File Code: 2230

Date: June 11, 2013

These are your 2013 Annual Operation Instructions for the Dunton Sheep Company permitted allotments and should be considered an extension of your Term Grazing Permit.

As outlined in Craig Trulocks' May 1, 2006 letter to you, I expect each of your four companies to run as a unique entity. The Dunton cattle need to be on allotments as outlined below.

Authorized Use for 2012:

Permittee	No. and Class	Permit Area	Season of Use
Dunton Sheep Company	239 Cc	Lower Dutch Area	7/1-9/10
	126 Cc	West Squaw Creek	7/11-9/10
	6 H	Temple Area	rest

As discussed during our meeting, here is how you will operate this season. As always, we need to communicate on a regular basis. Your main contact is Barb Franklin at 367-5721 if you/we need make any significant changes.

Cattle (OL brand) will be grazed in common with your other permitted cattle. Cattle will graze east to west this season, entering West Squaw Creek and remaining east of Big Sandy Creek until approximately the first week of August. Cattle will then move west of Big Sandy Creek and exit via Muddy Ridge by 9/10. I am authorizing you to graze cow/calf pairs in place of your permitted yearling cattle.

The Temple Creek allotment will be rested.

GENERAL REQUIREMENTS

Permittee will insure that all personnel performing on-the-ground livestock management are thoroughly familiar with the terms of these annual operating instructions and the term grazing permit.

All campsites will be located a minimum of 200 feet from lakes and System Trails and 100 feet from springs, streams and creeks. Livestock will not be tethered or picketed within 200 feet from lakes and System Trails and 100 feet from springs, streams and creeks.

All campsites used in conjunction with livestock operations will be maintained to present a clean, neat and orderly appearance. Flammable refuse will be completely burned. All unburnable materials will be stored properly until removed to a disposal site off National Forest System lands. Burying of trash is prohibited. Temporary holding pens, corrals, or mangers used for riding stock will be removed or cleaned up when the camp is moved or relocated. Facilities authorized on a permanent basis must be kept clean at all times and cleaned up after its use period. All camps must have a serviceable axe and shovel for fire control.

Any carcass or animals remains will be moved at least 100 yards from live water, trails and roads. Animal carcasses in highly visible areas need to be relocated to more remote areas.

A cache/storage area is allowed in Big Sandy Openings at your usual location. The cache needs to be bear resistant and removed each fall. A camp trailer and/or sheep wagon are also permitted.

LIVESTOCK MANAGEMENT:

The permittee will provide sufficient riders or herders to get proper distribution and management of livestock on the allotments.

Horses and mules used in all operations are not to be picketed or tied so as to create a torn up or trampled site appearance.

Sheep dogs will not harass the public. Herders should be present to control herding and guard dogs if necessary.

LIVESTOCK PREDATION: All predator control will be in accordance with State and Federal Laws. The permittee and/or their agents shall not use or place poison or devices for predator control on National Forest System Lands. Report all known or suspected black bear, grizzly bear, wolf and mountain lion activity to the proper authorities. For clarification, please refer to the following:

Bear /Lion: WGFD

Coyote/Wolf: USDA-APHIS-WS.

NOTE: Report all predator activity on or near Forest System Lands to the USDA-FS as well.

Following is a contact list for reporting predator activity:

WGFD (grizzly bear): Pinedale Office, Zack Turnbull, 307-367-4352

USDA-FS: Pinedale Ranger District, 307-367-4326 (Office)

Range, Barb Franklin 307-859-8296 (home) or District Ranger, John Moore 970-640-8203 (cell)

USFWS: Lander Special Agent, Roy Brown 307-332-7607

USDA-APHIS-WS: Rock Springs Supervisor, Rod Merrill 307-362-7238

The attached table summarizes your maintenance obligations. As described in the 2012 non-compliance letter to you, fences need to be maintained and inspected by the Forest Service before cattle may enter the Forest.

Range inspections may occur several times during the grazing season to check maintenance of range improvements, forage utilization, compliance with the grazing rotation, and other standard requirements.

Because of increasing public use, gates are often left open and livestock stray in to the wrong pasture. In addition, livestock can jump or walk cattleguards, or cattleguards can fill with sediment after one large rainstorm. I realize this is a problem and an inconvenience. However, it is still the permittee's responsibility to keep their animals in the proper unit. Routine checks need to be made by you and your riders. Most of our cattle guards are installed so they maybe cleaned with a shovel.

I have provided an Actual Use Report which you may use to record Actual Use data for the 2013 grazing season. Please record the date and number of sheep turned onto the allotment, the dates the sheep are moved to and from each allotment on the rotation, and the number of sheep removed from the allotment. Accurate records of these dates will help us manage the allotment. In addition, please

record labor and cost associated with maintaining the improvements on your allotment. The Forest Service uses these records to help allocate Range Betterment Funds. These funds are used to purchase materials for improvement.

If you have any questions concerning these Annual Operating Instructions, please call Barb Franklin in Pinedale at 367-5721. **Prior approval by the District Ranger is required to amend or change these instructions.** We look forward to the grazing season.
