Inyo National Forest Supervisor's Office, 351 Pacu Lane, Bishop, CA 93514

REGISTER: [Please Email or Call Deb Schweizer at \(760\)-873-2427](#)

Please join us for the next in a series of Dialogs to discuss critical issues that affect the Sierra Nevada and the Cascades as well as the people who live, work, and recreate there. Participants are invited to ponder the future, specifically the management of national forests, and gain an understanding of different perspectives. Dialogs bring together stakeholders and US Forest Service representatives from throughout the state representing the entire Sierra Cascades for an opportunity for aligned actions.

Dialog 11 will focus on the issues and complexities surrounding land management and wildland fire; as well as **fire's role in ecological resilience**. Speakers will share the benefits, challenges, constraints and opportunities fire presents as a land management tool. Participants will explore the impacts of wildland fire on ecological and community resiliency, and **the economic, social and cultural effects of large fires such as the Rim Fire**.

Come learn about other communities and stakeholders; come lend your voice to the conversation.

2014 Dialogs: Feb/March, June /July, and Oct/Nov.

Future Dialog Topics: Water Resources | All Lands Approach to Fire Protection and Ecological Restoration | Utilization of Wood Waste for Multiple Benefits | Effective Monitoring | Changing Climate
