Dinkey Landscape Restoration Project Socioeconomic Monitoring Public Meetings

On November 20, 2013, the Dinkey Landscape Restoration Project will be hosting two 3-hour public workshops to discuss results identified in a recent Socioeconomic Study conducted by the Sierra Institute for Community and Environment. Participants will learn about and help identify socioeconomic issues of concern in the area. They will also help identify measures and indicators that will be used in the Dinkey Landscape Restoration Project social assessment work. One workshop will be held in Clovis (10:00am to 1:00pm) and the other in Shaver Lake (5:30pm to 8:30pm) - more details to come.

For more information about these meetings, contact Monitoring Program Co-Lead, Stan Van Velsor at stan_vanvelsor@tws.org
