Family Forest (10+ Acres) Ownership Characteristics | 2018

NORTHEASTERN UNITED STATES

Data in this report come primarily from the USDA Forest Service, National Woodland Owner Survey (NWOS). The NWOS is implemented by the Forest Inventory and Analysis program to answer questions related to who owns the forests, why they own it, what they have done with it in the past, and what they intend to do with it in the future. The family forest ownership results are based on a random sample of 1583 family forest ownerships from the Northeastern United States (CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, WV) who participated in the NWOS in 2017 and 2018. The sampling errors provided below are important for assessing the reliability of the estimates. Additional results from the NWOS are available in USFS General Technical Report NRS-199 and can be accessed via the [NWOS Dashboard](#) and additional documentation and resources can be found on the [NWOS website](#).
