

**PUBLIC NOTICE-CUSTOMERS OF  
USFS Hammond Camp  
FAILURE TO MEET MICROBIOLOGICAL MONITORING REQUIREMENTS  
FOR DRINKING WATER**

**Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.**

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During JUL2013 we did not test for total coliform bacteria and therefore cannot be sure of the quality of our drinking water during that time.

This is a violation of Missouri Public Drinking Water Regulations. The Missouri Department of Natural Resources requires that drinking water from this supply be tested for this type of bacteria by submitting at least one valid sample per month. Bacteriologically-contaminated water can cause a variety of disease symptoms. It is important that drinking water be routinely tested to ensure the safety of those who consume it.

Provide explanation of cause of monitoring failure:

No water sample taken for  
month of July

For further information contact

Darla Rein at 417-683-4428

(Name of system contact person)

(phone #)

or the department's Public Drinking Water Branch at (573) 751-5331  
or contact the Southwest Regional Office at 417-891-4300

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
