Forests of Kansas, 2020

Kansas has an estimated 2,467,239 acres of forest land.

* Percent forest is forest area/total area. Percent forest with water removed from total area is 5%.

This resource update is a brief look at some of the basic metrics that describe the status of and changes to forest resources in Kansas. This information is based on field data collected using the USDA Forest Service Forest Inventory and Analysis (FIA) annualized sample design, and it is updated yearly.

Kansas has 8,701 sample plots across the State, of which 589.0 are currently forested. Each year, about 10-20 percent of these plots are visited and measured by field crews. Data used in this update were accessed from the FIA database on 06/02/2022.

</table>

Forest land ownership:
- Federal: 4.74%
- State and Local: 2.43%
- Private: 92.83%

- 40,742 acres of nonforest revert back to forest annually*
- 54,961 acres of forest land convert annually* to nonforest
- 3,948 acres of forest land are treated by cutting (harvest, thinning, etc.) annually*
- 17,482 acres of forest land are disturbed annually* by fire
- 2,238 acres of forest land are disturbed annually* by weather events

USDA Forest Service - Forest Inventory & Analysis

The estimates presented are based on data retrieved from the FIA database (06/02/2022) and may not reflect the most recent data available from the FIA program. Note – this publication does not include estimates of uncertainty. The most current data and sampling error for the estimates above can be found by visiting https://www.fia.fs.usda.gov.

*Average annual estimates are based on data collected across 5-10 years and may not be indicative of the nominal year presented in the title by itself.
