### Project Detail Info

[www.chugachelectric.com/relicensing](http://www.chugachelectric.com/relicensing)

The construction work zone (yellow highlighted area) and the access road to the dam located at mile 49.6 Sterling Highway is closed to all public access (motorized, bikes, horses & foot traffic) due to heavy construction truck traffic.

Construction blasting is restricted to the work zone. Signs notifying the public of blasting will be posted on both the dam access road, and at Mile 8 on Snug Harbor Road.

Please help us by staying off the dam access road and away from our work sites near the Cooper Lake Dam.

Recreational use of Snug Harbor Road to Cooper Lake will continue during this project. Boaters - be aware the Cooper Lake level will be low in 2013.
