

TREES ARE AMAZING: All trees are different if you look closely.
Repeat this activity as many times as you would like.

1. **Draw a tree from memory.**

2. **Now find a tree.** Is there a tree you can see from your window? In your backyard? On your block? Maybe you have a picture of a tree?

3. **Does it have one trunk or does it split into many?**

4. **What does the bark look like?**

Shaggy

Smooth

Scaly

5. **What kind of leaves does it have?**

Broadleaves

Needles

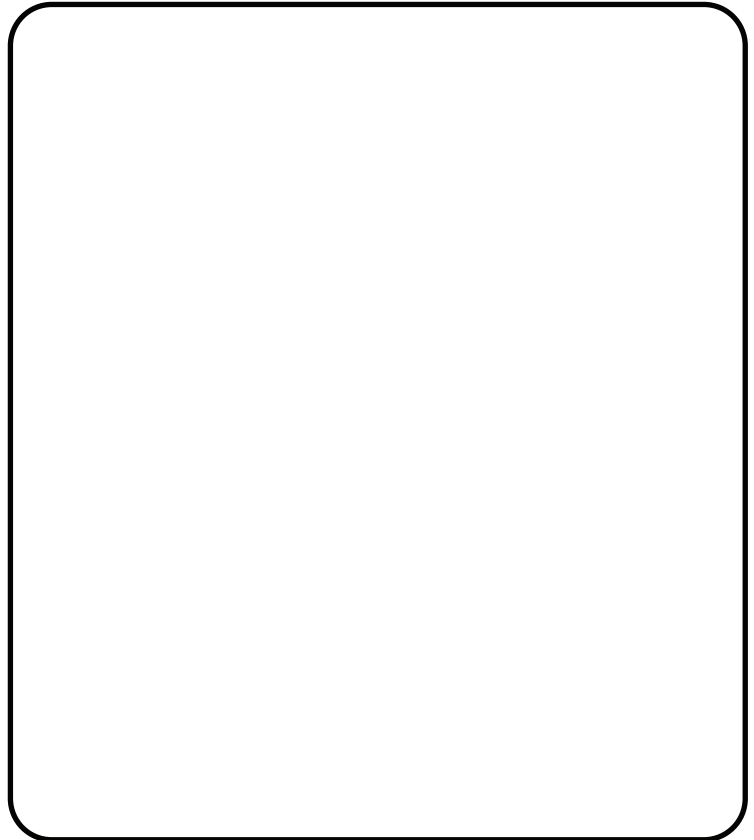

Scales

6. **How are animals using the tree?**

Nesting? Feeding? Resting?

What kind of evidence do you see?

7. **Draw your tree.**

8. How does your tree look **similar** or **different** from the first tree you drew from memory?

THANK YOU, TREES!

Trees provide jobs; food; and wood for building materials, heating and cultural uses. Trees clean our air and water. They create habitat for people and wildlife.

MAKE A BARK RUBBING

1. Unwrap a crayon.
2. Put a piece of paper on a tree trunk.
3. Use the side of a crayon and rub it against the piece of paper.
