**Subject:** Lake Como Trail project

To whom it may concern,

I'm writing in support of the Forest Service's proposed addition of 15 miles of mountain bike (non-motorized) trails to the south Lake Como area. In addition, I would hope the new trails would also exclude e-bikes from their use. The Bitterroot valley, especially in the Hamilton, Darby area, is lacking in mountain bike specific trails and this will help minimize other mountain bike – hiker – horseback riding conflicts. I would like to see the majority of the new trails be in single-track given lack of current options.

Thank you for taking my comments into consideration. I look forward to being a supporter of the trails in the future.
