Comments:

Dear Supervisor Van Every,

- 1 Western Watersheds Project is concerned that the level of logging and other vegetation treatments proposed in the Black Hills Resilient Landscapes Project are excessive, may threaten watershed health and stream system function, and may not address the goals of mitigating the prospect of large-scale forest fires. We are also concerned about the likelihood of increasing noxious weed problems with the proposed action.
- 2 We only recently learned about this project, and support a 15-day extension of the comment period.

Respectfully yours,

Erik Molvar
Executive Director
Western Watersheds Project
