*Forest Service will provide locally adapted seed. Purchaser agrees to make a Co-operative Deposit of \$15.00 per pound of seed issued and not returned.

1/ For sales in Oregon, the seed shall meet the State certification specifications. Seed must be packaged in containers carrying official certification labels sewn in, glued to, or printed upon the container, with the following information:

1. Variety (if certified as to variety) and kind.
2. Quantity of seed (pounds or bushels).
3. Class of certified seed (blue tags for certified seed).
4. Inspection or lot number traceable to the certifying agency's records.

For sales in Washington, the seed shall be labeled as "Prohibited and Restricted Noxious Weed Free for the State of Washington." The purchaser shall furnish a copy of the seed analysis.

For state of California lands in Region 6, seed must be certified by the state of California, or by an independent agency or company that is approved by the state of California for "prohibited and restricted noxious weed free for the state of California."

For mixtures of seed, each ingredient in excess of 5 percent must be listed with its percentage by weight and its germination percentage.

Legumes must be inoculated with nitrogen fixing bacteria before planting. The label must show the expiration date of the inoculant.

SPECIFICATIONS PURSUANT TO CT6.74# - SLASH TREATMENT REQUIREMENTS
(02/2002)

Lop and Scatter

Prior to skidding operations, Purchaser shall cut all exposed limbs from Included Timber. Such limbing shall be done to the AT2 minimum top diameter 5 inches, at which point the top will be cut from the remainder of the stem. Slash remaining at the cutting site will be lopped and scattered away from residual timber. Slash depths shall not exceed 18" depth upon completion of skidding.

TABLE PURSUANT TO CT6.42# - YARDING/SKIDDING REQUIREMENTS (06/2010)

YARDING/SKIDDING REQUIREMENTS

PAYMENT UNITS

No Whole Tree Yarding. Trees are to be limbed and top bucked out prior to skidding. Stumps are to be left in place.	ALL
60 feet minimum trail spacing except where trails converge or unless approved by the Forest Service.	ALL
Skidding tractors/forwarders shall be no more than 12 feet wide, including the blade.	ALL
All logs/trees shall have one end suspended during skidding or forwarding.	ALL
Utilize existing skid trails and landings where Practible.	ALL

TABLE PURSUANT TO CT6.22# - PROTECTION OF IMPROVEMENTS (07/2001)

Type of Improvement

Move or Relocate to

Fences in Cutting Units

Cut fence as needed for operations and as approved by the Forest Service. Fences will be repaired by Purchaser following operations in a timely manner prior to and during the allotment grazing period.

All seed treated with a fungicide or pesticide must be labeled that it is "treated" giving the name of the chemical used, and an appropriate warning or a caution statement.

2/ Fertilizer shall be a standard commercial fertilizer with guaranteed analysis of contents clearly marked on containers.

3/ Mulch shall meet the appropriate State's certification specifications, with evidence of its certification traceable to the certifying agency's records.
