Wasatch-Cache National Forest

Revised Forest Plan (FEIS Alternative 7)

A scanned version of the U.S. Geological Survey (1970), 1:250,000 map is being used for location/reference information. It was not used in the analysis and does not represent Wasatch-Cache National Forest data.

The Forest Service uses the most current and complete data available. GIS data and product accuracy may vary. They may be developed from sources of differing accuracy, accurate only at certain scales, based on modeling or interpretation, incomplete while being created or revised, etc. Using GIS products for purposes other than those for which they were created, may yield inaccurate or misleading results. This information was released February 2003. The Forest Service reserves the right to correct, update, modify, or replace GIS products without notification.
