Title: ProposedTreatments_Alt2

Geospatial_Data_Presentation_Form: vector digital data

Description:

Abstract:

Proposed treatments described in alternative 2 of the Rim Country project were assigned at the stand and/or ecological response unit level based on the best available data source. Existing forest types were based on stand level data, ecological response unit boundaries, and/or interpretation of remotely sensed data (aerial photography, high resolution satellite imagery, and lidar).

Purpose:

This data displays the proposed treatments described in alternative 2 of the Rim Country project.
