

To: Paul Cowley
Resource and Planning Staff Officer
Uinta-Wasatch-Cache National Forest

The Utah Council is proud to be a working partner in the restoration of Mill Creek. One of the Council goals is to restore the Cutthroat population in Utah, enhance their habitats and restore the Mill Creek watershed. At the present time, the Council has donated over four thousand dollars to the project. We intend on applying for another ten thousand dollars from the *National Trout Unlimited Embrace A Stream Grant* once the project is underway.

Sincerely,

Robert Dibblee
Chair, Utah Council of Trout Unlimited
