

Schulman Grove Ancient Bristlecone Pine Forest Visitor Center

White Mountain RD, Inyo NF

Contractor: Rosene Creative, Inc. (Jasper, GA)

Completed in 2013

Exhibits at this rebuilt Visitor Center were developed to help people connect with the phenomenon of the ancient bristlecone forest in this area.

This ancient forest has some of the oldest living trees in North America and has provided a wealth of information to scientists on climate change, historic environments, and forest adaptations to change. Visitors to the facility are taken on an exploration of these discoveries.

For more information on the Ancient Pine Forest Visitor Center, visit: <http://www.fs.usda.gov/recrea/inyo/recreation/recrea/?recid=20272>.
