The website directs comments to you so here goes. I strongly support the proposed action outlined at the open house. After two seasons collecting data in the Middle Fork, I am concerned about the existing conditions being right for another Grays Creek like fire event. I also strongly support the efforts to do some harvest in RCAs while maintaining the function of an RCA. We harvested in what is now called an RCA in the 1970s with good results.

Please keep me informed.

Regards,

Dick.
