

**2026 ANNUAL OPERATING INSTRUCTIONS
FOR THE
WEBER RIVER C&H ALLOTMENT**

These Annual Operating Instructions are a guide for grazing management on the Weber River Allotment for this grazing season. This AOI is made part of your grazing permit consistent with Part 1, item 3 and Part 2, Item 8(a). Refer to Part 2 of your grazing permit for other general terms and conditions.

PERMITTED/AUTHORIZED USE:

Permittee	Cow No.	Season
Kent Leavitt	66	21 Jun to 30 Sept
Tyler Page	68	21 Jun to 30 Sept
Wendell Stembridge	52	21 Jun to 30 Sept
Total	186	

GRAZING ROTATION:

	UNIT NAME
1 st	Nix-Nobletts, Smithmore House
2 nd	Upper Red Pine, Box Canyon, Mud Flat, Mill Flat & Shingle
3 rd	Lower Red Pine & Bear Hollow
4 th	Erickson Basin, Hell’s Kitchen

On and off date and the rotation sequence is to be followed unless the Heber-Kamas District Ranger authorizes a change in writing. Time spent in each pasture may vary depending on weather and when standards are met. It is the permittee’s responsibility to monitor the use and move the cattle before standards are exceeded.

A range technician will regularly visit the allotment throughout the summer to monitor permit compliance, forage utilization, and range improvements. Compliance of allowable use standards will be fully enforced. If compliance is not met, permittees will be sent notices of non-compliance and associated requirements to address the violation(s).

Grazing fees are at \$1.69/cow-calf this year. Fees must be paid through Lockbox collection, at the Heber-Kamas District Office or online at <https://www.fs.usda.gov/working-with-us/billpay> before livestock will be authorized to enter the National Forest.

ANNUAL OPERATING PLAN MEETING:

The annual operating meeting was held on March 18, 2026, at the Kamas Ranger Station. Those in attendance were Cameron Page, Kent Leavitt, and Amber Helmus.

The following items were discussed:

1. Drought conditions were discussed about the upcoming grazing season. Several options such as early on, livestock numbers and early off dates were discussed. The Permittee and Forest Service will discuss any changes to those proposed options closer to the permitted-on date. If possible, the permittee was advised to consider taking less numbers for this grazing season to help alleviate grazing pressure on the allotment.
2. Ledgefork Campground fence needs to be replaced. Permittees completed have of the fence last summer and plan to finish the rest this year. A 4ft gate is needed along the trail.
3. South Fork Cattleguard on Road #031 needs replaced. Amber is working with the District Ranger.
4. Permittees mentioned that water trough (12ft x 4ft) in White Pine needs replaced. Contact Amber for materials.
5. Permittees mentioned that a boundary fence along private and forest needs to be considered. Approximately 1 mile of fence. Also, forest boundary signs along the boundary would be helpful.
6. Permittees mentioned that they need a cattleguard in Nobletts.

STANDARDS:

Maximum utilization standards for vegetation types in satisfactory condition as outlined in the following table.

Vegetation Type	Condition	Percent Utilization Key Grass
Upland and Aspen	Satisfactory	50
Crested Wheatgrass	Satisfactory	60
Riparian Class I	Satisfactory	50
Riparian Classes II and III	Satisfactory	60

The utilization standard is 40% in key riparian areas except Shingle Creek for which the standard is 30% and the confluence area and upper stem of the North Fork for which the standard is 30%. Once the utilization standard has been reached on the key riparian area, it will be considered that the utilization standard has been met for the grazing area regardless of the amount of use in adjoining upland areas.

If the utilization standard is reached on key riparian areas in the high country units prior to Labor Day, the cattle will be removed from the allotment. If the utilization standard for key riparian areas in the high country units is reached after Labor day, the cattle will

be allowed to use the Mirror Lake highway Unit until the end of the grazing season of until the 40% utilization standard is reached.

Maximum utilization standards for low to mid elevation greenline species in value class I, II, and III riparian areas in satisfactory condition.

Riparian Value Class I	Condition	Stubble height at end of growing season
Riparian Value Class I	Satisfactory	5-6 inches
Riparian Value Class II	Satisfactory	4-5 inches
Riparian Value Class III	Satisfactory	3-4 inches

Ground cover is to be 85% or potential

Vegetation Type	% Ground Cover Range at Potential	85% of potential ground cover
Silver Sagebrush	89 - 96	76 to 82
Mountain sagebrush	81 -96	69 – 82
Low Sagebrush	69	59
Snowberry	92	78
Aspen	90 – 98	77 – 83
Alpine grassland	97 – 100	82 – 85
Tall Forb	49 – 75	42 – 64
Oak brush	92 - 100	78 – 85

MAINTENANCE OF RANGE IMPROVEMENTS:

The permittee is responsible for all improvements assigned in the term grazing permits and listed in these operating instructions (see attached map). Maintenance shall mean the timely repair of management facilities to a condition adequate to perpetuate the life of the facility and to serve the purpose intended. All improvements will be maintained to the standard for which they were constructed. Maintenance includes permittee responsibility for furnishing the materials needed for repairs.

All range improvements must be maintained before whichever of the following comes first, the turning of livestock into the pasture or before the improvement is needed for the management of livestock on adjacent allotments. It is the responsibility of the permittee to talk to permittees of adjacent allotments to find out when livestock are moving into nearby pastures so improvements can be maintained in a timely manner.

The permittee is to notify the Heber-Kamas District 30 days in advance of doing any pond cleaning. This time period will be used to check for heritage resources and Threatened and Endangered species.

MAPS AND RECORDS:

1. Enclosed are allotment maps with pasture boundaries, allotment pastures and improvement locations.
2. The permittee is required to complete an "actual use" form, which is attached and includes space to record livestock losses, on and off dates, pasture rotation dates and the permittee's maintenance costs. This form is to be returned to the Heber-Kamas Ranger District by November 31 of this year.
3. The deadline for applying for credit for unused portion of grazing fees is December 31 of this calendar year. Credit will only be given for time not used due to a request by the Forest Service. Time not used due to the discretion of the permittee is not subject to reimbursement or credit on next year's billing.

SPECIAL MANAGEMENT:

All hay and straw transported onto the Forest must be certified weed free and have a certification tag. Noncompliance with this closure order will result in a citation.

Please notify the Heber-Kamas Ranger District immediately if unauthorized livestock use occurs on the allotment.

The permittee is to notify the Heber-Kamas Ranger District 5 days in advance when livestock are going to be put on or taken off the Forest. Cattle are not to enter the Forest until Forest Service personnel have counted the herd. It is the responsibility of the permittee to make arrangements in advance for Forest Service personnel to count the cattle before they enter the Forest. The arrangements for counting cattle on must be agreed to and finalized with Amber Helmus or Daniel Jauregui.

Careful attention to herding is required on the allotment to control cattle in and scattered throughout the area scheduled for use. Herding should be in such a manner that the riparian areas are grazed in conjunction with the upland so that utilization is somewhat uniform throughout the pasture. Cattle are to be moved out of the pasture before standards are exceeded. Once cattle are removed from a pasture they are not be allowed to return to that pasture. If use in the pastures designated for grazing are met or exceeded before the end of the grazing season cattle are to be removed from Forest Service administered land.

Grazing of riparian areas should be incidental to watering of livestock.

Salt should be placed at least 200 yards from water sources and riparian areas so that cattle do not spend excessive time near water.

Enclosed is a letter that will be used as your camping permit to be placed in your camp while taking care of livestock and improvements on your grazing allotment. Camps and all vehicles are to be kept within 150 feet of established Forest Service roads.

Amber Helmus, Rangeland Management Specialist or Daniel Jauregui, Heber-Kamas District Ranger are to be contacted prior to any deviation from the Annual Operation Instructions.
