Discover Bitterroot National Forest
Published by Tod McKay [?] · September 13, 2019 ·

We are currently accepting public comments on the proposed Piquett Creek Project on the West Fork Ranger District. The project is located five miles SW of Connor and includes 5,800 acres within the upper Piquett Creek and West Fork Bitterroot River-Lloyd Creek watersheds.

The purpose of the project is to Improve landscape resilience to disturbances (such as fire, insects and diseases) by diversifying forest structure and composition, and reducing fuels.

Treatments could include commercial timber harvests, non-commercial thinning, road maintenance, and prescribed burning to improve forest health, reduce crown fire hazard potential in the Wildland-Urban Interface, and manage timber to provide forest products, jobs, and income to local communities.

Comments are due by October 11, 2019. For more information and to see maps of the project area visit <https://www.fs.usda.gov/project/?project=56774> or call the West Fork Ranger District at 406-821-3269.
