<p>33. Life, Safety, and Health Status/Threat Remarks:  <b>The inholding of Jawbone Flats has ceased operations in the Opal Creek Ancient Forest Center. Road and trail closure are in effect.</b></p>	<p>34. Life, Safety, and Health Threat Management:</p>																										
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):  <b>Much warmer and drier conditions have developed today as an upper level ridge of high pressure takes hold across the region. Unseasonably warm and dry conditions are expected to persist until at least early next week, with increasingly poor humidity recoveries for midslopes and ridges. Thermal low pressure will linger across the region through Thursday, briefly shifting east of the Cascades Friday before returning west of the Cascades this weekend. Winds will generally be terrain driven, with ridgetop winds tending north-northwest by day and east-northeast by night.</b></p>	<table border="1"> <thead> <tr> <th></th> <th>Active?</th> </tr> </thead> <tbody> <tr><td>A. ## Incident Status Summary (ICS-209)

Incident: **Beachie Creek**

	Active?
M. Quarantine in Progress	
N. Area Restriction in Effect	
O. Road Closure	<b>X</b>
P. Trail Closure	<b>X</b>
Q. Area Closure	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Fire activity is expected to increase with single and group tree torching. Moderate probability that fire backs down to Opal and/or Beachie creeks over the next 12 hours.**

24 hours: **Fire activity is expected to increase more with single and group tree torching. Short runs may occur when slope and wind align. High probability that fire crosses Opal and/or Beachie creeks over the next 48 hours.**

48 hours: **Fire activity is expected to increase more with group tree torching. Short and long runs may occur when slope and wind align. High probability that fire crosses Opal and/or Beachie creeks and continues growth on the other side of the creeks over the next 72 hours.**

72 hours: **Anticipate fire perimeter to increase daily. Direct hand line is not possible for containment. Outcome post 72 hours will be based on helicopter availability.**

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):  
**Strategic Objectives are to keep the fire in its current footprint utilizing bucket support and natural barriers. Indirect fireline opportunities are being identified.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Fire is in the Opal Creek watershed, T&E Species Northern Spotted Owl habitat. No threat to Opal Creek Ancient Forest Center and Jawbone Flats. Anticipated fire growth to be confined to the wilderness area. Continued road and trail closures effecting popular recreation sites.**

24 hours: **No change from 12 hour.**

48 hours: **Slight increase in threat to Opal Creek Ancient Forest Center and Jawbone Flats. Anticipated fire growth to be confined to the wilderness area. Continued road and trail closures effecting popular recreation sites.**

72 hours: **Increase in threat to Opal Creek Ancient Forest Center and Jawbone Flats. Anticipated fire growth to be confined to the wilderness area. Continued road and trail closures effecting popular recreation sites**

Anticipated after 72 hours: **If indirect attack methods are not successful anticipate Opal Creek Ancient Forest Center and Jawbone Flats to be threatened by fire. Potential for an up coming east wind event may lead to active fire moving toward Jawbone Flats and Opal Creek Ancient Forest Center, and the Sardine Creek Drainage. Continual closure of popular recreation sites, loss and impacts to T and E species habitat, and threat of fire spread to private lands dramatically increases. Late Succession Forest to the west of the Opal Creek Wilderness and Critical Spotted Owl habitat south of the Wilderness**

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

## Incident Status Summary (ICS-209)

Incident: **Beachie Creek**

12 hours:	<b>Critical need to maintain aviation resources (Type 1 helicopters).</b> <b>Critical need to maintain aviation resources (Type 1 helicopters).</b> <b>2 - T2IA</b>
24 hours:	<b>2 - IHC</b> <b>3 - TFLD</b> <b>3- HEQB</b>
48 hours:	<b>Critical need to maintain aviation resources (Type 1 helicopters)</b> <b>2 - T2IA</b> <b>2 - IHC</b> <b>3 - TFLD</b> <b>3- HEQB.</b>
72 hours:	<b>Critical need to maintain aviation resources (Type 1 helicopters).</b> <b>2 - T2IA</b> <b>2 - IHC</b> <b>3 - TFLD</b> <b>3- HEQB</b>
<b>Anticipated after 72 hours: Direct suppression is not feasible therefore containment is difficult to project. If the fire experiences a significant fire event we would anticipate the duration being nearly 60 days.</b>	

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**Critical need for Type 1 helicopters to slow fire spread and attempt to keep the fire in its current footprint. We anticipate indirect attack strategy that may last for the remainder of the fire season.**

41. Planned Actions for Next Operational Period:  
**Utilize air resources to slow fire spread, continue to develop a contingency plan with indirect lines.**

42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"):

43. Anticipated Incident Containment or Completion Date: **10/31/2020**

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$1,135,210.00**

46. Projected Final Incident Cost Estimate: **\$10,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
