

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2003-0041 FRL-9781-2]

Proposed Information Collection Request; Comment Request; RadNet (Renewal)**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), "RadNet (Renewal)" (EPA ICR No. 0877.11, OMB Control No. 2060-0015) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through July 31, 2013. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before April 16, 2013.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA-HQ-OAR-2003-0041 referencing the Docket ID numbers provided for each item in the text, online using www.regulations.gov (our preferred method), by email to a-and-r-Docket and Information Center, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Charles M. Petko, Office of Radiation and Indoor Air (ORIA), National Air and Radiation Environmental Laboratory (NAREL), 540 South Morris Avenue, Montgomery, Alabama 36115-2601. Tel: 334-270-3411; fax number: 334-270-3454; email address: petko.charles@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public

docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: RadNet is a national network of stations collecting sampling media that include air, precipitation, drinking water, and milk. Samples are sent to EPA's National Air and Radiation Environmental Laboratory (NAREL) in Montgomery, Alabama, where they are analyzed for radioactivity. RadNet provides emergency response/homeland security and ambient monitoring information on levels of environmental radiation across the nation. All stations, usually operated by state and local personnel, participate in RadNet voluntarily. Station operators complete information forms that accompany the samples. The forms request descriptive information pertaining to sample location, e.g., sample type, sample location, length of sampling period, and volume represented.

Form Numbers: 5900-23, 5900-24, 5900-25, 5900-26, 5900-27, 5900-28, 5900-29, 5900-30, 5900-31.

Respondents/affected entities: Volunteer collectors of milk, air,

precipitation, and drinking water samples to support EPA's national environmental radiation monitoring network known as RadNet.

Respondent's obligation to respond: voluntary.

Estimated number of respondents: 275 (total).

Frequency of response: Frequency varies according to medium being sampled: milk, quarterly; drinking water, quarterly; rain (precipitation), as events occur; and air, twice weekly.

Total estimated burden: 9,333 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$480,073 in labor costs and no capital or O&M.

Changes in Estimates: There is an anticipated decrease in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease will result from the installation of new air monitors, which require less time from the station operators. Specific estimates of decreased burden are in progress. The new equipment was installed as a result of EPA's decision to upgrade existing air monitoring equipment.

Dated: February 5, 2013.

John Griggs,

Director, National Analytical Radiation Environmental Laboratory, EPA Office of Radiation and Indoor Air.

Integrated Science Assessment for Ozone and Related Photochemical Oxidants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The EPA is announcing the availability of a final document titled, “Integrated Science Assessment for Ozone and Related Photochemical Oxidants” (EPA/600/R-10/076F). The document was prepared by the National Center for Environmental Assessment within EPA’s Office of Research and

Development as part of the review of the national ambient air quality standards (NAAQS) for ozone.

DATES: The document will be available on February 15, 2013.

ADDRESSES: The “Integrated Science Assessment for Ozone and Related Photochemical Oxidants” will be made available primarily through the Internet on the National Center for Environmental Assessment’s home page under the Recent Additions and Publications menus at <http://www.epa.gov/ncea>. A limited number of CD-ROM or paper copies will be available. Contact Ms. Marieka Boyd by phone (919-541-0031), fax (919-541-5078), or email (boyd.marieka@epa.gov) to request either of these, and please provide your name, your mailing address, and the document title, “Integrated Science Assessment for Ozone and Related Photochemical Oxidants” (EPA/600/R-10/076F) to facilitate processing of your request.

FOR FURTHER INFORMATION CONTACT: For technical information, contact Dr. James Brown, NCEA; telephone: 919-541-0765; facsimile: 919-541-1818; or email: Brown.James@epa.gov.

SUPPLEMENTARY INFORMATION:

Background

Section 108(a) of the Clean Air Act directs the Administrator to identify certain pollutants which, among other things, “cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare” and to issue air quality criteria for them. These air quality criteria are to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air * * *.” Under section 109 of the Act, EPA is then to establish NAAQS for each pollutant for which EPA has issued criteria. Section 109(d) of the Act subsequently requires periodic review and, if appropriate, revision of existing air quality criteria to reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. EPA is also to periodically review and, if appropriate, revise the NAAQS, based on the revised air quality criteria.

Ozone (O₃) is one of six principal (or “criteria”) pollutants for which EPA has established NAAQS. Periodically, EPA reviews the scientific basis for these standards by preparing an Integrated Science Assessment (ISA) (formerly called an Air Quality Criteria Document). The ISA provides a concise

review, synthesis, and evaluation of the most policy-relevant science to serve as a scientific foundation for the review of the NAAQS. The Clean Air Scientific Advisory Committee (CASAC), an independent science advisory committee whose existence and whose review and advisory functions are mandated by Section 109(d)(2) of the Clean Air Act, is charged (among other things) with independent scientific review of EPA’s air quality criteria.

On September 29, 2008 (73 FR 56581), EPA formally initiated its current review of the air quality criteria for ozone, requesting the submission of recent scientific information on specified topics. A draft of EPA’s “Integrated Review Plan for the Ozone National Ambient Air Quality Standards Review” (EPA/452/P-09/001) was made available in September 2009 for public comment and was discussed by the CASAC Ozone Review Panel (CASAC panel) via a publicly accessible teleconference consultation on November 13, 2009 (74 FR 54562). In August 2010, EPA held a workshop to discuss, with invited scientific experts, initial draft materials prepared in the development of the ISA (75 FR 42085). The first external review draft ISA for Ozone and Related Photochemical Oxidants was released on March 4, 2011 (<http://cfpub.epa.gov/ncea/isa/recordisplay.cfm?deid=217463>). The CASAC panel met at a public meeting on May 19, 2011, to review the draft ISA (76 FR 23809). Subsequently, on August 10, 2011, the CASAC panel provided a consensus letter for their review to the Administrator of the EPA ([http://yosemite.epa.gov/sab/sabproduct.nsf/4620a620d0120f93852572410080d786/45A59F1BC8912FEE852578E80066021C/\\$File/EPA-CASAC-11-009-unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/4620a620d0120f93852572410080d786/45A59F1BC8912FEE852578E80066021C/$File/EPA-CASAC-11-009-unsigned.pdf)). The second external review draft ISA for Ozone and Related Photochemical Oxidants was released on September 30, 2011 (<http://cfpub.epa.gov/ncea/isa/recordisplay.cfm?deid=226363>). The CASAC panel met at a public meeting on January 9, 2012, to review the draft ISA (76 FR 76725). Subsequently, on March 13, 2012, the CASAC panel provided a consensus letter for their review to the Administrator of the EPA ([http://yosemite.epa.gov/sab/sabproduct.nsf/4620a620d0120f93852572410080d786/1336B2B88034AEB6852579C0007070CA/\\$File/EPA-CASAC-12-004-unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/4620a620d0120f93852572410080d786/1336B2B88034AEB6852579C0007070CA/$File/EPA-CASAC-12-004-unsigned.pdf)).

The third external review draft ISA for Ozone and Related Photochemical Oxidants was released on June 19, 2012 (<http://cfpub.epa.gov/ncea/isa/recordisplay.cfm?deid=242490>). The CASAC panel met at a public meeting
