# Salt, Gin and Griffin Incident Action Plan

USDA Forest Service  
Tonto National Forest

AZ-TNF-0002511  
PANF3Q (0312)

August 21 - 22, 2020

Day Shift: 0600 - 2000 Night Shift: 1730 - 0730

Datum WGS 84 DD MM.MMM

*For Maps*

*For COVID-19 Screening*

## \*\*\* COVID-19 Mitigation Actions and Leader's Intent \*\*\*

- ✓ Assigned resources will practice social distancing and be in alignment with the "module of one concept." When interacting outside of the "module of one," face-coverings are required; this includes ICP as well any established business within the city limits.
- ✓ Face coverings are strongly encouraged during fireline interactions while outside of the "module of one." Without compromising firefighter safety, social distancing should be practiced to the extent possible.
- ✓ All resources should adhere to the closed ICP strategy; please utilize the virtual check-in and demob procedures to reduce potential exposure.
- ✓ Reduce the number of briefing participants to only module leaders or those deemed necessary.

Mark Bernal, Incident Commander

<b>INCIDENT OBJECTIVES</b> <small>ICS-202</small>		<small>INCIDENT NAME</small> <b>SALT, GIN, GRIFFIN</b>	<small>DATE PREPARED</small> <b>8/20/2020</b>	<small>TIME PREPARED</small> <b>1600</b>
<small>OPERATIONAL PERIOD (DATE/TIME)</small> <b>Day and Night Shifts, August 21, 2020 (0600) – August 22, 2020 (0730)</b>				
<small>GENERAL CONTROL OBJECTIVES</small> <b>Leader's Intent</b> <ul style="list-style-type: none"> <li>▪ Commit resources only when there is a reasonable expectation of success in protecting life and critical property and infrastructure. Effectively implement a values-driven strategy that utilizes a mix of tactics (direct, indirect, and point-protection) when and where the probability of success is high, and the risk is commensurate with the identified values. Success is defined as safely achieving objectives with the least firefighter exposure necessary while enhancing stakeholder support and adhering to the core values of conservation, interdependence, and service.</li> </ul>				
<b>Values at Risk</b> <ul style="list-style-type: none"> <li>▪ Incident personnel and the public</li> <li>▪ Communities of concern to include Roosevelt, Rock House, Quail Run, Spring Creek Ranch, Wheatfields, Globe, Miami/Claypool</li> <li>▪ Properties and infrastructure to include APS/SRP kV Transmission Lines, local utilities/powelines, Pinto Valley Mine, Range Infrastructure and Upper Horrell Ranch</li> <li>▪ Major transportation corridors to include Hwy 188, Hwy 288, and U.S. 60/77</li> <li>▪ Salt River Canyon and Superstition Wilderness characteristics and values</li> <li>▪ Sonoran Desert vegetation and ecological communities (minimize the potential spread of noxious weeds)</li> <li>▪ Airshed and smoke sensitive areas to include Globe and surrounding communities</li> <li>▪ Archeological and cultural resources and sites</li> <li>▪ Wildlife Resources to include threatened and endangered species habitat to include Mexican spotted owl, narrow headed and northern Mexican garter snakes, razorback sucker, southwestern willow flycatcher and Yellow Billed Cuckoo</li> <li>▪ Relationships with cooperators, stakeholders, and the public in impacted areas</li> </ul>				
<b>Incident Objectives</b> <ul style="list-style-type: none"> <li>▪ Provide for the safety of incident responders and the public through the application and implementation of sound risk management, to include planning and conducting fire operations to minimize impacts and spread of COVID-19.</li> <li>▪ Values are communicated and protected from adverse fire and incident management actions.</li> <li>▪ Foster and strengthen relationships between incident agencies, partners, cooperators, responders, and communities in impacted areas.</li> <li>▪ Provide timely and accurate information to the public and media on the fire status and incident activities.</li> <li>▪ Minimize impacts to properties and infrastructure.</li> <li>▪ Protect identified archeological, historic, and natural resources.</li> <li>▪ Engage the host agencies and resource advisors to effectively protect values and minimize impacts.</li> <li>▪ Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.</li> <li>▪ Manage timely, safe, and efficient initial attack within the TFR. Coordinate with local agencies and support initial attack outside the TFR.</li> </ul>				
<b>Incident Requirements</b> <ul style="list-style-type: none"> <li>▪ Resources will maintain a "module of one" separation. Masks will be required when meeting in groups outside of your "module of one" and when interacting in close proximity (&lt; than 6') with individuals outside your "module of one."</li> <li>▪ Create and maintain a work environment in which people are treated with respect and dignity.</li> <li>▪ Coordinate and document planned actions. Document use and intrusions in the wilderness.</li> <li>▪ Notify the public in advance when smoke has the potential for a significant impact to smoke sensitive areas.</li> </ul>

.DISCUSSION...

The biggest concern today is the threat from thunderstorms later this evening. Storms activity that is currently over the White Mountains and Mogollon Rim is expected to drift off the higher terrain towards the fire area this evening. New storms are likely to redevelop north, east, and/or south of the fire area. Outflow winds are likely to reach the fire area (greater than 50% chance) with the best timing for outflows between 1500-2000 local. There is a chance the fire area could also get hit with multiple rounds of outflows during that with the most likely direction coming from the north or east, or in between. A very late southerly outflow cannot be ruled out either, but is not as likely. The potential wind speeds for outflows could reach 30-50 mph.

The fire area itself has a 20% chance of a storm directly overhead. The best timing for storms will be between 1600-2000 local. Storms will have the potential for producing damaging wind gusts with speeds in excess of 50 mph. Lightning will also be a hazard. Heavy rainfall does not seem likely.

GIN FIRE:

REST OF TODAY...Sky/weather - Partly sunny. Areas of smoke. Slight chance of showers and thunderstorms.

CWR.....20 percent.

Max temperature.....90-94.

Min humidity.....21-26 pct.

Wind (20 ft).....Northwest winds 12 to 17 mph with gusts to around 20 mph. Gusty and erratic winds expected near thunderstorms.

TONIGHT...Sky/weather - Partly cloudy. Haze and areas of smoke through the night. Slight chance of thunderstorms in the evening. Slight chance of showers through the night.

CWR.....20 percent.

Min temperature.....71-75.

Max humidity.....46-51 pct.

Wind (20 ft).....West winds 6 to 12 mph. Gusts up to 18 mph. Gusty and erratic winds expected near thunderstorms in the evening.

FRIDAY - Sky/weather - Mostly sunny. Slight chance of showers in the afternoon.

CWR.....0 percent in the morning becoming 20 percent in the afternoon.

Max temperature.....86-90.

Min humidity.....30-35 pct.

Wind (20 ft).....West winds 7 to 17 mph with gusts to around 21 mph.

.DISCUSSION...

The biggest concern today is the threat from thunderstorms later this evening. Storms activity that is currently over the White Mountains and Mogollon Rim is expected to drift off the higher terrain towards the fire area this evening. New storms are likely to redevelop north, east, and/or south of the fire area. Outflow winds are likely to reach the fire area (greater than 50% chance) with the best timing for outflows between 1500-2000 local. There is a chance the fire area could also get hit with multiple rounds of outflows during that with the most likely direction coming from the north or east, or in between. A very late southerly outflow cannot be ruled out either, but is not as likely. The potential wind speeds for outflows could reach 30-50 mph.

The fire area itself has a 20% chance of a storm directly overhead. The best timing for storms will be between 1600-2000 local. Storms will have the potential for producing damaging wind gusts with speeds in excess of 50 mph. Lightning will also be a hazard. Heavy rainfall does not seem likely.

GRIFFIN FIRE:

REST OF TODAY...Sky/weather - Mostly sunny. Areas of smoke. Slight chance of showers and thunderstorms.

CWR.....20 percent.  
Max temperature.....94-98.  
Min humidity.....20-25 pct.  
Wind (20 ft).....Northwest winds 12 to 17 mph with gusts to  
                                around 22 mph. Gusty and erratic winds expected  
                                near thunderstorms.

TONIGHT...Sky/weather - Partly cloudy. Haze and areas of smoke through  
                                the night. Slight chance of thunderstorms in  
                                the evening. Slight chance of showers through  
                                the night.

CWR.....20 percent.  
Min temperature.....71-75.  
Max humidity.....49-54 pct.  
Wind (20 ft).....West winds 5 to 17 mph. Gusts up to 35 mph in  
                                the evening becoming 24 mph after midnight.  
                                Gusty and erratic winds expected near  
                                thunderstorms in the evening.

FRIDAY - Sky/weather - Mostly sunny. Slight chance of showers in the  
afternoon.

CWR.....0 percent in the morning becoming 20 percent in  
                                the afternoon.  
Max temperature.....89-93.  
Min humidity.....28-33 pct.  
Wind (20 ft).....West winds 6 to 15 mph with gusts to around 20  
                                mph.

.DISCUSSION...

The biggest concern today is the threat from thunderstorms later this evening. Storms activity that is currently over the White Mountains and Mogollon Rim is expected to drift off the higher terrain towards the fire area this evening. New storms are likely to redevelop north, east, and/or south of the fire area. Outflow winds are likely to reach the fire area (greater than 50% chance) with the best timing for outflows between 1500-2000 local. There is a chance the fire area could also get hit with multiple rounds of outflows during that with the most likely direction coming from the north or east, or in between. A very late southerly outflow cannot be ruled out either, but is not as likely. The potential wind speeds for outflows could reach 30-50 mph.

The fire area itself has a 20% chance of a storm directly overhead. The best timing for storms will be between 1600-2000 local. Storms will have the potential for producing damaging wind gusts with speeds in excess of 50 mph. Lightning will also be a hazard. Heavy rainfall does not seem likely.

SALT FIRE:

REST OF TODAY... Sky/weather.....Mostly sunny. Areas of smoke.  
CWR.....20 percent.  
Max temperature.....100-106.  
Min humidity.....18-23 pct.  
Wind (20 ft).....Northwest winds 12 to 17 mph with gusts to  
                                around 22 mph.

.TONIGHT...

Sky/weather.....Partly cloudy. Haze in the evening. areas of  
                                smoke through the night. Slight chance of  
                                thunderstorms in the evening. slight chance of  
                                showers through the night.  
CWR.....20 percent.  
Min temperature.....73-77.  
Max humidity.....52-59 pct.  
Wind (20 ft).....Southwest winds 5 to 22 mph with gusts to  
                                around 35 mph in the evening becoming 5 to 8  
                                mph after midnight. Gusty and erratic winds  
                                expected near thunderstorms in the evening.

.FRIDAY...

Sky/weather.....Mostly sunny.  
CWR.....10 percent.  
Max temperature.....95-101.  
Min humidity.....26-31 pct.  
Wind (20 ft).....West winds 5 to 15 mph with gusts to around 20  
                                mph.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 3	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Salt, Gin, Griffin Fires	<b>OPERATIONAL PERIOD:</b> DAY Operations, 08/21/2020
<b>DATE ISSUED:</b> 08/20/20	<b>TIME ISSUED:</b> 20:00
<b>UNIT:</b> Tonto National Forest – Globe R.D.	<b>SIGNED:</b> FBAN – Dan Pearson 

### INPUTS

**WEATHER SUMMARY:** Strong high pressure continues to dominate over the area bringing higher than normal temperatures. Humidity recovery is expected to be better tonight with recoveries 45-65%. Continued chances for late afternoon to mid-evening isolated thunderstorms. Impacts from isolated storms will include very gusty outflow winds, possible lightning, and brief heavy downpours.

**Sky Condition:** Mostly sunny    **Temp:** 92-100°    **Humidity (min):** 26-31%    **Chnc of Precip:** 20%  
**Winds:** West winds 5 -15 mph with gusts around 20 mph

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

**Summary** – Better overnight humidity recovery will likely delay fire activity transitioning from creeping to active fire movement. Expect the transition to begin in mid-slope grasses between 1100 and noon before general fire activity picks up in the afternoon. In the mid to late afternoon, watch for cells building over the Mogollon Rim to the north because of **outflow winds** which will drastically and quickly increase fire behavior.

**Environment** –ERCs are running at, or near, the 95<sup>th</sup> percentile due to lack of a traditionally robust monsoon in July. This is an unusually hot and dry period for late August and fuels are much more receptive to ignition than normal.

**Fuels** – Sonoran Desert/Desert Grasslands – Fully cured heavy grass crop, including invasive grasses have resulted in a continuous available fuel bed allowing fire to sustain growth even in the absence of strong winds or steep terrain.

- Upper shrublands - Expect all fuels to be available with live FM in the mid 50-70% range for Oak and Manzanita. Mesquite and juniper clumps often contain continuous grasses and torch easily contributing embers for, generally short-range, spot fires.

**General fire characteristics** – Conditions represent active fire behavior based on predicted afternoon conditions.

**GRASS Head Fire** – ROS: 25-50 ch/hr; FL 2-4 ft, **Backing/Flanking Fire** ROS – 1-3 ch/hr, FL-1-3 ft  
**GRASS-BRUSH Head Fire** – ROS: 15-35 ch/hr; FL 5-8 ft, **Backing/Flanking Fire** ROS – 2-10 ch/hr, FL-2-4 ft  
**BRUSH Head Fire** – ROS: 5-20 ch/hr; FL 8-15 ft, **Backing/Flanking Fire** ROS – 1-3 ch/hr, FL-4-8 ft  
**TIMBER LITTER Head Fire** – ROS: 1-4 ch/hr; FL 1-4 ft, **Backing/Flanking Fire** ROS – 1-2 ch/hr, FL-1-2 ft

##### SPECIFIC:

**Salt Fire** – Major fire growth will continue to flank along Pinto Creek and Bell Gulch with the greatest growth potential in Granite Basin. Westerly winds will aid in limiting growth on the western flank, but consistent fuels exist in Granite Basin which may allow unhindered growth on the southeast flank.

**Griffin Fire** – Fire is on both sides of Hwy 60. Primary growth will likely be on the southeastern portion of the fire which crossed the highway yesterday. Consistent flanking fire on the northern and southern flanks towards FS303 road.

**Gin Fire** – The majority of activity over the last two operational periods on the Gin Fire was on the northwest corner. Westerly winds will push that area of heat back into the main fire, but will test the recently quiet eastern flank.

##### AIR OPERATIONS:

Hazy conditions and high probability for gusty outflow winds in the late afternoon to evening will limit aviation availability.

##### SAFETY – Outflow Winds

Although conditions are conducive to support active fire behavior across all 3 fires, activity can quickly escalate to Extreme fire behavior in all directions, on all fires, in all fuel types as winds increase and or change direction where outflow winds from approaching and passing T-Storms reach the fire area.

# SAFETY MESSAGE

*Fire fighter safety comes first on every fire, every time*

We are **ALL** accountable for **SAFE** behaviors!  
For Day/Night Operations: **August 21-22, 2020**

INCIDENT: Salt/Gin/Griffin

Date Prepared: August 20, 2020 TIME: 1400

## Major Hazards and Risks:

- **Medivac Procedures:** Take the time to review the Medical Plan/Medical Incident Report and know exactly how to proceed before an injury occurs. Know your location and where the closest landing zone is located.
- **Driving/Roads-** Use caution on all roads. Blind corners, dust, smoke and sun may contribute to poor visibility.

## SITUATIONAL AWARENESS – What are we going to do if someone gets hurt?????

**1. STOP**

**2. THINK**

**3. TALK..**

**4. THEN ACT**

**Think Safety First**  
Build a culture that places the health and welfare of people first

**Identify Hazards**  
It is our responsibility to recognize hazards and do our best to mitigate them

**Access your Exposure to Risk**  
Periodic assessment of your risk and the situation you're responsible for is paramount to ensure success

**Maintain Situational Awareness**  
Be vigilant and remember you are the most important resource

Everything we do in the Forest Service involves some level of risk. From driving to work, to every job we do in the agency – we encounter hazards. In some cases we accept this when we come to work every day, but we do not accept the loss or injury of any of our co-workers, volunteers, partners or youth groups. Although we can never know every hazard that we may face in a day, nor can we eliminate all risk, we can mitigate certain hazards, not take unnecessary risks, and train and prepare for the risks we may encounter.  
  
~ Leanne Marten  
Rocky Mountain Region  
Regional Forester

*“Risk Management doesn’t get in the way of doing the mission – it is the way we do the mission.” The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making.*

Thanks from your SAFETY TEAM!

## “Powerline Safety”

Fire activity near high voltage electrical transmission/distribution lines can cause multiple hazards and electrocute or seriously injure firefighters. The IC and line supervisors must be aware and communicate powerline hazards to all resources. Contact power companies when powerlines are threatened or involved.

### Ground Tactics

- Normal tactics apply when fire is more than 100 feet from powerlines.
- Heavy smoke and flames can cause arcs to ground. Direct attack must be abandoned within 100 feet of transmission lines.
- Spot fires or low ground fires can be fought with hose lines if heavy smoke or flame is not within 100 feet of powerlines.
- Always maintain a distance of 35 feet from transmission towers.
- Never use straight streams or foam—use a fog pattern.
- Use extreme caution if engaging in tactical firing operations.
- Extinguish wooden poles burning at the base to prevent down wire hazards.

### ALWAYS!

- **Look Out** for any powerlines near the incident.
- **Communicate** location of all powerlines that present a hazard.
- **Escape Routes** should not be under or near overhead powerlines.
- **Safety Zones**, ICP, and staging areas should not be located under or near overhead powerlines.

**Branch I: Salt Fire – Div. L, P, T, W**

**Branch II: Gin and Griffin Fire – Div. A, D, H, Z**

**SOUTHWEST  
INCIDENT MANAGEMENT  
TEAM 5  
MARK BERNAL, INCIDENT COMMANDER**

---

**To: All Incident Personnel for the Salt – Gin - Griffin Fires**

**From: Mark Bernal, Incident Commander**

**Subject: Ethical Behavior and Conduct**

Southwest Area Incident Management Team 5 is committed to the highest principles of ethical behavior and conduct. This team fully adheres to the laws and policies regarding discrimination, harassment, hazing, and other inappropriate behavior, including drugs and alcohol use.

I expect all personnel assigned to this incident to carry themselves with the utmost level of honesty, integrity, and professionalism. Fostering and investing in relationships is important; be mindful of your interactions with the public, including posting incident-related information on social media (videos, photos, texts, etc.).

I would like to acknowledge each of you who have answered the call to public service and come to this fire. Your willingness to step away from your families during such complex times and issues to humanity do not go unnoticed. It is difficult not to have a degree of feeling about COVID-19, social distancing, unfair treatment of our fellow citizens, and now fire. I call on each of you to heighten your mindfulness to stress management, mutual respect, and safety-first behavior.

I am committed to the belief that everyone is entitled to a safe and harassment-free work environment throughout the entire duration of the assignment. Equally, our behaviors must reflect a safety-first attitude.

Your actions reflect upon all of us.

Sincerely,

*Mark Bernal*

---

**Mark Bernal  
Incident Commander  
Southwest Interagency Management Team 5**

## Human Resource Message

What is a Human Resource Specialist and what do they do??

The human resource specialist is available to all incident personnel to provide information and names of people for future contact regarding actions related to Civil Rights. The responsibility of the HRS is to monitor camp and line activities to assure that appropriate practices are followed.

Civil Rights considerations are essential in the management of any incident and must be given high priority by all members and levels of the fire organization. Utilization of this position is a step towards resolution of issues as they arise, rather than waiting until weeks after the incident is demobilized. High priority will be given to resolving issues informally.

If you are aware of discrimination, harassment, or any other form of inappropriate behavior, you have the right and responsibility to do something about it. If there is any other information you need or if I can be of any assistance, please don't hesitate to drop by and ask me for assistance.

**Incident Human Resource Specialist: David Legrand**

**Room ICP**

**Contact Number - 505-218-1189**

Thought of the day: Remember to be kind to unkind people.....they need it the most.

## Finance

Finance will **only** be taking documents electronically. Upon request, Finance can provide electronic, fillable pdf, forms of CTRs and shift tickets. Finance will also accept pictures of CTRs and shift tickets. Please make sure all CTRs and Shift Tickets are **signed by your incident supervisor** before submitting electronically.

Finance will also **only** accept contracts and agreements electronically.

**ADs:** Please be sure to submit your Causal hire and Resource Order forms electronically to Finance as well. It is important we have those forms before we can start inputting your time.

Please make sure **ALL** documentation includes your name and resource order number.

All documents and pictures should be emailed to: [2020.sait.finance@firenet.gov](mailto:2020.sait.finance@firenet.gov)

Thank you,

**Team 5 Finance**

40		000904	Gated Wyes 3/4", each								
41		000835	Shutoff Valve, 3/4", each								
42		000230	In-Line Tee, 1 1/2" x 1", each								

Note: If the team is in Arizona PFK will service otherwise SFK will service. Some items not carried by SFK may not be available.

\* - Line 24 Drip torches will be mixed 70% Diesel 30% Gas unless otherwise specified

WILL SOMEONE BE AT THE DELIVERY / LOCATION TO SIGN THE WAYBILL? YES / NO

[illegible]

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

Use the following items to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)** Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

**6. COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
