

# Salt, Gin and Griffin

## Incident Action Plan

USDA Forest Service  
Tonto National Forest

AZ-TNF-0002511  
PANF3Q (0312)

August 20 - 21, 2020

Night Shift: 1730 – 0730

Datum WGS 84 DD MM.MMM

*For Maps*

*For COVID-19 Screening*

### \*\*\* COVID-19 Mitigation Actions and Leader's Intent \*\*\*

- ✓ Assigned resources will practice social distancing and be in alignment with the "module of one concept." When interacting outside of the "module of one," face-coverings are required; this includes ICP as well any established business within the city limits.
- ✓ Face coverings are strongly encouraged during fireline interactions while outside of the "module of one." Without compromising firefighter safety, social distancing should be practiced to the extent possible.
- ✓ All resources should adhere to the closed ICP strategy; please utilize the virtual check-in and demob procedures to reduce potential exposure.
- ✓ Reduce the number of briefing participants to only module leaders or those deemed necessary.

Mark Bernal, Incident Commander

OPERATIONAL PERIOD (DATE/TIME)

**Night Shift, August 21-22, 2020**

## GENERAL CONTROL OBJECTIVES

### Leader's Intent

- Commit resources only when there is a reasonable expectation of success in protecting life and critical property and infrastructure. Effectively implement a values-driven strategy that utilizes a mix of tactics (direct, indirect, and point-protection) when and where the probability of success is high, and the risk is commensurate with the identified values. Success is defined as safely achieving objectives with the least firefighter exposure necessary while enhancing stakeholder support and adhering to the core values of conservation, interdependence, and service.

### Values at Risk

- Incident personnel and the public
- Communities of concern to include Roosevelt, Rock House, Qual Run, Spring Creek Ranch, Wheatfields, Globe, Miami/Claypool
- Properties and infrastructure to include APS/SRP kV Transmission Lines, local utilities/powelines, Pinto Valley Mine, Range Infrastructure and Upper Horrell Ranch
- Major transportation corridors to include Hwy 188, Hwy 288, and U.S. 60/77
- Salt River Canyon and Superstition Wilderness characteristics and values
- Sonoran Desert vegetation and ecological communities (minimize the potential spread of noxious weeds)
- Airshed and smoke sensitive areas to include Globe and surrounding communities
- Archeological and cultural resources and sites
- Wildlife Resources to include threatened and endangered species habitat to include Mexican spotted owl, narrow headed and northern Mexican garter snakes, razorback sucker, southwestern willow flycatcher and Yellow Billed Cuckoo
- Relationships with cooperators, stakeholders, and the public in impacted areas

### Incident Objectives

- Provide for the safety of incident responders and the public through the application and implementation of sound risk management, to include planning and conducting fire operations to minimize impacts and spread of COVID-19.
- Values are communicated and protected from adverse fire and incident management actions.
- Foster and strengthen relationships between incident agencies, partners, cooperators, responders, and communities in impacted areas.
- Provide timely and accurate information to the public and media on the fire status and incident activities.
- Minimize impacts to properties and infrastructure.
- Protect identified archeological, historic, and natural resources.
- Engage the host agencies and resource advisors to effectively protect values and minimize impacts.
- Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.
- Manage timely, safe, and efficient initial attack within the TFR. Coordinate with local agencies and support initial attack outside the TFR.

### Incident Requirements

- Resources will maintain a "module of one" separation. Masks will be required when meeting in groups outside of your "module of one" and when interacting in close proximity (< than 6') with individuals outside your "module of one."
- Create and maintain a work environment in which people are treated with respect and dignity.
- Coordinate and document planned actions. Document use and intrusions in the wilderness.
- Notify the public in advance when smoke has the potential for a significant impact to smoke sensitive areas.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildfire
FIRE NAME: Salt, Gin, Griffin Fires	OPERATIONAL PERIOD: Night Operations, 08/20/2020
DATE ISSUED: 08/20/20	TIME ISSUED: 15:00
UNIT: AZ-TNF Tonto National Forest – Globe R.D.	SIGNED: FBAN – Dan Pearson

### INPUTS

**WEATHER SUMMARY:** Strong high pressure continues to dominate over the area bringing higher than normal temperatures. Humidity recovery is expected to be better tonight with recoveries 45-65%. Continued chances for late afternoon to mid-evening isolated thunderstorms. Impacts from the isolated storms will include very gusty outflow winds, lightning, and brief heavy downpours.

**Sky Condition:** Hazy then partly cloudy      **Temp:** 72-76°      **Humidity (max):** 44-64%      **Chnc of Precip:** 20%  
**Winds:** West or Southwesterly until early evening 7-13 mph, becoming lighter and downslope 5-7 mph after midnight

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

**Summary** – Expect active fire behavior to continue in all fuel types as the fire will be pushed by hot and dry conditions. Tonight, pay particular attention to the **potential for outflow winds** which will drastically and quickly increase fire behavior. Observations of extreme fire behavior late in the afternoon/eve have been reported. Significant growth and active crown fire in brush and timber should be anticipated this afternoon if T-Storms build near any of the fires.

**Environment** – The Sonoran and Brush FDRAs for the Tonto NF are showing ERC and BI values that are setting new high records for this time of the year. ERCs are running at, or near, the 95<sup>th</sup> percentile with BIs seeing a drop over the last couple days from the 95<sup>th</sup> percentile down nearer to the 90<sup>th</sup> percentile. This is an unusually hot and dry period for last August.

**Fuels** – Sonoran Desert/Desert Grasslands – Fully cured heavy grass crop, including invasive grasses have increased resistance to control all summer, no relief has been received so expect a continuous available fuel bed to exist. Upper shrublands - Expect all fuels to be available with live FM in the mid 50-70% range for Oak and Manzanita.

**General fire characteristics** – Conditions represent active fire behavior based on predicted afternoon conditions. *High end of characteristics modeled using 25 mph winds to estimate outflow wind impacts.*

**GRASS Head Fire** – ROS: 31-94 ch/hr; FL 4-7 ft, **Backing/Flanking Fire** ROS – 3-16 ch/hr, FL-1-3 ft  
**GRASS-BRUSH Head Fire** – ROS: 19-57 ch/hr; FL 5-8 ft, **Backing/Flanking Fire** ROS – 2-10 ch/hr, FL-2-4 ft  
**BRUSH Head Fire** – ROS: 32-78 ch/hr; FL 12-20 ft, **Backing/Flanking Fire** ROS – 3-13 ch/hr, FL-4-8 ft  
**TIMBER LITTER Head Fire** – ROS: 2-11 ch/hr; FL 1-5 ft, **Backing/Flanking Fire** ROS – 1-2 ch/hr, FL-1-2 ft

##### SPECIFIC:

**Salt Fire** – Salt fire is the lowest in elevation and lies along the Sonoran Desert/Desert Grassland transition. These ecosystems have seen robust native/invasive grass crops that will support rapid spread in all direction. Potential will continue to exist for extreme rates of spread in all direction when driven by outflow winds from passing T-storms.

**Gin and Griffin Fires** –Complex topography and a mix of brush/timber fuels will add complexity to fire behavior tonight. The Griffin Fire reached Hwy 60 this afternoon but has open flanks to the north and south as well as readily available fuels to the east of the highway.

##### AIR OPERATIONS:

Hazy conditions and high probability for gusty outflow winds in the late afternoon to evening will limit aviation availability.

##### SAFETY – Outflow Winds

Although conditions are conducive to support Active fire behavior across all 3 fires, activity can quickly escalate to Extreme fire behavior in all directions, on all fires, in all fuel types as winds increase and or change direction where outflow winds from approaching and passing T-Storms reach the fire area.

[illegible]

# SAFETY MESSAGE

## SAFETY IS OUR FIRST PRIORITY

*Fire fighter safety comes first on every fire, every time*

Incident: Salt, Gin, Griffin

Date: August 20, 2020

Shift: Day

“The most essential element of successful wildland firefighting is competent and confident leadership.

Leadership means providing purpose, direction, and motivation for wildland firefighters working to accomplish difficult tasks under dangerous, stressful circumstances.”

(IRPG page vi)

### MAJOR HAZARDS AND RISKS

A Driving/Traffic

B Mine Safety

C Firefighter Fatigue

D Steep, Rough Terrain

E Communications

F Air Operations

G Weather

H Wildlife/Livestock

I COVID 19

Maintain situational awareness in all assignments including the **driving** on all highways and other roads. Continue with COVID 19 practices, masks, hand washing, social distancing, etc.

Be continually aware of **firefighter fatigue**. Ensure proper rest, meals, and equipment necessary to assist firefighters.

Drink plenty of water and other fluids through-out shift to prevent **dehydration**.

Realize there is much work yet to do. Avoid **complacency** and stay “dialed in”.

**Don't take chances, Others are depending on you**

**Maintain 10 & 18's and L.C.E.S at all times!**

## Finance

Finance will **only** be taking documents electronically. Upon request, Finance can provide electronic, fillable pdf, forms of CTRs and shift tickets. Finance will also accept pictures of CTRs and shift tickets. Please make sure all CTRs and Shift Tickets are **signed by your incident supervisor** before submitting electronically.

Finance will also **only** accept contracts and agreements electronically.

**ADs:** Please be sure to submit your Causal hire and Resource Order forms electronically to Finance as well. It is important we have those forms before we can start inputting your time.

Please make sure **ALL** documentation includes your name and resource order number.

All documents and pictures should be emailed to: [2020.salt.finance@firenet.gov](mailto:2020.salt.finance@firenet.gov)

Thank you,

**Team 5 Finance**

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

- 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)** Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

**6. COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
