**Spot Forecast for Bush Fire...USFS Tonto NF**

**National Weather Service Phoenix AZ1133 PM MST Sat Jun 13 2020**

Forecast is based on forecast start time of 2300 MST on June 13. If conditions become unrepresentative contact the National Weather Service. .

DISCUSSION...Very dry and very warm conditions will extend through Monday, with afternoon highs in the low to mid 100s. Afternoon humidities will be around 5-10% each day with overnight recoveries only to 20-25%. Typical diurnal and terrain induced wind tendencies are expected each day. Winds will be calm to light during the overnight hours with some variability and a slight southeasterly component. Breezy south-southwesterly to southwesterly winds will develop by the afternoons, with gusts commonly up to 15-20 mph. Saturday afternoon will be slightly breezier than Monday, with localized gusts up to 25 mph. Chances for precipitation remain near zero both days. However, isolated to scattered thunderstorm activity seems likely across southeast AZ Monday afternoon and this activity could push an outflow boundary north/northwest toward the Bush fire area later Monday evening.

# SAFETY MESSAGE

**INCIDENT NAME:** Bush Fire

**OPERATIONAL PERIOD:** 06/14/2020 Day

## MAJOR HAZARDS:

- **Driving** – Drive defensibly, use headlights and backers. Take breaks if driving long distances.
- **Fire Weather and Fire Behavior** – Watch for near critical fire weather.
- **Heat Related Injury/Dehydration**– Continue to replenish your fluids and avoid overheating
- **Transition** – Be aware that transition periods can be dangerous. Ensure that briefings are clear and emergency procedures are in place before engaging.

### Mental Fatigue

**DON'T LET THIS BE YOU!!!!**

## NARRATIVE:

**ADAPTABILITY AND FLEXIBILITY:** As the 2020 Fire season is ramping up, dealing with active fire and how to implement COVID 19 strategies to protect all our firefighters and support folks is challenging to say the least. Do your best to maintain social distancing, wash your hands and use sanitizer as frequently as possible- especially before eating, drinking or touching your face. If you have to be within a 6' distance from someone use a mask if you have it. Take care of yourselves and watch out for one another.

Increasing personal adaptability and flexibility increases our margin of error and can lead to a safer environment. Below are some things to consider both at work and in our personal lives:

- Alter plans to meet situation demands
- Alter behavior to meet situational demands
- Accept constructive criticism and help others
- Step in and help other crew/module/team members
- Be receptive to other's ideas
- Advocate a specific course of action
- State opinions on decisions/procedures even to higher ranking crew members
- Ask questions when uncertain
- Make suggestions
- Raise questions about procedures

**Thanks for paying attention to the details**

**SAFETY OFFICERS:**

Clint Remington/ DO
