Please leave our public lands alone!

In our opinion...any so-called "management" always leads to devastation to what once was a "natural", beautiful forest setting.

Let nature do the managing because it does it better than man could ever do it.

Leave these lands alone for all of us to enjoy in its "natural" state.

Aren't there enough clear-cuts? Hasn't there been enough money sucked from our forests? When's enough, enough?!?

If this keeps going on, no one will remember what "natural" really is anymore.

I would hope that you will give our concerns some validity. Because we enjoy and recreate in these forests on a regular basis, we should always have first say in anything that is done to them. Public opinion should be weighed heavily on these issues.

We hope that you take this into serious consideration. If not, you only leave us feeling that our concerns are falling on deaf ears.....

Best Regards,
Kevin Brown
