

Minerals EA Summary

The Idaho Panhandle National Forests Minerals and Geology Program performed queries with the LR2000 program that is operated by the Bureau of Land Management to identify potential claimants in the analysis area. The Program also queries, with our local Forest databases, to identify potential mineral operations that would be impacted by activities identified in this Environmental Analysis. No minerals activities were identified in the project area. The project area did not contain any unpatented or patented mineral claims that would be impacted by the proposed action. No Abandoned Mine Land features were identified within the analysis area.
