Not all motorized routes have trail heads and those that do may range from primitive to developed.</p>

BLANKET STATEMENTS FOR TRAVEL MANAGEMENT

- In areas along designated motor vehicle routes where general dispersed camping with motor vehicles is not allowed, a small number of designated dispersed campsites have been marked on-the-ground. In these designated dispersed camp sites, the access road to the site and the site itself are only open to motor vehicles during the same season of use indicated for the adjacent road or trail.
- There are numerous short designated motor vehicle routes around the forest that are sometimes too small to display. These routes are signed on the ground with route numbers. If they are too small to display on the MVUM, they are not referenced on the route table. The seasonal restriction for the short spurs are the same as its adjacent primary access route.
- On the Custer Gallatin National Forest, designated motorized TRAILS open to wheeled vehicles less than 50 inches in width, are ONLY open to OHVs and MOTORCYCLES that meet the following criteria:
 - OHVs are defined as: motorized, wheeled trail vehicles that are less than 50 inches in width at the widest point on the vehicle.
 - Motorcycles are defined as: motorized, wheeled trail vehicles that are less than 50 inches in width at the widest point on the vehicle, with a maximum of two wheels in-line with the direction of travel.
