OPPORTUNITY TO COMMENT ON BLACK HILLS RESILIENT LANDSCAPES PROJECT DEIS

The Forest Service, Black Hills National Forest, has prepared a Draft Environmental Impact Statement (DEIS) for the Black Hills Resilient Landscapes (BHRL) Project.

The purpose of the BHRL Project is to move landscape-level vegetation conditions in the project area toward objectives set by the Black Hills National Forest Land and Resource Management Plan, as amended, in order to increase ecosystem resilience to insect infestation and other natural disturbances, contribute to public safety and the local economy, and reduce risk of wildfire to landscapes and communities.

Proposed activities include reduction of hazardous fuels, prescribed burning, enhancement of hardwoods and grasslands, timber harvest, non-commercial thinning, and associated actions. The project area includes most of the Black Hills National Forest in South Dakota and Wyoming.

The DEIS is available electronically at <http://tinyurl.com/BHRLProject>. Paper copies are available on request and at Black Hills National Forest offices in Custer, Rapid City, and Spearfish, South Dakota, and Sundance and Newcastle, Wyoming.

Since the initial scoping for this project in 2016, a proposed Forest Plan Amendment has been added to the project to ensure Forest Plan consistency with Watershed Conservation Practices (WCP) handbook direction (FSH 2509.25 914.2) and to realign conflicting guidelines. The proposed amendment replaces an older, existing Forest Plan guideline with the new language in the WCP handbook. This amendment would not have any significant effects, nor would there be adverse effects related to the substantive requirements found at 36 CFR 219.8 through 219.11.

The Environmental Protection Agency published a Notice of Availability (NOA) for the DEIS in the Federal Register on September 15, 2017. The opportunity to comment ends 45 days following the date of publication of the NOA. The analysis within the BHRL Project DEIS and the associated programmatic plan amendment
