

**Tenderfoot Creek Exotic Honeysuckle Infestation Photos**  
Mostly *Lonicera X bella* (Bell's honeysuckle)

North Side of Country Road 527. June 16, 2003. Photo 270.

Honeysuckle along County Road 527. August 28, 2003. Photo 1028.

Thick honeysuckle with green leaves in spring, in the wetland adjacent to CR 527 near Tenderfoot Creek. May 11, 2005. These bushes were brush-sawed in 2004.

Thick honeysuckle with green leaves on east side of Tenderfoot Creek. Photo taken from the CR 527 bridge, looking south. May 11, 2005. These bushes were brush-sawed in 2004.

Honeysuckle bush hanging over the edge of Tenderfoot Creek. May 11, 2005. Photo 3969.

Tenderfoot Creek, south of CR 527. Few honeysuckle occur along this portion. August 6, 2008.

Honeysuckle bush along west edge of Tenderfoot Creek, between CR 527 and UNDERC road. August 6, 2008.

Tenderfoot Creek, south of CR 527. We used loppers and dropper bottles to treat honeysuckle along the creek from CR 527 south to the Forest Service property line.

Forest Service crew working on honeysuckle along Tenderfoot Creek. In one day we treated most of the honeysuckle along the edge of Tenderfoot Creek from CR 527 south to the Forest Service property. Unlike the 2013 contract specifications, we only worked the edge of the creek, we did not go 100 feet inland.

One method of cut-stump herbicide treatment for honeysuckle, using a pocket pruning saw and a dropper bottle with Aqua Neat herbicide. June 7, 2012. Photo 1536.
