Salt and Griffin Incident Action Plan

USDA Forest Service Tonto National Forest

AZ-TNF-0002511 P3NF3Q (0312)

August 24 - 25, 2020

Day Shift: 0600 - 2000 Night Shift: 1730 - 0730

Datum WGS 84

DD MM.MMM

For Maps

For COVID-19 Screening

*** COVID-19 Mitigation Actions and Leader's Intent ***

- ✓ Assigned resources will practice social distancing and be in alignment with the "module of one concept." When interacting outside of the "module of one," face-coverings are required; this includes ICP, established business within the city limits, fireline interactions outside of the "module of one".
- ✓ Without compromising firefighter safety, social distancing should be practiced to the extent possible.
- ✓ All resources should adhere to the closed ICP strategy; please utilize the virtual check-in and demob procedures to reduce potential exposure.
- ✓ Reduce the number of briefing participants to only module leaders or those deemed necessary.

INCIDENT OBJECTIVES

INCIDENT NAME

SALT AND GRIFFIN

DATE PREPARED 8/23/2020 TIME **PREPARED** 1600

OPERATIONAL PERIOD (DATE/TIME)

Day and Night Shifts, August 24, 2020 (0600) - August 25, 2020 (0730)

GENERAL CONTROL OBJECTIVES

Leader's Intent

Commit resources only when there is a reasonable expectation of success in protecting life and critical property and infrastructure. Effectively implement a values-driven strategy utilizing a mix of tactics (direct, indirect, and pointprotection) when and where the probability of success is high, and the risk is commensurate with the identified values. Success is defined as safely achieving objectives with the least firefighter exposure necessary including the spread of COVID-19 while enhancing stakeholder support and adhering to the core values of conservation, interdependence, and service.

Values at Risk

- Incident personnel and the public
- Communities of concern to include Roosevelt, Rock House, Quail Run, Spring Creek Ranch, Wheatfields, Globe, Miami/Claypool, Seven Mile and other communities on the San Carlos Apache Reservation
- Properties and infrastructure to include transmission and utility lines, Chrysolite Mine, Phillips Mine, Regal Mine, Carol Spring Communication Site, ranches and range improvements to include the Griffin Ranch, recreational sites and facilities, ceremonial and historic sites
- Major transportation corridors to include Hwv 188, Hwv 288, U.S. 60/77
- San Carlos Timber resources to include pinelands and commercial harvest areas
- Salt River Canyon Wilderness trails and characteristics
- Archeological and cultural resources and sites
- Sonoran Desert vegetation and ecological communities (minimize the potential spread of noxious weeds)
- Waterways and riparian areas
- Wildlife Resources to include threatened and endangered species habitat to include Mexican spotted owl, narrow headed and northern Mexican garter snakes, and razorback sucker
- Airshed and smoke sensitive areas
- Relationships with cooperators, stakeholders, and the public in impacted areas

Incident Objectives

- Provide for the safety of incident responders and the public through the application and implementation of sound risk management, to include planning and conducting fire operations.
- Values are communicated and protected from adverse fire and incident management actions.
- Foster and strengthen relationships between incident agencies, partners, cooperators, responders, and communities in impacted areas. Minimize impacts to properties and infrastructure.
- Provide timely and accurate information to the public and media on the fire status and incident activities.
- Engage the host agencies and resource advisors to effectively protect and minimize impacts to identified archeological, historic, natural values
- Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.
- Manage timely, safe, and efficient initial attack within the TFR. Coordinate with local agencies and support initial attack outside the TFR.

Incident Requirements

- Resources will maintain a "module of one" separation. Masks will be required when meeting in groups outside of your "module of one" and when interacting in close proximity (< than 6') with individuals outside your "module of one."
- Create and maintain a work environment in which people are treated with respect and dignity.
- Coordinate and document planned actions. Document use and intrusions in the wilderness.
- Notify the public in advance when smoke has the potential for a significant impact to smoke sensitive areas.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Salt and Griffin Fires	OPERATIONAL PERIOD: DAY Operations, 08/24/2020
DATE ISSUED: 08/23/20	TIME ISSUED: 19:00
UNIT: Tonto National Forest – Globe R.D.	SIGNED: FBAN - Dan Pearson 22

INPUTS

WEATHER SUMMARY: T-storm development is likely again today, primarily between 1600-1900.

Temperatures are expected to be a few degrees warmer each day and humidity will be slightly drier, but 20' winds are predicted to be less than the last few days. Impacts from isolated storms will include very gusty outflow winds, possible

lightning, and brief heavy downpours.

EXCESSIVE HEAT WARNING IN EFFECT FROM 1000 MONDAY THROUGH 2000 TUESDAY

Sky Condition: Mostly sunny Temp: 94-102° Humidity (min): 16-20% Chnc of Precip: 20% Haines: 5 Mod. Winds: Southwest winds 5 -7 mph with gusts to 17 in the afternoon LAL: 1 in the am then 2 in pm

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Summary – Moderate overnight humidity recovery and the scattered rainfall will minimize fire activity until late morning (1200). Expect the transition to begin in mid-slope grasses around noon before general fire activity picks up in the afternoon. In the mid to late afternoon, watch for cells building over the Mogollon Rim to the northeast because of **outflow winds** which will drastically and quickly increase fire behavior.

Fuels – Sonoran Desert/Desert Grasslands – Fully cured heavy grass crop, including invasive grasses have resulted in a continuous available fuel bed allowing fire to sustain growth even in the absence of strong winds or steep terrain.

 Upper shrublands - Expect all fuels to be available with live FM in the mid 50-70% range for Oak and Manzanita. Mesquite and juniper clumps often contain continuous grasses and torch easily contributing embers for, generally short-range, spot fires.

General fire characteristics - Conditions represent active fire behavior based on predicted afternoon conditions.

GRASS Head Fire – ROS: 25-50 ch/hr; FL 2-4 ft, Backing/Flanking Fire ROS – 1-3 ch/hr, FL-1-3 ft GRASS-BRUSH Head Fire – ROS: 15-35 ch/hr; FL 5-8 ft, Backing/Flanking Fire ROS – 2-10 ch/hr, FL-2-4 ft BRUSH Head Fire – ROS: 5-20 ch/hr; FL 8-15 ft, Backing/Flanking Fire ROS – 1-3 ch/hr, FL-4-8 ft CHAPARRAL Head Fire – ROS: 20-40 ch/hr; FL 5-15 ft, Backing/Flanking Fire ROS – 5-9 ch/hr, FL-2-10 ft

SPECIFIC:

Griffin Fire – Fire activity is likely to be in two areas today. On the southern portion of the fire, expect continued active fire growth within Brushy Basin moving northeast towards Sycamore Creek as well as continued backing south towards Champion Creek. Fire behavior is likely to be characterized as a steady active flank of fire in the southern portion due to the grass/scattered brush fuel type and relatively gentle topography. On the northern portion, fuels likely need at least another drying day after the precipitation on Saturday to regain momentum through the heavier brushy fuels so primarily smoldering and creeping fire is expected.

Salt Fire – Interior unburned island continuing to burn out primarily on the southeastern and southern perimeters. Watch for outflow winds which will likely shift wind direction from westerly to northerly or easterly and increase the speed significantly.

AIR OPERATIONS:

Hazy conditions in the morning may limit aviation effectiveness, but condition should improve after 1100.

SAFETY - Transitions

Watch for changing conditions – slope reversals, fuel type changes, and shifting/increasing winds. These all indicate a high probability in rapidly changing fire behavior. Observe and plan accordingly before engaging.

Expect storm activity over the Mogollon Rim and the White Mountains to produce gusty outflow winds. If the outflow winds make it to the fire, the best time frame would be between 1500 to 1900. This will also be the best time frame for storms near or over the fire. The strength of the outflow will depend on whether additional storms can form into central Gila County, but brief gusts 30-40 mph are possible. While there's better than a 50% chance of outflow wind shift sweeping across the area, the chance of wetting rains is only in the 20% range. Thunderstorms and outflow chances Monday will likely be similar to that of the past couple days.

Salt Fire

MONDAY...

Sky/weather......Mostly sunny. Slight chance of showers and thunderstorms in the afternoon.

CWR....... 0 percent in the morning becoming 20 percent in the afternoon.

Max temperature....92-99.

Min humidity.....19-26 pct.

Wind (20 ft)......North winds 5 to 8 mph in the morning becoming southwest 5 to 7 mph with gusts to around 17 mph in the afternoon. Gusty and erratic winds expected near thunderstorms in the afternoon with potential for abrupt northeast outflow.

High Level Haines...5 Moderate

Griffin Fire

MONDAY...

Sky/weather......Mostly sunny. Slight chance of showers and thunderstorms in the afternoon.

Max temperature....94-99.

Min humidity......16-21 pct.

Wind (20 ft)......Light east-northeast winds in the morning becoming southwest with gusts to around 15 mph in the afternoon. Gusty and erratic winds expected near thunderstorms in the afternoon

High Level Haines...5 Moderate

7. CONTROL OPERATIONS:

Task:

Monitor and secure fire edge. Monitor fire along Highway 288 and Highway 188 to Division P break. Identify suppression repair

Purpose:

Keep fire within designated containment area. Protect Communities of Roosevelt to the West and Rock House to the North. Protect

Forest resources.

End State:

Community of Wheatfields is protected and fire growth to the East and South to Division P break is halted. Fire is kept East of 288 and

South of Highway 188 and Values are protected. Repair needs are identified and communicated to SITL.

8. SPECIAL INSTRUCTIONS:

- Ensure LCES, Test Communications and utilize human repeaters and Air Attack if needed.
- Contact OPS prior to initiating any firing activity.
- San Carlos Apache Reservation is Tribal Land. The land is significantly special to the Tribe to be treated with respect for all natural resources. All resources such as, antiers, plants and minerals, cannot be removed and must remain on in place on the land.
- Any personnel working on San Carlos Tribal Lands are required to complete a COVID screening. See COVID officer after briefing daily.

SAFETY MESSAGE

We are ALL accountable for SAFE behaviors!

For Day Operations: August 24, 2020

INCIDENT: Salt/Griffin Fires

Date Prepared: August 23, 2020

TIME: 14:00

Major Hazards and Risks:

- > **Driving/Roads**: Use caution on all roads. Watch for muddy conditions and wash outs on secondary roads.
- ➤ **Fire Weather**: Watch for changing conditions associated with high temperatures and strong, shifty winds from thunder storms.
- Covid-19 Avoidance Please continue to wash hands, wear masks, and utilize social distancing.
- Medivac Procedures: Take the time to review the Medical Plan/Medical Incident Report and know exactly how to proceed before an injury occurs.
- ▶ **Helicopter Operations:** Review Aviation Watch-Out Situations in IRPG page 44.

Be alert. Keep calm. Think clearly. Act decisively.

Safety Considerations

- > Are we monitoring current and predicted fire weather conditions? Are we prepared for the predicted fire behavior possibilities?
- > Are we prepared to deal with a medical emergency?
- Have conditions in our work environments changed from those predicted or expected?
- Are we willing to adjust tactics and operations to SAFELY accommodate changing or changed conditions?

- Utilize Social Distancing Standards when outside of your module: 6 feet minimum
- Utilize Face Covering when interacting with people outside your module. This should not interfere with immediate need operations.
- Wash hands for a minimum of 20 seconds and utilize hand sanitizer when hand washing is not available.

NARRATIVE:

Planning using PACE

PACE is an acronym (Primary, Alternate, Contingency and Emergency) used initially for military communication system planning but has benefits relative to fire operational planning. Planning for the worst case scenario allows wildfire operations personnel to be prepared for any eventuality even though things might go exactly as planned.

Defined, PACE is:

- **Primary** the routine and most effective operational approach. (anchor, flank, pinch, secure)
- **Alternate** anther common method of wildfire strategy/tactics with minimal or no additional impact. May used along with the primary under normal circumstances. (Supporting crews and engines with aviation, heavy equipment, etc.)
- **Contingency** This method will normally not be as convenient or efficient as the first two methods, but is capable of achieving objectives when necessary. (Emergency Equipment Rental Agreements, out of GACC resources, etc.)
- **Emergency** This is a method of last resort that probably has significant negative impacts or will create significant delays. (Transitioning to a higher complexity team)

AIR OPERATIONS SUMMARY 220	Prepared By: Brian Drinville	Prepared: 08/23	/2020	Prepared Time: 1700 hrs.		
1. INCIDENT NAME: Salt – Griffin	2. OPERATIONAL PERIOD 08/24/2020	START TIME: 0700	END TIME: 2000	SUNRISE: 0552	SUNSET: 1857	

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.).

Leader's Intent for Aviation

TASK:

PROVIDE AVIATION SUPPORT TO CREWS WITH WATER/RETARDANT DROPS AND RECONNAISSANCE FLIGHTS FOR OPERATIONS PERSONNEL WHILE ENSURING SAFE AVIATION OPERATIONS.

PURPOSE:

KEEP FIRE FROM PROGRESSING TOWARDS IDENTIFIED VALUES (I.E. HOMES, PRIVATE PROPERTY, CULTURAL SITES, POWERLINE ETC.).

END STATE:

PROVIDE A SECURE FIRE PERIMETER TO PROTECT AND MINIMIZE THREATS TO PRIVATE LAND AND COMMUNITIES WHILE MINIMIZING UNNECESSARY EXPOSURE TO FIREFIGHTERS AND THE PUBLIC.

SOUTHWEST INCIDENT MANAGEMENT TEAM 5

MARK BERNAL, INCIDENT COMMANDER

To:

All Incident Personnel for the Salt and Griffin Fires

From:

Mark Bernal, Incident Commander

Subject:

Ethical Behavior and Conduct

Southwest Area Incident Management Team 5 is committed to the highest principles of ethical behavior and conduct. This team fully adheres to the laws and policies regarding discrimination, harassment, hazing, and other inappropriate behavior, including drugs and alcohol use.

I expect all personnel assigned to this incident to carry themselves with the utmost level of honesty, integrity, and professionalism. Fostering and investing in relationships is important; be mindful of your interactions with the public, including posting incident-related information on social media (videos, photos, texts, etc.).

I would like to acknowledge each of you who have answered the call to public service and come to this fire. Your willingness to step away from your families during such complex times and issues to humanity do not go unnoticed. It is difficult not to have a degree of feeling about COVID-19, social distancing, unfair treatment of our fellow citizens, and now fire. I call on each of you to heighten your mindfulness to stress management, mutual respect, and safety-first behavior.

I am committed to the belief that everyone is entitled to a safe and harassment-free work environment throughout the entire duration of the assignment. Equally, our behaviors must reflect a safety-first attitude.

Your actions reflect upon all of us.

Sincerely,

Mark Bernal

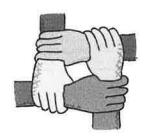

Incident Commander

Mark Bornal

Southwest Interagency Management Team 5

HUMAN RESOURCES MESSAGE

Goose Fact

Goose Lesson

Geese honk from behind to encourage those up front to keep up the speed.

When a goose is incapacitated and falls out of formation, two geese fall out with it to help and protect it. They stay together until the goose can fly again, launching out on their own to catch up with their

Encouragement from the ranks leads to greater efficiencies in leadership.

People with goose sense stand by each other in times of adversity and challenge, recognizing the point is to achieve the goal safely and understanding they are a part of a larger effort.

If the team wins, we all had a good year. If we don't win, it doesn't matter who had a good year.

-Paul O'Neill

David Legrand, HRSP 505.218.1189 HR located in ICP

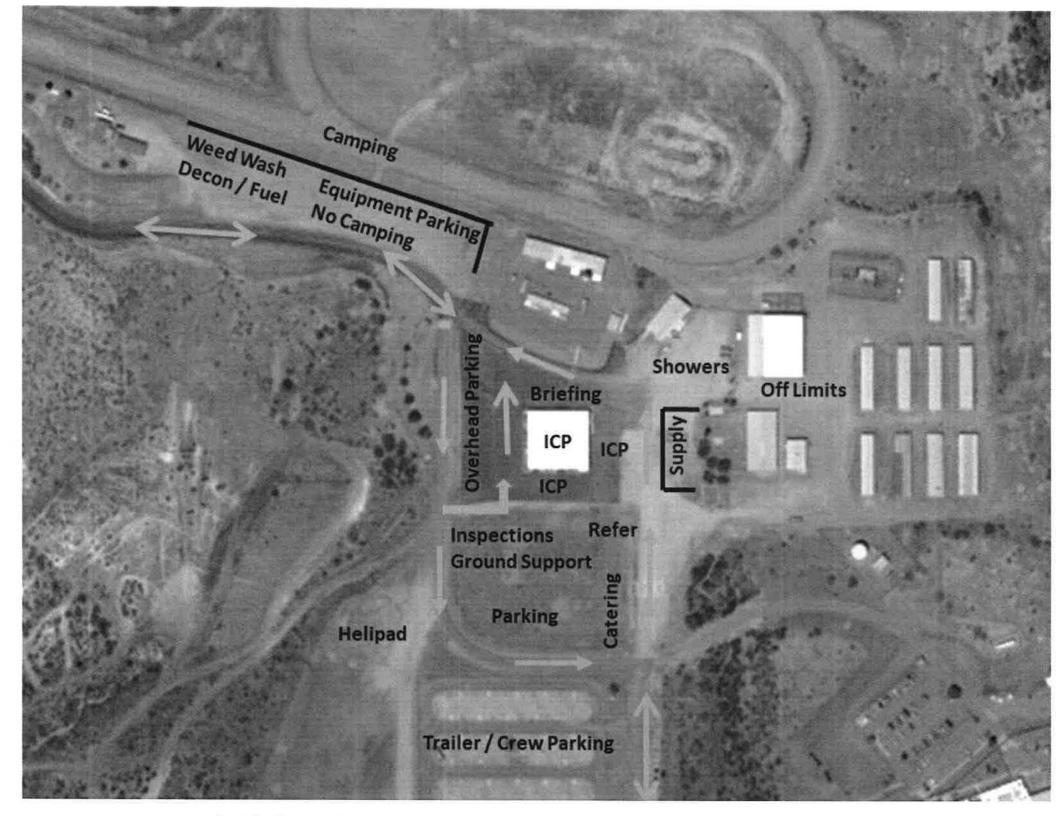

HR QUIZ

How is this true?

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Usethefollowing items to communicate situation to communications/dispatch.

 CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Standby for Emergency Traffic," INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree, Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones, EMT Smith is providing medical care." 										
	riority	y / Transport ☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° − 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° − 3° burns not more than 1-3 palm sizes.								
	□ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.									
Nature of I	njury or Illness									
Mechan	& ism of Injury					Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)				
Transpo	Transport Request Air Ambulance / Short Haul/Hoist Ground Ambulance / Other									
Patien	t Location					Descriptive Location & Lat. / Long. (WGS84)				
Incident Name Geographic Name + "M (Ex: Trout Meadow Me										
On-Scene Inc	ident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)							
Patie	ent Care					Name of Care Provider (Ex: EMT Smith)				
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)										
S. HITTIAL FATELT ACCESSIBLITY Complete this section for each patient as approprie folds with the most severe patients										
Patient Assessm	Patient Assessment: See IRPG page 106									
Treatment:										
4. TRANSPORT P	2002.041
