

Linda Smith, Culturist on the Mt. Hough Ranger District, Plumas National Forest demonstrating tree planting method to the Greenville High School students.

Greenville High School Natural Resource Academy continued their restoration work on the Moonlight fire area with the planting of an additional 700 native conifer seedlings on 4 acres. Working at an elevation of 6500 feet, the students were accompanied by personnel from the Sierra Institute, the Plumas National Forest and Greenville High School instructors.

The students of Greenville High Natural Resource Academy have been planting trees and monitoring the sites on the Moonlight area for the past 4 years, helping to collect and record data on the restoration work.
