IRA, Inventoried Roadless Areas

Summary

Inventoried Roadless Areas for use in Forest Plan and project analysis. This layer was used in developing management direction and MA allocations for the 2015 Forest Plan.

Description

The Kootenai National Forest Inventoried Roadless Area (IRA) layer is the result of the 1999 re-evaluation of IRAs using the 1996 Regional protocol for Roadless Area Inventory, and was generated at a scale of 1:24,000 for the forest. This layer matches the 2001 Roadless Area Conservation Rule.

Credits

11/23/14 Removed PV from within IRAs. NO CHANGES TO IRA BOUNDARIES. 1/9/14 Slight pvt nudging in sw of #671 and small pvt addition in north of #676 (12 acres). Update Arc_Acres (integer) with GISAcres (floating). Only rounding and additional pvt acres for pvt change in distribution and total acres (1 acre difference). NO CHANGES TO IRA BOUNDARIES. 2/14/2007 Change made to update private ownership boundary shift T27N R31W SEC 15 (Montanore).

Use limitations

The boundary information was generated from electronic data files which were digitally scanned and hand digitized from information compiled at 1:24000 scale. The data in this coverage is based on the accuracy and precision of the 1:24,000 quad maps, which were used to generate or rectify the base map. The information on this coverage is subject to revision as field data and technical processes improve.
