

June 2014

Position Description – Rocky Mountain Region

THSP – WFDSS Support

Exception Position 4 AD-I

This Technical Specialist Position will perform the following duties when assisting forest and incident management personnel with the Wildland Fire Decision Support System:

- Create and edit WFDSS incidents and incident decisions consistent with current fire policy
- Manage shapes associated with an incident
 - Draw, manipulate or upload fire perimeters, management action points, objective shapes, analysis ignitions, landscape masks and barriers
 - Draw or manipulate planning area to points of interest shapes
- Help manage documentation for incidents in the Geographic Area that include managing incident-level privileges for incidents
- Create automated Basic and STFB fire behavior analysis and manage analysts in the region
- Determine if a Decision Support Center is needed during fire season, and then contact the appropriate individuals to establish a Decision Support Center
