

Old Growth

The management direction shown on this map and defined in the Proposed Land and Resource Management Plan or Draft does not apply to private, state or other ownerships (shown in white). The legal and administrative boundaries shown on this map are approximate. The location of land ownerships or legal designations are the best available at this time. Accurate landline locations are determined prior to the implementation of projects. The northern boundary of the Roosevelt National Forest has not been legally adjusted to reflect the Cherokee Park Land Exchange. The boundary shown here is in error and will be corrected on future maps.

-  Geographic Areas
-  Suitable and Scheduled for Timber Harvest (134,220 Acres)
-  Lodgepole Pine Inventoried Old Growth
-  Low Elevation Old Growth Development Areas (69,559 Acres)
-  Not Old Growth
-  Ponderosa Pine Inventoried Old Growth
