Hoback	●	●	●	●	●	●

- Highways and utilities

How much should the rivers adjust to the needs of the highways? What can highway and utility lines do to minimize their impacts?

- Non-recreation special uses

Do you foresee any need for additional protections with possible permits, easements, rights-of-way?

- Vegetation and habitat management

Under what conditions should the FS allow habitat projects, both on land or in the water?

- Recreation Use

Would you expect anywhere else in the Headwaters to attract the same level of recreation interest that the Snake Canyon gets?

- Land and facility development

Are there places in the Hoback where additional recreation sites could be developed? Are there specific issues the county and the FS could work on together?

Outstanding River Values

Rivers	Recreational	Scenic	Ecological/ Wildlife	Fisheries	Cultural	Geologic
Pacific Creek (lower)	●		●	●		●
Buffalo Fork (lower)	●	●	●	●		●
Blackrock Creek	●	●	●	●	●	
Gros Ventre (lower)	●	●	●	●	●	●
Crystal (lower)	●	●	●	●		●
Granite	●	●	●	●		●

Recreation Use

- At what point would the amount of boating use affect your ability to enjoy the river? Is the current amount and kinds of use acceptable?
- How many anglers are acceptable at one time along a river stretch?
- Is there a need for more, less or improved access? Where?
- What guided public services are needed for river use in the future?
- Is there a need to change how camping is managed?

Vegetation/Habitat Management

- What should be done to prevent the introduction and spread of aquatic invasive species and noxious weeds?
- What criteria would you suggest for habitat treatment projects, fuel reduction, or wildfire events?
- How far should the Forest Service go in responding to river blockages from floating logs/woody debris?

Non-recreation special uses

- What criteria would you suggest for non-recreation special uses such as communication sites or gravel pits?
- What are the issues and opportunities associated with filming?

Highways and Utilities

- What guidelines are needed for road maintenance and reconstruction? How about for utility projects or for landslide events?
- Is there a need for change in how primitive Forest spur roads are managed?

Land and facility development

- What are the issues and opportunities associated with facility development, e.g. Forest resorts, organizational camps, administrative sites?

- Vegetation and habitat management
Outside Wilderness, what guidelines are needed for fuel or habitat treatment projects or wildfire events?
- Recreation Use
At what point would amount of recreation use be too much to retain the 'wild' feel outside wilderness?
What value do you see with allowing mountain bike along a wild stream outside designated Wilderness?
