EVANSTON-MOUNTAIN VIEW RANGER DISTRICT*

**HESSIE LAKE – HENRYS FORK ALLOTMENT
2025 ANNUAL OPERATING INSTRUCTIONS**

These Annual Operating Instructions are made part of your term grazing permit consistent with Part 1, Item 3 and Part 2, Item 8(a).

Authorized sheep on the Hessie Lake – Henrys Fork Allotment the 2025 grazing season are as follows:

| Permittee | Authorized Number | Season of Use |
|------------------|--------------------------|----------------------|
| JRB LLC | 1400 ewe/lamb | 7/11 – 9/10 |

The following is the planned sequence of use for this year:

| Order | Unit | No. of Days | Planned Dates |
|-----------------|----------------------------|--------------------|----------------------|
| 1 st | Trail On | 4 | 7/11 – 7/14 |
| 2 nd | Unit 2b (Upper Flat Top) | 12 | 7/15 – 7/26 |
| 3 rd | Unit 2a (Lower Flat Top) | 5 | 7/27 – 7/31 |
| 4 th | Unit 3 (Hessie Lake) | 3 | 8/1 – 8/3 |
| 5 th | Unit 1 (Big Meadows) | 6 | 8/4 – 8/9 |
| 7 th | Unit 4 (Lower Henrys Fork) | 10 | 8/10 – 8/19 |
| 8 th | Unit 5 (Upper Henrys Fork) | 18 | 8/20 – 9/6 |
| 9 th | Trail Home | 4 | 9/7 – 9/10 |

DO NOT TRAIL THRU HESSIE LAKE DRAINAGE

Pass lightly thru the areas next to Henrys Fork Lake and Bear Lake.

Any changes in the sequence of use must be approved first. Please contact Aimee Cameron, the Rangeland Management Specialist at (307) 782-6555 work or (385) 238-0030 cell.

If a need arises to vary from the number of days by more than 3 days, prior approval must be given first.

Bed your sheep one night in one area only. Multiple days use of the same bed ground is prohibited.

All camps are to be kept clean at all times. Pack out all garbage off of the National Forest; this includes any garbage that may have been left from previous years.

All camps are to be located away from trails, lakes, and other high use recreational areas.

Please notify Aimee 3-5 days in advance as to when you plan to put your sheep on the allotment.

Please see the attached driveway trailing plan that gives details where the sheep are to overnight and noon along the Black Fork Driveway. The Hessie Lake – Henrys Fork herd is scheduled to overnight in pasture No. 11, and then to noon in Pasture No. 21, and then to overnight in Pasture 22 at dark. **When the sheep trail into Red Castle drainage, do not use the main horse trail route. Instead trail the sheep in a contour fashion to the east of the main trail where they can gently drop down into the drainage. Also, when the sheep top out at the head of Hessie Lake drainage, do not trail sheep down into the drainage, but trail them to the south across Flat Top.**

The driveway pasture fences are to be maintained 14 days prior to your scheduled on date.

An allotment map is enclosed; this map shows the allotment boundary, unit boundaries, and use dates. Please review it and make sure your herder understands the grazing plan well.

You are responsible for proper utilization of the forage by your sheep. Allowable utilization and ground cover standards are described on the attachment. If inspections reveal areas of over utilization or riparian damage, corrective action will be expected (which may mean taking your sheep home early) and action may be taken against your permit. You are instructed to graze your sheep in a manner to minimize soil disturbance.

Equal utilization of the range is the objective. This requires herding and salting be properly conducted throughout the entire grazing season. **Rotate your salting areas during the grazing season and from year to year.** Place your salt in good forage producing areas where the sheep do not go by preference. Do not place your salt next to water, roads, trails, or in open meadows.

Every effort must be taken to completely remove sheep off the National Forest by the scheduled off date.

If there have been approved changes complete the actual use report and return it by November 30. If you have any questions or comments, please contact Aimee. Thanks for your cooperation in managing this allotment.

Signature: _____ Date: _____

(Permittee: JRB LLC)

Comments: (Included needed range improvements; improvements maintained or visited; new noxious weeds locations; and ect.)

Percent utilization of key grass or grass like vegetation, by vegetation type, for rangelands in satisfactory condition.

| Vegetation Type | Condition | Percent Utilization Key Grass or Grass like |
|--------------------------|--------------|---------------------------------------------|
| Upland and Aspen | Satisfactory | 50 |
| Crested Wheatgrass | Satisfactory | 60 |
| Riparian* Class I | Satisfactory | 50 |
| Riparian* Class II & III | Satisfactory | 60 |

*Riparian, away from greenline

Maximum forage utilization standards (stubble height) for low to mid elevation *greenline* species in Class I, II, and III riparian areas in satisfactory condition are as follows: (Key species being grazed include water sedge, Nebraska sedge, and and/or wooly sedge.)

Greenline stubble height at the end of the growing season, by riparian class, for rangeland satisfactory condition.

| Riparian Class | Condition | Greenline Stubble Height at End of Growing Season |
|--------------------|--------------|---------------------------------------------------|
| Riparian Class I | Satisfactory | No Less Than 5" |
| Riparian Class II | Satisfactory | No Less Than 4" |
| Riparian Class III | Satisfactory | No Less Than 3" |

For all rangelands, including big game winter range and riparian areas, no more than 50% of the current year's growth on woody vegetation to be browsed during one growth cycle (i.e., when use has reached 50% no additional livestock use).

As a tool to achieve rehabilitation of upland, aspen, and riparian communities away from the greenline that are not meeting or moving toward objectives (i.e. in unsatisfactory condition), maximum allowed forage utilization is 30-40 percent.

Livestock management activities to result in no less than 85% of potential ground cover for each vegetation cover type.

Driveway Trailing Plan 2025

| PERMITTEE | ALLOTMENT & FOREST | PASTURE ASSIGNMENT | | | | | | | | | | |
|--------------------|-------------------------------------------------|--------------------|----|----|----|----|----|----|----|----|-------------------|-------------------|
| | | 9 | 11 | 12 | 13 | 15 | 16 | 20 | 21 | 22 | 10 South Big Mdw. | 10 North Big Mdw. |

O = over night

N = noon

OD = overnight at dark

All permittees are responsible to maintain the pasture fences associated with the pasture they will be using. Maintenance on these fences must be done 2 weeks prior to entering the driveway on the National Forest.

The same pastures that were used trailing on are to be used by the same permittee when trailing off.
