

LAND MANAGEMENT INTEGRATED RESOURCES (LMIR) BPA
Process & Ordering Instructions

To search for a list of vendors who will receive a copy of your solicitation, use the LMIR BPA WEBSITE: <https://www.fs.usda.gov/business/lmir/>

Overview

The Land Management Integrated Resources (LMIR) Blanket Purchase Agreement (BPA) is a national BPA - that can be utilized on **all federal lands by any federal agency (and it does not have to be Stewardship funds)**. The BPA consists of a large variety of Commercial Service scopes including Professional Services, Natural Resources Restoration, Project Management, NEPA, Communications, and *many* more. This BPA is a firm-fixed price type with a *total small business set-aside* that combines the commercial services into one, holistic tool to streamline work and expedite the acquisition process. If no small businesses respond, or the response is inadequate, the Contracting Officer may choose to re-solicit Unrestricted.

This BPA does not cover construction services or architect-engineering services.

With incoming initiatives, increased fire activity, and decreased internal workforce, it is crucial to have tools like this in place to ensure the work is done timely. See Page 4, of this document, for the entire current listing of scopes of work that are included on the BPA. We anticipate adding more scopes as requests come in and as time allows.

Category	State	Contract Type	Min. Order	Max. Order	Individual BPA Ceiling	Last Date to Order	Expiration Date	Who Can Use
Services	National	BPA	\$0	\$0	\$50 million	02/01/2033	02/01/2033	Any Federal Agency

Solicitation Process

The LMIR BPA Solicitation (12363N23Q4023) was posted on SAM.gov in January 2023. This is an open and continuous BPA with a ceiling amount of \$50 million per contractor and allows us to accept new responses for the life of the BPA ([LMIR BPA on SAM.gov](#)). The LMIR BPA has a continuous pre-solicitation sharing that allows contractors to join the BPA at any point in time while the BPA is active. We completed extensive market research and promoted competition to the maximum extent and continue to invite new contractors to submit proposals.

Evaluation and Award Process

We continue to request help from all regions and program managers in a large variety of work areas to help us complete the evaluation process. Once a contractor receives enough passing evaluations, they are sent an award notification, added to the LMIR BPA website, and become eligible to receive Call Orders for the scopes of work and locations they indicated they were capable of providing. Our online website allows interested parties to filter the available BPA contractors by scope, state, and forest or grassland. Awardee names, award numbers, Unique Entity Identifier (UEI), and email addresses will populate. There is also a blank call order template on the website that can be modified to meet the needs of each project and agency.

Ordering Instructions

Programs can start utilizing the LMIR BPA by building their requisition package and completing the LMIR BPA Blank call order form located on the [LMIR BPA Website](#). The specifications and evaluation factors can be determined at the call order level following commercial services procedures.

Projects utilizing the LMIR BPA team will work directly with the team APSO to assist in building the solicitation. Other contracting groups may have different processes and procedures as far as support for building solicitations and assignments.

LAND MANAGEMENT INTEGRATED RESOURCES (LMIR) BPA Process & Ordering Instructions

The requisition will be assigned to the most appropriate contracting group based on the specifics of the project including funding, scope, location etc. All applicable fields should be filled in for a complete call order.

Once the call order package is complete, the request for quotes must be sent to the current awardee list at the time of the need. The LMIR BPA gives priority to small business set-asides. Request for quotes must be sent to all eligible contractors that selected the scope of work and location for the Call Order from the search results on the LMIR BPA Website tool. You are not required to send to any contractors that do not meet those two filters: scope and location. Using the selection feature on the website, an email can be generated which populates the blind carbon copy (bcc) field in your email with the contractors' email addresses; there is also an option to export it to an Excel file for your records. Please note the "mixed" business size contractors and add/delete from the email list based on your findings for their business size for the specified NAICS code of your call order. There is no specified length of time to solicit the RFQ, but 10-14 days is average with longer periods for more complex Call Orders.

The LMIR BPA was established using North American Industry Classification System (NAICS) code 115310: Support Activities for Forestry. NAICS codes can vary by Call Order and should be selected based on the scope of work. NAICS code may also impact a vendor's business size classification. Vendors with known mixed business sizes have been marked with an asterisk on the LMIR BPA website. Contractors classified as large business are located in a separate listing below the small/mixed business size contractors.

The business size must be marked or identified on the call order as a small business set-aside. If there are not adequate responses to the RFQ, it can then be sent out a second time as **Unrestricted** for large business size and marked accordingly on the call order.

Included with this information is a [LMIR BPA Call Order Template Download](#) that can be used if so desired (it is not a mandatory form, but creates a level of familiarity for our vendors. Some agencies have modified this document for their use of LMIR). An SF 1449 or SF 1442 may be used as the obligating document.

Each Contracting Officer (CO) or Purchasing Agent (PA) can add the provisions and clauses that are needed to further define the Statement of Work as long as they are not in conflict with the underlying parent BPA. Parent documents can be found on sam.gov at <https://sam.gov/opp/1e1dbb485706486c9aba63fab67f33e2/view> under "Attachments/Links".

Service Contract Act Wage Determination will be included in each BPA call, depending on the work activity. These wage determinations apply to all general category employees and does not apply to professional employees defined by the Department of Labor (DOL). The wage determination that is applicable to a specific BPA call will be based on location of performance and work activity.

Splitting of procurements will not be permitted (i.e. avoiding competition by keeping work under \$2000/\$2500 and awarding sole source). If there is reoccurring work to be performed, a single order competed amongst the contractors for the specific activity will be the standard method for accomplishing the work under this contract.

Review the general Safety Plan and if there are unique safety concerns for your project not identified in the basic contract. Include it in the BPA call and discuss/document at the BPA call post award meeting. The safety concerns should be included in the Contractor's Operating Plan submitted as part of their quote/proposal if required.

Government furnished property shall be identified and listed in each BPA call.

If necessary, during the evaluation of quotes/proposals the Government may contact a BPA holder with questions concerning their quote/proposal. Upon completion of evaluations, the CO will award a BPA call to the contractor whose quote/proposal is most advantageous to the Government. All calls must be finalized in writing and provided to the Contracting Officer with the appropriate signatures and agreed upon pricing for

**LAND MANAGEMENT INTEGRATED RESOURCES (LMIR) BPA
Process & Ordering Instructions**

stated pay items.

Unauthorized work – the Contractor is not authorized to commence performance prior to issuance of a signed BPA call order and Notice to Proceed or verbal approval by the CO to begin work.
