

Table of Contents

B.....	B-1
FRAMEWORK OF THE PLANNING PROCESS	B-1
INVENTORY DATA AND INFORMATION COLLECTION	B-4
Timber Suitability Analysis	B-5
Display of Timber Suitability in the EIS	B-11
Forest Planning Model - SPECTRUM	B-14
Total Sale Program Quantity	B-39
Analysis of Rangeland Capability and Suitability for Livestock Grazing	B-42
Economic Impact Analysis	B-56
Recreation Analysis	B-61
Roadless Inventory	B-77
Fire Regime and Condition Class Analysis	B-80
Fire Hazard and Risk Analysis	B-85
Water Yield Analysis	B-101
Biological Diversity Analysis	B-113
Insect and Disease Existing Occurrence Analysis	B-130
Insect Risk Analysis	B-130
REFERENCES CITED	B-135

List of Tables

Table B-1. Final summary of lands suited for timber production in GIS acres by alternative.....	B-12
Table B-2. Post modeling reduction of ASQ for goshawk and small diameter estimates.....	B-16
Table B-3. Spectrum land stratification.....	B-18
Table B-4. Prefixes used for modeling.....	B-22
Table B-5. Spectrum management prescriptions.....	B-23
Table B-6. Timber prescription options.....	B-23
Table B-7. Summary of activity costs.....	B-26
Table B-8. Summary of outputs and revenues.....	B-27
Table B-9. SPECTRUM sensitivity comparison.....	B-38
Table B-10. Average annual total sale program quantity for first decade (MMBF)....	B-39
Table B-11. Anticipated sawtimber harvest levels by alternative.....	B-39
Table B-12. POL volume anticipated as part of sawtimber harvest in first decade....	B-40
Table B-13. Annual timber removal as part of fuel treatments in the first decade.....	B-41
Table B-14. POL harvest from non-fuels vegetation treatments.....	B-41
Table B-15. Total timber removed by alternative in decade 1, annual average, MMBF.....	B-41
Table B-16. Acres of land determined as capable for livestock use.....	B-48
Table B-17. Acres of land determined as suitable for livestock use.....	B-49
