Appendix B. Summary of Previous Sample Results

Table B-1. Asbestos Sampling Results from 2008 Removal Preliminary Assessment Report

Sample ID	Description	Result	MESHAPS
MINE CAMP			
Building A – Shop			
PA-MC-A01	Shingle	5-10%	Cat I non-friable ACM
PA-MC-A02	Floor Tile, Basement Room		
	Layer #1 off-white, floor tile	<=1%	
	Layer #2 black, mastic	2-5%	Cat I non-friable ACM
PA-MC-A03	Ceiling Material, Basement Room		
	Layer #1 gray, paint	0	Cat I non-friable ACM
	Layer #2 off-white panel	50-60%	Friable RACM
Building B – Dorm			
PA-MC-B04	Roof Felt – All Over Ground	0	
PA-MC-B05	Wallboard, white panel	30-40%	Friable RACM
PA-MC-B06	Pile on Floor		
	Layer #1 white, drywall core	0	
	Layer #2 black, roof ply	0	
Building C – Town Mill Slab			
PA-MC-C07	Pile of Tile/Shingles, white drywall core	0	
PA-MC-C08	Clumped Fibers, off-white insulation	70-80%	Friable RACM
PA-MC-C09	Soil in Center of Mill, brown soil	0	
Building D – Residence			
PA-MC-D10	Stucco, exterior		
	Layer #1 off-white stucco	10-20%	Friable RACM
	Layer #2 off-white panel	50-60%	Friable RACM
PA-MC-D11	Ceiling Board, Matches Walls		
	Layer #1 off-white plaster	>1-2%	Friable RACM
	Layer #2 off-white panel	50-60%	Friable RACM

Table B-1. Asbestos Sampling Results from 2008 Removal Preliminary Assessment

Table B-1. Asbestos Sampling Results from 2008 Removal Preliminary Assessment Report (continued)

Sample ID	Description	Result	NESHAPS
MINE CAMP (continued)			
Building D – Residence (continued)			
PA-MC-D12	Roof Shingles gray cement/asbestos board	5-10%	Cat II ACM
Building F – Shop			
PA-MC-F13	Pile On Slab (1/3 cy) off-white debris	0	
Building G – Office			
PA-MC-G14	Debris on floor, white panel	30-40%	Friable RACM
PA-MC-G15	Exterior Wall, white stucco	10-20%	Friable RACM
MLL SITE			
PA-MS-001	Tailings on road above south of building	2-5%	NB
PA-MS-002	Residue in building on shelves and floor	30-40%	Friable RACM
PA-MS-003	Tailings below building	10-20%	NB
PA-MS-004	Tailings below building near lower edge in small surface drainage	≤1%	

Notes: All data from: Forest Service, 2009. "Removal Preliminary Assessment Report, Phillips Asbestos Mine, Mill, and Mine Camp." September.

AZ SRL = No soil remediation level set by Arizona Department of Equality

MC = mine camp

MS = mill site

NB = not a building material

PA = Phillips Asbestos

EE/CA Sampling**

LABORATORY REPORT

Prepared For: Engineering/Remediation Resources Group, Inc.
4585 Pacheco Blvd.
Martinez, CA 94553-2233
Attention: Samantha Caruthers-Knight

Project: 2011-149

Sampled: 06/15/12-06/19/12
Received: 06/20/12
Issued: 06/30/12 11:23

NELAP #01109CA / AZ100001 Arizona DHS#AZ0728

The results listed within this Laboratory Report pertain only to the samples tested in the laboratory. The analyses contained in this report were performed in accordance with the applicable certifications as noted. All soil samples are reported on a wet weight basis unless otherwise noted in the report. This Laboratory Report is confidential and is intended for the sole use of TestAmerica and its client. This report shall not be reproduced, except in full, without written permission from TestAmerica. The Chain of Custody, 1 page, is included and is an integral part of this report.

This entire report was reviewed and approved for release.

Project ID: 2011-149
Report Number: PVF1519

Sampled: 06/15/12-06/19/12
Received: 06/20/12

SAMPLE RECEIPT: Samples were received intact, at 2°C, on ice and with chain of custody documentation.

HOLDING TIMES: All samples were analyzed within prescribed holding times and/or in accordance with the TestAmerica Sample Acceptance Policy unless otherwise noted in the report.

PRESERVATION: Samples requiring preservation were verified prior to sample analysis.

QA/QC CRITERIA: All analyses met method criteria, except as noted in the report with data qualifiers.

N1 = The RPD exceeded the acceptance limit due to sample matrix effects.

COMMENTS: No significant observations were made.

SUBCONTRACTED: No analyses were subcontracted to an outside laboratory.

Project ID: 2011-149
Report Number: PVF1519

Sampled: 06/15/12-06/19/12
Received: 06/20/12

DATA QUALIFIERS AND DEFINITIONS

- D1** Sample required dilution due to matrix.
- M3** The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
- M4** The analysis of the spiked sample required a dilution such that the spike recovery calculation does not provide useful information. The associated blank spike recovery was acceptable.
- N1** See case narrative.
- Q8** Insufficient sample received to meet method QC requirements. Batch QC requirements satisfy ADEQ policies 0154.000 and 0155.000.
- R9** Sample RPD exceeded the laboratory acceptance limit
- T2** Cited ADHS licensed method does not contain this analyte as part of method compound list.
- ND** Analyte NOT DETECTED at or above the reporting limit or MDL, if MDL is specified.
- RPD** Relative Percent Difference

ADDITIONAL COMMENTS

For Extractable Fuel Hydrocarbons (EFH, DRO, ORO) by 8015b/d :

Unless otherwise noted, Extractable Fuel Hydrocarbons by method 8015b/d (EFH, DRO, ORO) are quantitated against a Diesel Fuel Standard.

Test Report: Determination of Asbestos Structures > 10µm in Water Performed by the 100.2 Method (EPA 600/R-94/134)

ASBESTOS

Sample ID Client / EMSL	Sample Filtration Date/Time	Original Sample Vol. Filtered (ml)	Effective Filter Area (mm ²)	Area Analyzed (mm ²)	Asbestos Types	Fibers Detected	Analytical Sensitivity	Concentration	Confidence Limits
								MFL (million fibers per liter)	
PA-MC-GW-01 041216229-0001	6/22/2012 12:30 PM	5	1280	0.2640	None Detected	ND	0.97	<0.97	0.00 - 3.60
Due to excessive particulate the analytical sensitivity of 0.2 MFL as required by the method was not reached.									
PA-MT-SVV-01 041216229-0002	6/22/2012 12:30 PM	0.20	1280	0.2640	None Detected	ND	24.00	<24.00	0.00 - 89.00

Due to excessive particulate the analytical sensitivity of 0.2 MFL as required by the method was not reached.

Samples ozonated prior to analysis.

Re: Narrative, TEM ISO 10312 & ISO 13794; Phillip's Mine; EMSL order ID 041216273
Dear Samantha:

On June 22, 2012, EMSL Analytical, Inc. in Cinnaminson, NJ received forty-eight air samples via FedEx for asbestos content analysis via TEM ISO 10312. The samples were logged in following normal lab procedures. Samples were received under Chain of Custody from Engineering/Remediation Resources Group and arrived in good condition.

TEM ISO 10312

TEM analysis was performed using the following method: TEM ISO 10312: 1995-05-01 Ambient Air-Determination of Asbestos Fibres-Direct Transfer Transmission Electron Microscopy. Client specified analysis utilizing specifications found in Annex E.

Client specified modifications to method as follows:

- An analytical sensitivity of 0.002 S/cc for Ambient Air Samples and 0.004 S/cc for Activity Based Samples was specified verbally by client.
- All field blanks and laboratory blanks each had 10 grid openings analyzed.
- PCM (0.8u) 25mm MCE cassettes were used for sampling.
- Aspect ratio applied was modified to greater than or equal to 3:1.
- A minimum of 4 grid openings were analyzed, from 2 separate grid preparations.
- Width requirement of countable structures was altered to 0.25 microns.
- Structures greater than 5.0 microns in length were recorded.

Results

Samples were analyzed via transmission electron microscopy (TEM) using procedures from ISO 10312. Analysis was performed on a JEOL 100 CX II microscope at approximately 10,000X. Analysis was performed in EMSL's New York, NY laboratory.

The following results were edited and reported on 7/27/2012:
041216273-0027

EMSL ANALYTICAL, INC.
200 RT. 130 NORTH
CINNAMINSON, NJ 08077
PHONE: (800) 220-3675
FAX: (856) 786-0235

The following results were edited and reported on 8/3/2012:
041216273-0017, 041216273-0030, 041216273-0036, 041216273-0045 along with benchsheets for sample 041216273-0024.

TEM ISO 13794

TEM analysis was performed using the following method for applicable samples: TEM ISO 13794: 1999-07-15 Ambient Air-Determination of Asbestos Fibres-Indirect Transfer Transmission Electron Microscopy. Samples that were deemed overloaded or displayed a non uniform deposition, either before or after analysis by ISO 10312, proceeded to analysis by ISO 13794 following approval from client. Filter remnants were slowly ashed and the residue was suspended in de-ionized water. An aliquot of each suspension was filtered onto an MCE filter.

The following samples were analyzed via ISO 13794:
EMSL sample ID: 041216273-0016; Client sample ID: PA-ATVI-AM-03
EMSL sample ID: 041216273-0017; Client sample ID: PA-ATVI-AM-04
EMSL sample ID: 041216273-0040; Client sample ID: PA-ATV2-AM-04

All client-specified modifications for TEM ISO 10312 were also applied to samples analyzed by ISO 13794.

Results

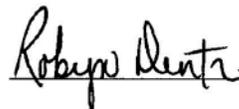

Samples were analyzed via transmission electron microscopy (TEM) using procedures from ISO 13794. Analysis was performed on a JEOL 1200 EX microscope at approximately 10,000X. Analysis was performed in EMSL's Cinnaminson, NJ laboratory.

All reports for samples analyzed by TEM ISO 13794 were amended and reported on 7/27/2012.

Quality Control Performed

The Quality Control (QC) and equipment calibration was performed in compliance with EMSL's Quality Assurance Manual. For this order ID, three inter-analyst QC's were analyzed as well as one intra-analyst QC. Five lab blanks, one ashing blank, one filtration blank, and one hood blank were analyzed for this sample set. All QC results presented within this package were found to be concordant.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. In addition, I certify, that to the best of my knowledge and belief, the data as reported are true and accurate. Release of the data contained in this data package has been authorized by the Laboratory Manager(s) or his designee, as verified by the following signature(s).

CHRYSTILE SAED INDEXING FORM

EMSL Order ID : 041216273 DATE: 07/10/12

Indexing of negative number: 63134 SCOPE #: 03-01

Reference / Sample Number: PA-MA-AM-02

Preliminary ID: Chrysotile By: GI

Using Camera Constant of: 21.89 mm Angstroms

Determined from negative number: 63094

Quick Check

Measured Inter-row spacing: 4.075 mm
 110 reflections present? Enter Yes or No Yes
 200 doublets present? Enter Yes or No Yes

Full Index

Measured distance, center spot to closest hk0 spot (002):	2.93	mm
Measured distance, center spot to closest hk1 spot (110):	4.85	mm
	Calculated	Ref
	- 5%	+ 5%
Inter-row spacing (Ångstroms)	5.37	5.30
Angle to 110 reflection (Measured °)	63	60.0
d2 or d hk 0 (002) (Angstroms)	7.48	7.32
d1 or d hk 1 (110) (Angstroms)	4.51	4.58
	5.035	5.565
	57.0	63.0
	6.954	7.686
	4.351	4.809

From SAED Reference Book, "unknown" diffraction pattern was found to be that of: Chrysotile By: DY

(a) Enter dimensions either in absolute units (um) or in screen units. If reported as screen units, confirm that the Length & Dimension Scales are set as appropriate.

(b) See Annex D of ISO 10312 for identification codes.

(c) Valid Mineral Types:

- AC actinolite
- AM amosite
- AN anthophyllite
- CH chrysotile
- CR crocidolite
- TR tremolite
- LA Libby amphibole
- OA other amphibole
- NAM non-asbestos material
- OM other mineral type (specify in "other mineral description" field)
- Amosite Solid solution series: Amosite, cummingtonite-grunerite
- Trem-Act Solid solution series: Tremolite-Actinolite

(d) Populate this field only if sample was analyzed using more than one instrument, by more than one analyst, or across multiple analysis dates.

(e) If the analyst changes to low magnification, populate this field with a numerical value for what the analysis has chosen.

Grid opening traverse direction (circle one):

Horizontal Vertical

Are prepped grids acceptable for analysis? (circle one)

Yes No

If No, explain:

5/4/2012	DY	22	1	2.65	PASS
6/23/2012	DY	22	1	2.65	PASS

The above aperture diameter represents the on screen diameter in reciprocal space. Multiply this number times the number of layer lines seen to get layer line spacing.

AIHA

Laboratory Accreditation
Programs, LLC

AIHA Laboratory Accreditation Programs, LLC

acknowledges that

EMSL Analytical Inc.

200 Route 130 North, Cinnaminson, NJ 08077

Laboratory ID: 100194

has fulfilled the requirements of the AIHA Laboratory Accreditation Programs (AIHA-LAP), LLC thereby conforming to the ISO/IEC 17025:2005 international standard, *General Requirements for the Competence of Testing and Calibration Laboratories*. The above named laboratory, along with all premises from which key activities are performed, as listed above, have been accredited by AIHA-LAP, LLC in the following:

LABORATORY ACCREDITATION PROGRAMS

- INDUSTRIAL HYGIENE Accreditation Expires: July 01, 2012
- ENVIRONMENTAL LEAD Accreditation Expires: July 01, 2012
- ENVIRONMENTAL MICROBIOLOGY Accreditation Expires: July 01, 2012
- FOOD

Specific Field(s) of Testing (FoT)/Method(s) within each Accreditation Program for which the above named laboratory maintains accreditation is outlined on the attached Scope of Accreditation. Continued accreditation is contingent upon successful on-going compliance with AIHA-LAP, LLC requirements. This certificate is not valid without the attached Scope of Accreditation. Please review the AIHA-LAP, LLC website (www.aihaaccreditedlabs.org) for the most current scope of accreditation.

Dave Sandusky

Dave Sandusky, CIH

Hi Samantha, Just one final Question so I can get this cost quote out to you.

The cost quote will be determined by the type of sample, Ambient Air or Activity Based, since they have different analytical sensitivities.

These aren't denoted on your COC, can you tell me which samples are activity based and which are ambient air?

Thanks

Samantha:

I have instructed the lab to begin prep and analysis of 3 ABS samples (3,5,45 from the cost estimate spreadsheet). By close of business Monday or early Tuesday we should be able to give you at least a verbal estimation of fiber loading. Hopefully that information will help us to chart a course forward. If you have any questions my direct number is below.

Subject: RE:

Ok, so I'm working on figuring out what the sensitivity level we need for these samples is. According to our work plan (attached for your reference) we are trying to determine if there is either >1%, between 1% and 0.25% or less than 0.25% (see section 5). I'm not sure how that translates to the sensitivity levels or the number of grid openings. I would assume if we do see anything over 1% we could quit counting and minimize the number of grid openings that need to be counted. Perhaps this gives you something to go off of? I think the best plan might be for me to flag a few of the samples which I expect to have either the highest or lowest concentrations and see where we are, and go from there? As I mentioned on the phone yesterday, I'm not really sure how all this works so maybe we can talk things over on the phone this afternoon. Once you have had a chance to look over the work plan and think a bit please give me a call on my cell at : 510-851-3279

Thanks,
Samantha

- Laboratory Report -
Project: 2011-149

Conclusions:

- No Asbestiform minerals were observed in the samples.

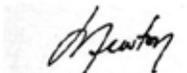

Procurement of Samples and Analytical Overview:

The material for analysis arrived at EMSL Analytical (Cinnaminson, NJ) on 6/22/2012. The package arrived in satisfactory condition with no evidence of damage to the contents. The samples reported herein have been analyzed for Asbestos Fibers per the following equipment and methodologies.

Instruments/Methods: Scanning Electron Microscope, JEOL 6400
Energy Dispersive X-Ray Spectrometer, EVEX Nano

Definitions: Asbestos: Any of a group of six regulated naturally occurring, fibrous minerals.
ND: None Detected
LOQ: Limit of Quantitation
str/L: Structures per liter

A. Organic fibers consistent with plant matter.

B. One fiber consisting of iron oxide

C. Additional field area was analyzed to compensate for the low sample volume.

Important Terms, Conditions, and Limitations:

Sample Retention: Samples analyzed by EMSL will be retained for 60 days after analysis date. Storage beyond this period is available for a fee with written request prior to the initial 30 day period. Samples containing hazardous/toxic substances which require special handling may be returned to the client immediately. EMSL reserves the right to charge a sample disposal or return shipping fee.

Change Orders and Cancellation: All changes in the scope of work or turnaround time requested by the client after sample acceptance must be made in writing and confirmed in writing by EMSL. If requested changes result in a change in cost the client must accept payment responsibility. In the event work is cancelled by a client, EMSL will complete work in progress and invoice for work completed to the point of cancellation notice. EMSL is not responsible for holding times that are exceeded due to such changes.

Warranty: EMSL warrants to its clients that all services provided hereunder shall be performed in accordance with established and recognized analytical testing procedures and with reasonable care in accordance with applicable federal, state and local laws. The foregoing express warranty is exclusive and is given in lieu of all other warranties, expressed or implied. EMSL disclaims any other warranties, express or implied, including a warranty of fitness for particular purpose and warranty of merchantability.

Limits of Liability: In no event shall EMSL be liable for indirect, special, consequential, or incidental damages, including, but not limited to, damages for loss of profit or goodwill regardless of the negligence (either sole or concurrent) of EMSL and whether EMSL has been informed of the possibility of such damages, arising out of or in connection with EMSL's services thereunder or the delivery, use, reliance upon or interpretation of test results by client or any third party. We accept no legal responsibility for the purposes for which the client uses the test results. EMSL will not be held responsible for the improper selection of sampling devices even if we supply the device to the user. The user of the sampling device has the sole responsibility to select the proper sampler and sampling conditions to insure that a valid sample is taken for analysis. Any resampling performed will be at the sole discretion of EMSL, the cost of which shall be limited to the reasonable value of the original sample delivery group (SDG) samples. In no event shall EMSL be liable to a client or any third party, whether based upon theories of tort, contract or any other legal or equitable theory, in excess of the amount paid to EMSL by client thereunder.

The data and other information contained in this report, as well as any accompanying documents, represent only the samples analyzed. They are reported upon the condition that they are not to be reproduced wholly or in part for advertising or other purposes without the written approval from the laboratory.

Table D-8. Alternative 4 - Cost Summary

CAPITAL COSTS:					
DESCRIPTION	QTY	UNIT	UNIT COST	TOTAL	SOURCE/NOTES
Implementation Plans/Setup	1	LS	\$75,000	\$75,000.00	Includes pre-mobilization archeological survey, to be conducted prior to other planning documents. Includes 10 days for Technical Staff to complete pre-mobilization plans (including Work Plan and HASP with graphics, review, and production).
Design	1	LS	\$37,500	\$37,500.00	Includes 15 days for Technical Staff to complete the design of road grades and restored grades. Includes surveys.
Mobilization and demobilization	1	LS	\$160,000	\$160,000.00	Mobilization and demobilization of crew, materials, and equipment. Craft trade crew of nine plus one technical person for 4 days. Includes airfare and hotel costs for the duration of work.
Site Work					
Road grading	1	LS	\$105,000.00	\$105,000.00	8 days of work, includes use of an excavator, dozer, and backhoe.
Load and haul waste to stockpile area	11,500	BCY	\$8.08	\$92,875.55	RS Means Heavy Construction Cost Data 2012, G1030 140 3400 Load and haul common earth, 3.5 cy track loader, four 20 cy dump trailers, 1 mi round trip. Multiply by 1.5 for grade at Upper Workings Area.
Load waste into end dumps	18,400	Ton	\$320.00	\$5,888,000.00	Estimated rate of 10 loads per day. Includes crew and material costs for wrapping waste in plastic and glueing shut for transport as asbestos-containing material.
Waste disposal	18,400	Ton	\$46.00	\$846,400.00	Apache Junction Landfill in Apache Junction, AZ.
Waste transport	840	Load	\$1,950.00	\$1,638,000.00	Written quote from MP Environmental, Phoenix, AZ.
Grading disturbed waste removal areas	8,000	SY	\$0.51	\$4,044.72	RS Means Heavy Construction Cost Data 2012, 31 22 16 10 3300 Finish Grading slopes, gentle. Multiply by 3 for grade.
Erosion control fabric	8,000	SY	\$1.17	\$9,366.72	RS Means Heavy Construction Cost Data 2012, 31 25 14.16 0020 Rolled erosion control mats and blankets, jute mesh, 100 sy per roll, 4' wide, stapled.
Hydroseeding with native plants	72	MSF	\$71.40	\$5,141.05	RS Means Heavy Construction Cost Data 2012, 32 92 19 14 4600 Seeding, slope mix, 6"MSF, hydro or air seeding, with mulch and fertilizer.
Adit Closure	1	LS	\$280,000.00	\$280,000.00	Bat survey of 16 adits, bat gates at 8 adits, safety closures at 8 adits. Backfill safety closures with native soil.
4,000 gallon water truck	31	WK	\$1,608.00	\$49,755.00	Water truck use for dust suppression during all construction activities.
After Action Report	1	LS	\$20,000	\$20,000.00	Includes 10 days for Technical Staff to write a completion report, including graphics, review, and production.
SUBTOTAL				\$9,211,083	
Contingency	25%			\$2,302,771	15% scope + 10% bid
SUBTOTAL				\$11,513,854	
Project Management	10%			\$921,108.30	Includes project management during all phases of construction, regulatory interface, permitting, and crew per dems.
Construction Management	12%			\$1,105,329.97	Includes construction management, quality control, geotechnical testing, and quality control testing.
SUBTOTAL					
Institutional Controls	1	LS	\$40,500	\$40,500	Forest Plan amendment, legal description for ARIC, and legal fees. Includes reproduction.

Lower Workings Adits**

Attachment 1. 2011 Forest Service Photographs of Lower Workings Adits

Lower Workings in the Mill Tributary as seen from Phillips Canyon at pulley building

Same as above photo as seen from the Mill site. Ledge was carved out. There is waste rock below this. Metal is visible on ledge.

Attachment 1. 2011 Forest Service Photographs of Lower Workings Adits

Mill Tributary with waste rock in bottom of drainage.

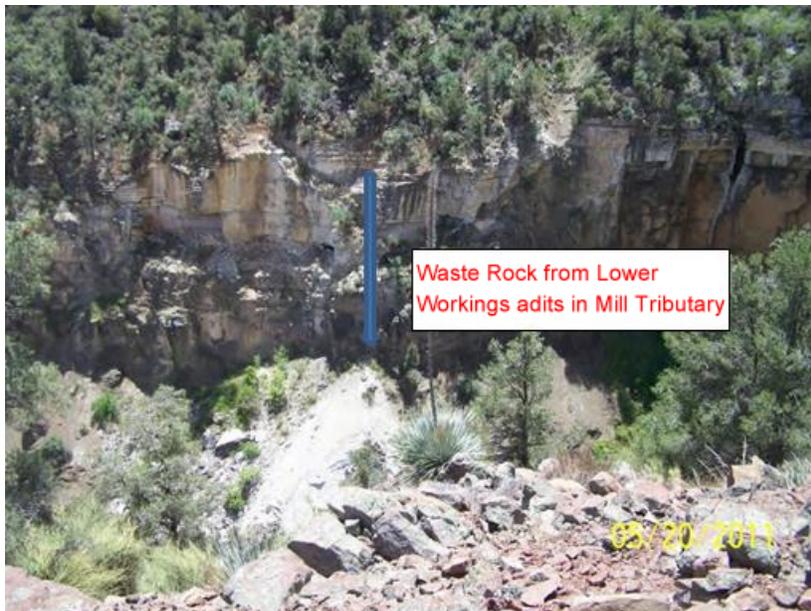

Lower Workings across the Mill Tributary from Mill site

Attachment 1. 2011 Forest Service Photographs of Lower Workings Adits

Some of the Lower Workings adits across from the Mill in the Mill trib. Access is an issue but they are adits that are visible from the Mill.
