

If you like to pick huckleberries, gather mosses, and harvest mushrooms or medicinal plants, you probably can continue doing so as you always have. However, there are limits to the quantities that can be harvested. Most forest products require a permit to help guide you with how and where to harvest and which plants are prohibited from collection. These guidelines are in place to prevent over-harvesting in order to provide sustainable forest products for the future.

Fern

To harvest some Forest Products from National Forest lands, a permit will be required.

What are Special Forest Products?

Special forest products are non-timber goods that can be found in the forest such as mushroom, beargrass leaves, fern greens, pine cones, evergreen boughs and huckleberries. Because many of these items have a commercial value, they may be over-harvested if not managed. In order to protect these

resources, yet make them available to the public, the Flathead National Forest has adopted collection

limits for these products. The forest has developed a Special Forest Products Plan to assure sustainable harvest of these resources into the future.

Why do I need to pay a fee, or obtain a permit for certain products?

All plants on National Forest Service lands, from tiny lichens to the largest trees, belong to the American Public. Just as the Forest Service sells timber, harvesting plant materials that are of value must be purchased for a fair market value with the proceeds going to the U.S. Treasury. Permits are sometimes required to provide guidelines for appropriate collection, make collectors aware of any restrictions in collecting and to display the appropriate fee.

Special Forest Products on the Flathead National Forest

Listed below are the limits, fees and permit requirements for most products available. All limits and fees are for **personal use only**, and apply to one adult per calendar year.

Gathering any product to be sold is considered commercial harvesting. Some of these products may be harvested in greater quantities for commercial use, however, different permits and fees are required. For more information about commercial harvesting, and more details on the limits and permit requirements for these and other products, contact your local Forest Service office.

Personal Use Permit Required		Fee
	Huckleberries No permit or fee required up to 10 gallons. Amounts greater than 10 gallons requires commercial use permit.	\$0.00
✓	Fern Greens (fiddleheads and leaves only) Limit: 20 lbs. green weight. Free-use permit required which lists all species prohibited from collection.	\$0.00
