22. Latitude/Longitude: Latitude: 44° 49' 16" Longitude: 122° 11' 17"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Willamette Township: 9S Range: 5E Section: 30 1/4 Sec: of 1/4 Sec:
---	---	--

25. Short Location or Area Description (list all affected areas or a reference point): Fire Started 2 miles south of Jawbone Flats	26. UTM Coordinates: Zone: Easting: Northing:
--	---

27. Note any geospatial data available (indicate data format, content, and collection time information and labels): incident_specific_data/pacific_nw/2020_Incidents_Oregon/2020_BeachieCreek_ORWIF_2000299

28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal Narrative:

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc): Timber (Litter and Understory) Closed Timber Litter Medium Logging Slash Narrative:

Incident Status Summary (ICS-209)

Incident: **Beachie Creek**

Fuel types consist of mixed conifer, grass and shrub fields with numerous snags and heavy dead and down. Private lands have various aged conifer plantations, NFS lands and upper elevations transition to mature Douglas fir with significant snag component. Live fuels are dormant, grasses are cured, and both may contribute to fire intensity and spread. Previous management and multiple ownerships contribute to many fuel type changes, including residual activity fuels (slash). BOW spot is in heavy down fuels from previous fire event.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): Note: The three counties have rescinded all evacuation orders.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	0	60	486
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	0	5	36
	I. Other Minor Structures	0	95	801

<p>36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:</p>	
<p>12 hours: Very isolated heat and smoke in the interior with some smoldering. Some smoke may be visible in isolated burning stumps, large down wood, and snags.</p>	
<p>24 hours: Very isolated heat and smoke in the interior with some smoldering. Some smoke may be visible in isolated burning stumps, large down wood, and snags.</p>	
<p>48 hours: Very isolated heat and smoke in the interior with some smoldering. Some smoke may be visible in isolated burning stumps, large down wood, and snags.</p>	
<p>72 hours: Very isolated heat and smoke in the interior with some smoldering. Some smoke may be visible in isolated burning stumps, large down wood, and snags.</p>	
<p>Anticipated after 72 hours:</p>	<p>Fire is likely to see minimal fire behavior, due to recent precipitation, high soil moistures, and most large fuel classes above normal moisture content for this time of year. Nighttime RH recovery will be above 90%, and will likely include morning fog. Some smokes are likely to be visible in heavier fuels and stumps; fuel moisture levels not likely to have any high resistance to control, with predicted RH, winds, and temperatures.</p>

<p>37. Strategic Objectives (define planned end-state for incident): Protect values at risk to include; surrounding communities, critical infrastructure, state, private and federal lands. Complete suppression repair work. Firefighter and public safety maintained as the highest priority while engaging the fire. .</p>	
---	--

<p>38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:</p>	
<p>12 hours: Minimal fire behavior with little or no fire growth is expected beyond the current fire footprint. Suppression repair efforts will continue in an effort to protect environmental, recreational, and economic resources.</p>	
<p>24 hours: Minimal fire behavior with little or no fire growth is expected beyond the current fire footprint.</p>	

Incident Status Summary (ICS-209)

Incident: **Beachie Creek**

Suppression repair efforts will continue in an effort to protect environmental, recreational, and economic resources.					
48 hours: Minimal fire behavior with little or no fire growth is expected beyond the current fire footprint. Suppression repair efforts will continue in an effort to protect environmental, recreational, and economic resources.					
72 hours: Minimal fire behavior with little or no fire growth is expected beyond the current fire footprint. Suppression repair efforts will continue in an effort to protect environmental, recreational, and economic resources.					
Anticipated after 72 hours: The threat of fire spread is minimal. Suppression repair efforts continue.					
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:					
12 hours: None					
24 hours: None					
48 hours: None					
72 hours: None					
Anticipated after 72 hours: None					
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: <ol style="list-style-type: none"> 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. <p>Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.</p> <p>Suppression repair will continue to stabilize soils to protect wildlife and fisheries resources and habitat including federally listed species such as northern spotted owl, Coho and Chinook salmon, steelhead and bull trout. These activities will also help meet social interests (landowner and recreational user access). To provide for an effective and safe work/camp environment for firefighters, security/road guards are needed.</p>					
41. Planned Actions for Next Operational Period: Suppression repair work will continue on the incident.					
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 193,573					
43. Anticipated Incident Containment or Completion Date: 10/31/2020					
44. Projected Significant Resource Demobilization Start Date: 10/25/2020					
45. Estimated Incident Costs to Date: \$23,000,000.00					
46. Projected Final Incident Cost Estimate: \$30,000,000.00					
47. Remarks (or continuation of any blocks above – list block number in notation): Transfer of command to a type 4 organization took place on 10/25/2020 at 1900 hrs.					
49. Resources (summarize resources by category, kind, and/or type; show # of resources on top 1/2 of box, show # of personnel associated with resource on bottom 1/2 of box):
