# Interest Request

The table below is an optional template to help you organize your response; however, we highly encourage you to use this format. These tables outline the minimum information we need to make informed decisions for the Forest. You may submit information for more than one activity type, and additional pages may be added if needed. If you plan to offer services in multiple districts, please complete a separate table for each one. Be sure to review the map when considering where services would occur.

The text shown in blue within the tables represents sample responses. These examples are provided only for reference. Please enter your actual request in the blank rows. The forest will not review or consider the sample responses.

A service day counts as any full or partial day that you provide services to a client on National Forest land. For example, a half-day trip with 8 clients equals 8 service days, and a 3-day trip with 3 clients equals 9 service days (3 clients × 3 days).

**Respondents should list a realistic number of service days that they would expect to use on an annual basis;** respondents are encouraged to consider variability of conditions within each season and from year to year when making internal assessments.
