

Outreach and educate

1. How to educate new communities to WUI:
 - a. Firewise
 - b. Existing communities
 - c. Education
- Everyone come to the table – start making a plan
2. Do CWPPs get community involved?
 - a. Educate and reach out to communities.

Prescribed burning

3. What can the plan do to mitigate RX burns for development?
4. Can you put in a plan to burn the entire forest?
5. Want as much of forest to burn as possible as often as possible.
6. Expand mechanical treatment in WUI areas where RX fire is not being implemented for various reasons.
7. Intermix/Interface – “RX fires are easier to mitigate in the intermix”.

Planning

8. Is there another way to strategize w/adjacent landowners yearly?
9. Commercial opportunities
10. Roads important in plan
11. Work with insurance Co. to mitigate rates by RX burns
12. Working in plan to decrease building near federal lands.
13. FS work to limit future risks
14. FS obligation to community – Liability
15. “Tell us what you need”!
16. Need for change
17. Establish water run off standards

Sweet Grass Community (misc)

18. Burn pine needles – they use them
19. Cannot go in and get resources for basket making
 - a. Partly due to overgrowth
 - b. Partly due to FS not providing permits
20. Pine needle –bullrush – sweet grass – palmetto leaves – palmetto thorn
 - a. Listed as types of vegetation that is sought after
