Mill Capacity and Utilization Survey, CY 2012

During the summer of 2013, mill production capacity and utilization information was gathered directly from major producers in southeast Alaska. Mills to be surveyed, data to be collected, and survey forms developed by the Forest Service Alaska Region and the PNW Research Station for use in previous survey years were used for the CY 2012 survey. Sampling was conducted on-site in most cases with the remainder conducted via telephone interviews.

Originally, the twenty largest and/or most active sawmills were included in the survey, which began in 2001 (for CY 2000). In 2007 the 20 original mills became 22 with the partial subdivision and sale of one mill. Of those 22 mills, **ten** were active in 2012, **two** were idle, and **ten** had been decommissioned or were no longer in production (i.e., “uninstalled”).

Active Mills (10): Icy Straits Lumber & Milling, Viking Lumber Co., D&L Woodworks, Good Faith Lumber Co. LLC (formerly Thorne Bay Wood Products), Thuja Plicata Lumber, Porter Lumber, St. Nick Forest Products (formerly W.R. Jones & Son Lumber Co.), The Mill Inc., Falls Creek Forest Products (formerly Southeast Alaska Wood Products), and Western Gold Cedar Products. (WGCP was part of the partial subdivision and sale of Northern Star Cedar)

Idle Mills (2): Northern Star Cedar and Thorne Bay Enterprises (TBE was part of the partial subdivision and sale of Northern Star Cedar.)

Uninstalled Mills (10): Ketchikan Renaissance Group (formerly Gateway Forest Products (veneer)), Gateway Forest Products (lumber), Herring Bay Lumber, Alaska Fibre, Annette Island Sawmill (formerly KPC Hemlock mill), Metlakatla Forest Products, Kasaan Mountain Logging and Lumber, Silver Bay, Inc., Pacific Log and Lumber and Chilkoot Lumber Co.

For the purposes of this report, “total installed capacity” includes the capacity of the ten active mills and the two idle mills. For CY 2012, that capacity stood at **120,400 MBF**. Total installed capacity in CY 2012 decreased by 39,600 MBF board feet from CY 2011, which reflects the decommissioning of Pacific Log and Lumber in Ketchikan.

Mill production in CY 2012 amounted to approximately **13,842 MBF**, an increase of 2,296 MBF from CY 2011. Eight mills reported higher production in CY 2012 totaling approximately 2,316.5 MBF and one mill reported decreased production totaling approximately 20.5 MBF. One mill reported the same production in both CY2011 and CY2012. Percent mill utilization, based on total installed capacity of **120,400 MBF** amounted to **11.5%**. This is a significant increase from 2011, and is the product of *both* decreased installed capacity *and* increased production.

Mill employment in CY 2012 amounted to **58 FTE** including owner-operators; a 4% increase from CY 2011.

A comparison of survey results from CY 2000 through CY 2012 is presented in Table 1.

Footnotes for Table 3:

1 Estimated Mill Capacity: an estimate of the processing capability of the mill based on the amount of net sawlog volume (Scribner log scale) that could be utilized by the mill, as currently configured, during a standard 250-day per year, two shifts per day, annual operating schedule, not limited by availability of employment, raw materials or market.

2 Estimated Mill Production: the net sawlog volume (Scribner log scale) that received primary manufacture during the calendar year. This is the estimated net sawlog volume used during the year to manufacture sawn products.

Non-sawn products, such as chips or firewood that result from processing sawmill residues and by-products are not included in this category.
