdressen@fs.fed.us	filled

ABOUT THE POSITIONS:

Administrative position duties include a variety of clerical work such as answering and routing phone calls, greeting visitors, providing Forest information to the public as requested, selling Forest products, filing, and assisting in general office procedures.

Archeological Technician positions assist in archeological field surveys by recording historic and prehistoric cultural resources as well as testing archeological sites. Both field and office work are required. The ability to hike as much as 10 miles per day in rugged terrain is required for field work. Office work including data entry, map production, and archival research comprises approximately 25% of the job.

Biological Aid/Technician-Botany positions will have duties that include, but are not limited to: planning and implementing surveys for threatened, endangered, sensitive, and rare plants, recommending protection measures, monitoring selected populations, and collection of native plant seed. Plant identification skills and/or familiarity with GPS and GIS technology are desirable. Valid driver's license is required. Note: These are zone positions, meaning that although the duty station is located Walden, CO, employees will also conduct work on the Hahn's Peak-Bears Ears and Yampa Ranger Districts. Over-night travel (camping up to 4 nights at a time) may be required.

Biological Aid/Technician-Fisheries positions assist with fisheries/aquatics management duties on the Forest and include both field (approximately 80%) and office (approximately 20%) work. Job duties typically include amphibian surveys in May-June followed by electrofishing and aquatic habitat surveys in July-August. Fisheries technicians typically assist with a variety of other inventories, monitoring, and restoration projects throughout the course of the summer, especially those projects that are associated with aquatic organism passage projects.

Biological Aid/Technician-Wildlife duties include, but are not limited to: planning and implementing surveys for threatened, endangered, and sensitive animal species (ex: Boreal toad, Northern goshawk, Golden/Bald eagles, Bighorn sheep), as well as neotropical migratory songbird monitoring, and data entry into the computer database. Raptor surveys include, utilizing visual, audio and raptor alarm and wail recordings to survey proposed and active timber sales for raptor activity, recommending protection measures, monitoring known raptor nests on the District, and collection feathers, pellets, or photographic images. Bird identification skills (aural or visual) and familiarity with GPS and GIS technology are desirable.

Forestry Aid-Fire/Technician (Engine Operator) positions serve on a Type 6 Engine crew with the primary responsibility of assisting in wildland fire and fuels management. The job duties have the potential to include multiple day fire assignments, in remote locations, digging fireline for 12 plus hours per day, and camping in spike camps for up to 14 days at a time. Job duties include completing fireline construction, use of water pumps and fire engines, working in and around fire suppression aircraft, and maintenance of various power and hand tools (including chainsaws, axes, shovels, Pulaskis, and McLeods). When not engaged in fire suppression activities, the job involves a variety of project work such as road and trail

maintenance, wildlife habitat manipulation, and miscellaneous equipment/facilities maintenance may also be performed. Daily physical training is required. The ability to perform duties under stressful and adverse operating conditions, such as long work hours, heavy workloads, emergency situations, adverse working and environmental conditions is a must. Passing a Work Capacity Test at the arduous level (hiking 3 miles within 45 minutes while carrying 45 pounds) is required.

Forestry Aid/Technician-Recreation positions are responsible for fee collection, maintenance, repair, and cleaning of developed recreation sites on the Forest. Additional compliance and travel management work using All Terrain Vehicles to patrol and gather data is required. Additional work includes assisting volunteers stationed at visitor centers and campgrounds.

Forestry Aid/Technician-Trails duties include maintaining and clearing wilderness and non-wilderness trails by hiking long distances removing timber, brushing, overhead clearing, tread work, water bar construction and other site specific trail needs. Overnight camping in remote locations may be required. Familiarity with crosscut saws, chainsaws, adze, axe, pruners and rock bars is necessary. Additional work may include wilderness surveys along trails in wilderness areas.

Forestry Aid/Technician-Timber Sale Preparation positions serve as part of a seasonal timber crew and work in the field daily to prepare various timber sales and/or stewardship projects by marking wildlife trees, boundaries, and cut/leave trees. Timber will be cruised using standard forestry equipment including diameter tapes, clinometers, relaskops, prisms, and Global Positioning Systems.

Hydrological Technician duties include a diverse range of surveys, inventory, monitoring, and restoration. Inventories will be conducted on roads and water development facilities to determine if management could be improved. Inventories will also be conducted on Forest Service water rights and information will be entered into databases. Monitoring will include physical and chemical parameters. The positions will assist with a variety of watershed restoration projects to improve aquatic resources.

Laborer positions assist with general facility maintenance in developed campgrounds, four cabin rentals, and in the District Sign Shop. The candidate will work alone across the District, picking up trash out of cans at facilities, cleaning toilet buildings and risers, and maintaining sign boards at developed sites. This position also requires the candidate to be able to check campsites and clean out fire rings.

Maintenance Worker primary duties will be to maintain and repair a variety of Forest Service facilities, including buildings, storage facilities, fences, gates, recreation facilities, recreation rentals, equipment, and travel management and information/directional signs on roads and trails. Knowledge or ability to learn of basic carpentry, mechanics, plumbing, and similar tasks a benefit. Work may occur in town or in forested settings, alone or with other crew members. Current driver's license and ability to lift as much as 50 pounds at one time required.

Range Technician positions will collect annual short-term utilization and long-term trend data using various methods, particularly paired plots and Daubenmire cover/frequency plots. The candidate will erect and dismantle temporary electric fences to create exclosures and additional pastures to protect sensitive areas and facilitate grazing management. Perform monitoring, inventory, and treatment of noxious weeds. Conduct allotment compliance checks and miscellaneous handyman work. Record and enter electronic data into computer. Horsemanship experience is preferred and ATV experience helpful. The candidate will need to be comfortable working alone, at times, walking with a pack or riding horseback in backcountry conditions.

Limited government housing may be available at some districts for about \$4.85/day. Pets are prohibited in government housing and on the job. Other restrictions for use of government housing apply. Please contact the district office for more information.

ABOUT THE FORESTS and GRASSLAND:

The Medicine Bow National Forest dates back to May 22, 1902, with the establishment of the Medicine Bow Forest Reserve by President Theodore Roosevelt. The Medicine Bow contains 1,665,721 acres of National Forest land within its boundaries. It consists of three Ranger districts: Brush Creek/Hayden at Saratoga, Laramie District at Laramie, and the Douglas District / Thunder Basin National Grassland at Douglas.

The Routt National Forest is located in northern Colorado. It was established by President Theodore Roosevelt in 1905 as the Park Range Forest Reserve, and then the name changed to the Routt National Forest in honor of Colonel John N. Routt, the last territorial and the first State Governor of Colorado. The Routt includes 1,126,650 acres of National Forest land within its boundaries. It now consists of three Ranger Districts: Hahn's Peak-Bears Ears at Steamboat Springs, Parks at Walden, and Yampa District at Yampa. The former Middle Park District at Kremmling is part of the Arapaho National Forest but is administered as part of the Routt, and as a part of the Parks District. It includes 232,846 acres of National Forest.

The Thunder Basin National Grassland is located in northeastern Wyoming in the Powder River Basin between the Big Horn Mountains and the Black Hills. The 580,000 acre Grassland ranges in elevation from 3,600 feet to 5,200 feet and the climate is semi-arid. Land patterns are very complex due to the intermingled federal, state, and private lands. The Grassland abounds with wildlife, provides forage for livestock, provides unique opportunities for recreation, and is underlain by vast mineral resources.

Major resource programs on the Forest include fire and fuel management, range, timber and other vegetation management, wildlife, minerals and recreation. The Forest has been heavily impacted by a mountain pine beetle epidemic which has affected more than 1.2 million acres of lodgepole pine. The large number of dead trees has increased the potential for large fires and the need for fire and fuels management.

Elevations on the Forest range from about 5,000 feet to over 12,000 feet. Vegetation varies from sage brush-grasslands at the lower elevations to mixed conifer forests of pine, spruce, fir and aspen in the upper elevations. Wildlife is abundant, with antelope, elk, moose, mule deer, and white-tailed deer being the most common larger species.

Contact information for each ranger district is listed below. Additional information about the Forests and Grassland can also be found on our website at: <http://www.fs.fed.us/r2/mbr/> or you can follow us on Twitter, @MBRNFsTBNG.

Hiring Timelines for Summer Jobs

The ranger districts likely will start hiring for the summer season beginning in February. It is important that anyone interested in these summer jobs sign up and submit an application as soon as possible. If your application hasn't been submitted in time you will not show up on hiring lists! It would be best for applicants to let us know if they are interested in working on the districts so we can help them with any problems and questions that arise.

Start Date for Summer Jobs

It is anticipated the majority of these jobs will start around the last week of May or the first week of June. People hired will be expected to work 40 hours per week through the season. There may be a few opportunities for people to start work earlier in May or to stay on later in the fall if weather and funding permit. Crew schedules can sometimes accommodate students returning to school in August – so ask!

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice or TDD). USDA is an equal Opportunity provider and employer.
