

**Forest Service Manual  
National Headquarters - Washington Office  
Washington, DC**

**Forest Service Manual 1500 – External Relations  
Chapter 1530 - Interdepartmental**

**Amendment:** 1500-2003-1

**Effective date:** October 09, 2003

**Duration:** This amendment is effective until superseded or removed.

**Superseded Directive:**

**Approved by:** Gloria Manning, Associate Deputy Chief for National Forest System

**Date approved:** October 03, 2003

**Responsible Staff:**

**Explanation of changes:** Following is an explanation of the changes throughout the directive by section.

**1537.1:** Adds code and caption for the Federal Energy Regulatory Commission.

**1537.11:** Add the agreement signed May 2002 between the Federal Energy Regulatory Commission, the Department of Agriculture, and other Federal departments and agencies in coordinating and streamlining environmental processes involving interstate natural gas pipelines certified by the Federal Energy Regulatory Commission.

The Department of Transportation

The Department of Energy

The Advisory Council on Historic Preservation

The Federal Energy Regulatory Commission

The Council on Environmental Quality

The Environmental Protection Agency

## **I. PURPOSE**

The purpose of this Agreement is to establish a framework for early cooperation and participation among the signatories to this Agreement (the “Participating Agencies”) that will enhance coordination of the processes through which their environmental and historic preservation review responsibilities under the National Environmental Policy Act of 1969, as amended, (“NEPA”) and other related statutes are met in connection with the authorizations that are required to construct and operate interstate natural gas pipeline projects certificated by the Federal Energy Regulatory Commission (“FERC”).

NEPA requires federal agencies to evaluate the environmental impact of major federal actions significantly affecting the quality of the human environment. The issuance by the FERC of a certificate of public convenience and necessity for a major pipeline construction project using a right-of-way in which there is no existing natural gas pipeline is an action that normally requires the preparation of an environmental impact statement (“EIS”). 18 C.F.R. § 380.6(a)(3). Pipeline projects that do not require an EIS require the preparation of an Environmental Assessment (“EA”). Consistent with NEPA and the Council on Environmental Quality’s (the “CEQ”) regulations, this Agreement encourages early involvement with the public and relevant government agencies in project development activities.

This Agreement emphasizes the importance for the lead agency to receive specific information from the other Participating Agencies at key stages of project development to foster an efficient procedure to develop documentation to meet all agencies’ requirements. Specifically, the intent of this Agreement is to establish a process to facilitate the timely development of needed natural gas pipeline projects, whereby participating agencies will:

- Works together and with applicants and other stakeholders, as appropriate, including before complete applications for the necessary authorizations are filed;
- Identify and resolve issues as quickly as possible;
- Attempt to build a consensus among governmental agencies and their stakeholders;
- Expedite the environmental permitting and review for natural gas pipeline projects.

## **II. BACKGROUND**

Through Executive Order 13212 issued on May 18, 2001, (the “Executive Order”) the President declared that it is the policy of his Administration that executive departments and agencies shall take appropriate actions, to the extent consistent with applicable law, to expedite projects that will increase the production, transmission, or conservation of energy. In the Executive Order, the President directed federal agencies to expedite their reviews of authorizations for energy-related projects and to take other action necessary to accelerate the completion of such projects, while maintaining safety, public health and environmental protections. Consistent with the Executive Order, and in recognition of the fact that the timely authorization of new interstate natural gas pipeline projects is essential to facilitate the nation’s

ability to meet the goal of sufficient availability and use of natural gas, the Participating Agencies enter into this Agreement.

The FERC is responsible for authorizing the construction and operation of interstate natural gas pipelines. It issues certificates of public convenience and necessity for such pipelines under section 7 of the Natural Gas Act of 1938, as amended (the “NGA”), and authorizes the construction and siting of facilities for the import or export of natural gas under section 3 of the NGA. It also authorizes the construction and operation of natural gas pipelines pursuant to the Natural Gas Policy Act.

The Bureau of Land Management (“BLM”), within the Department of the Interior, is responsible for the management of public lands. The BLM is principally responsible for issuing right-of-way permits authorizing natural gas pipelines to cross federal lands. Section 28 of the Mineral Leasing Act of 1920, as amended, gives BLM the authority to issue right-of-way permits for natural gas pipelines through lands held by the United States, except lands in the National Park System, lands held in trust for an Indian or Indian tribe, and lands on the Outer Continental Shelf.

The National Park Service (“NPS”), within the Department of the Interior, may issue right-of-way permits only for those uses or activities specifically authorized by Congress and only if there is no practicable alternative to such use of NPS lands. There are no general authorities for issuance of right-of-way permits for gas or other petroleum product pipelines across units of the National Park System. However, in individual instances, park- specific legislation may provide for such authorizations.

The Minerals Management Service (“MMS”), within the Department of the Interior, is responsible for issuing and enforcing regulations to promote safe operations, environmental protection, and resource conservation on the Outer Continental Shelf (“OCS”). The MMS is responsible for granting rights-of-way through submerged lands of the OCS. In addition, the MMS establishes and enforces pipeline safety requirements for those OCS pipelines within the jurisdiction of Department of the Interior. 30 C.F.R. § 250.1001.

The Bureau of Reclamation (“Reclamation”), within the Department of the Interior, is responsible for managing, developing, and protecting water and related resources in an environmentally and economically sound manner in the interest of the public. Reclamation may grant rights-of-way for natural gas pipelines and other uses where compatible with project purposes as authorized in section 10 of the Act of August 4, 1939, and section 28 of the Mineral Leasing Act of 1920, as amended.

The Bureau of Indian Affairs (“BIA”), within the Department of the Interior, is charged with responsibility to administer federal Indian policy and to discharge the federal trust for American Indian Tribes, Alaska Native villages and tribal organizations. BIA is responsible for, among other things, approving rights-of-way across lands held in trust for an Indian or Indian Tribe. In addition, regarding natural gas and all rights-of- way for energy resource transport,

BIA must consult and coordinate through Government-to-Government relations with any affected Tribe.

The Forest Service (“FS”), within the Department of Agriculture, is responsible for the management of 192 million acres of National Forest System (“NFS”) lands. Many hundreds of miles of natural gas pipelines cross NFS lands. Most of these pipelines are permitted by a BLM-issued right-of-way grant, pursuant to the authority granted to the Secretary of the Interior in section 28 of the Mineral Leasing Act.

The Army Corps of Engineers (“COE”) is responsible for the administration of laws for the protection and preservation of waters of the United States, including wetlands. Pursuant to the requirements of section 10 of the Rivers and Harbors Act of 1899, and section 404 of the Clean Water Act (“CWA”), the COE may issue authorizations for the discharge of dredged or fill material into navigable waters, including wetlands.

The Research and Special Programs Administration (“RSPA”), within the Department of Transportation, is responsible for establishing safety standards for the nation’s pipeline transportation system. RSPA carries out this responsibility through its Office of Pipeline Safety (“OPS”). OPS establishes and enforces minimum safety standards for the design, construction, operation and maintenance of pipeline facilities. 49 U.S.C. § 60101 et seq.

The Environmental Protection Agency (“EPA”) is responsible for administering a wide variety of environmental laws. The responsibilities of EPA relevant to the pipeline permitting process include commenting on Environmental Impact Statements under section 309 of the Clean Air Act (the “CAA”), the authority to participate in the Section 404 permit process and to restrict, in certain circumstances, the use of specific areas as disposal sites for dredged or fill material pursuant to section 404, and the authority to issue permits for pipeline-related activities that involve discharges of pollutants subject to the requirements of the National Pollutant Discharge Elimination System or emissions that may be subject to permitting requirements under the CAA (unless the programs are being administered by a state authorized or approved by EPA).

The Fish and Wildlife Service (“FWS”), within the Department of the Interior, is responsible for the conservation, protection and enhancement of fish, wildlife, plants and their habitats. The FWS has principal trust responsibility to protect and conserve migratory birds, threatened and endangered species, certain marine mammals, and interjurisdictional fish. The FWS manages the National Wildlife Refuge System (“NWRS”). Applicants for pipeline construction projects are required to consult with the FWS on projects potentially affecting any of these resources. The FWS also consults on projects potentially affecting fresh water or marine resources and water quality. In addition, the FWS may authorize use by permit for areas within the NWRS.

The National Oceanic and Atmospheric Administration (“NOAA”), within the Department of Commerce and through offices such as the National Marine Fisheries Service and the National Ocean Service, is responsible for a variety of activities in marine and coastal

ecosystems as mandated by several statutes and authorities. These activities include managing protected species; managing commercial and recreational fisheries; protecting marine and coastal habitats; working with states to develop and implement comprehensive coastal zone management plans; and protecting and managing designated Marine Sanctuaries. Pipeline project construction in coastal and/or ocean areas may overlap with several NOAA responsibilities depending on the location and type of project.

The Advisory Council on Historic Preservation (“ACHP”) reviews and provides comments with regard to actions by federal agencies that may affect properties listed or eligible to be listed on the National Register of Historic Places pursuant to the National Historic Preservation Act.

The Department of Energy (“DOE”) is charged with developing and coordinating national energy policy.

The CEQ was established within the Executive Office of the President in 1969 by NEPA. Its purpose is to formulate and recommend national policies to promote the improvement of the quality of the environment. CEQ has issued regulations applicable to federal agencies implementing NEPA. 40 C.F.R. Parts 1500 through 1508.

### **III. THE PARTICIPATING AGENCIES AGREE TO THE FOLLOWING:**

The Participating Agencies hereby agree to work with each other, and with other entities as appropriate, to ensure that timely decisions are made and that the responsibilities of each agency are met. Specifically, each Participating Agency agrees to:

#### **A. Commit to Early Involvement.**

1. Conduct an Early Initial Review. As soon as practicable when a prospective applicant, or a Participating Agency, makes a request for involvement in connection with a project under development, each Participating Agency will assess its potential role in the review and issuance of approvals for the project. If a Participating Agency determines it has a role, it will:

a. Identify agency contacts for the proposed project. If a prospective applicant or Participating Agency needs assistance in determining regional, local or project specific contacts, then the identified contacts will assist in identifying additional contacts. The initial agency contacts for each Participating Agency for the purposes of this Agreement are identified in Section V below.

b. Meet with prospective applicants and other agencies when requested by the prospective applicant, the lead agency, or at its own initiative, to identify areas of potential concern to other agencies and to assess the need for and availability of agency resources to address issues related to the proposed project.

2. Consult with the Lead Agency In Establishing a Schedule. The lead agency will notify other relevant Participating Agencies as early as possible of upcoming projects for construction

and operation of interstate natural gas pipelines and, in consultation with other involved Participating Agencies, identify those projects that will be subject to this Agreement. The lead agency will then, taking into consideration the relative priorities of other projects subject to this Agreement, establish a commensurate schedule for the project review process, including key times for consultation. Such schedule shall be as expeditious as possible and consistent with the periods for analysis and response that are required by the statutes and regulations applicable to the proposed project. In establishing this schedule, the relevant Participating Agencies will strive to ensure that individual permitting processes and related permit review activities occur on a concurrent, rather than sequential, basis with the objective of avoiding unnecessary delays in the process and the schedule established by the lead agency. If at any point during the consultation process a relevant Participating Agency anticipates an inability to comply with the agreed-upon schedule, it will communicate the reason for this inability as soon as possible to the lead agency. The lead agency will then work with that agency to help avoid the anticipated delay if possible.

- a. In light of its overall responsibility for determining whether projects are consistent with the public convenience and necessity, FERC will be the lead agency for preparation of an EIS or EA on major interstate natural gas pipeline projects, unless, at the request of another Participating Agency (or after FERC's own review), FERC, in consultation with that agency, determines that another agency better meets the CEQ lead agency requirements.
  - b. The lead agency will encourage prospective applicants to establish and maintain an electronic web-based repository in which all filings by the applicants for authorizations, including filings with local, state and federal agencies, are made available to all Participating Agencies involved in their project. The repository should also include orders, requests and other pertinent documents. Such repository will be completely at the expense of the applicant.
  - c. The lead agency will include in any Notice of Intent to Prepare an EIS or EA guidance to the public regarding the process set forth in this Agreement.
3. Consult with FERC on FERC's Pre-Filing Process.
- a. For those projects where a prospective applicant is proposing to use FERC's pre-filing environmental review process, the other Participating Agencies will, as appropriate, indicate their willingness and ability to work in the pre-filing timeframe along with the lead agency and other stakeholders to study the project. FERC's pre-filing process is described in the FERC's website.
  - b. When requested by a prospective applicant, FERC will make a determination as to whether the proposed project would benefit from the opening of a pre-filing docket to undergo a FERC pre-filing environmental review, including NEPA and related environmental statutes. If a pre-filing FERC docket is opened, the other relevant Participating Agencies will participate in the pre-filing review process.

B. Proactive Participation. Each Participating Agency will, as soon as possible after notification by a prospective applicant, an applicant, the lead agency, or otherwise:

1. Identify the applicable statutory, regulatory and policy responsibilities of each agency.
2. Identify the issues and concerns related to the proposed project that needs to be addressed in order for the agency to meet its obligations.
3. Provide to the prospective applicant, an applicant, and/or the lead agency, relevant studies, data (such as maps showing features over which the agency may have jurisdiction), and any other information concerning the status of matters the agency considers relevant (including matters that may be under consideration, such as proposing a species for listing as endangered or threatened, or proposing an area for wilderness status).
4. During the pre-filing stage, identify issues and concerns and attempt to resolve them while the draft documentation is being developed.

C. Sharing of Data. The Participating Agencies will share the information gathered, considered and relied upon by each of them with all other relevant Participating Agencies. Specifically, the Participating Agencies agree to:

1. Cooperate in the preparation of requests for additional studies or data, to avoid duplicative requests and to compile a consistent set of information on which all of the Participating Agencies will rely.
2. Cooperate in identifying and developing the information at the level of detail required to complete environmental and cultural resources project review.
3. Cooperate in developing alternative routes and/or actions.
4. Cooperate in developing mitigation measures.

D. Communicate Informally. The Participating Agencies agree to informally communicate with the lead agency early and throughout the process to ensure that issues are raised as soon as possible and shared among all agencies. The lead agency will coordinate and share information with and among other Participating Agencies.

E. Resolve Disputes. While retaining ultimate responsibility for making determinations and exercising their individual responsibilities in accordance with existing statutory responsibilities, the Participating Agencies will consult with each other to resolve disputes using existing dispute resolution methods and in accordance with existing statutory authorities. With respect to disputes regarding the procedures set forth in this Agreement, the Participating Agencies will consult with the CEQ. If a Participating Agency identifies such a dispute, it shall

notify all other Participating Agencies and attempt to resolve the issue. If the dispute is not resolved within thirty (30) days of the notification of the dispute:

1. Any of the Participating Agencies involved in the dispute may forward the matter to the CEQ.
2. CEQ will make a written recommendation on resolution of the dispute within thirty (30) days of receiving the documentation from Participating Agencies, unless there is an agreement among all relevant Participating Agencies that the period should be extended for a particular reason;
3. Recommendations received from CEQ will be taken into account by the lead agency in consultation with the relevant Participating Agencies, in a manner consistent with applicable law, when determining further actions regarding the subject of the dispute. Any recommendation not accepted by the lead or Participating Agencies will have to be fully explained in writing to the Chairman of the CEQ.
4. This opportunity to consult with the CEQ shall be separate and apart from the opportunity to do so provided for in the CEQ's regulations at 40 C.F.R. Part 1504.

#### **IV. IT IS MUTUALLY AGREED AND UNDERSTOOD THAT:**

- A. Nothing in this Agreement obligates the Participating Agencies to expend appropriations or enter into any contract or other obligation.
- B. This Agreement may be modified or amended upon written request of any party hereto and the subsequent written concurrence of all of the Participating Agencies. Participation in this Agreement may be terminated sixty (60) days after providing written notice of such termination to the other Participating Agencies.
- C. This Agreement is intended only to improve the working relationships of the Participating Agencies in connection with expeditious decisions with regard to interstate natural gas pipeline project authorizations and is not intended to, nor does it create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a any person or party against the United States, its agencies, its officers, or any other person.
- D. This Agreement is to be construed in a manner consistent with all effective existing laws and regulations.
- E. This Agreement neither expands nor is in derogation of those powers and authorities vested in the Participating Agencies by applicable law, statutes or regulations.
- F. The terms of this Agreement are not intended to be enforceable by any party other than the signatories hereto.
- G. The Participating Agencies intend to fully carry out the terms of this Agreement. All

provisions in this Agreement, however, are subject to available resources. In addition, this Agreement does not limit the ability of any of the Participating Agencies to review and respond to final applications.

H. If a prospective applicant, applicant, or other person requests a correction of information disseminated pursuant to this Agreement, as authorized by Section 515 of the Treasury and General Government Appropriations Act for FY 2001 (P.L. 106-554), the process by which such request will be addressed will be that established by the agency that disseminated the information.

## **V. PRINCIPAL CONTACTS**

Each Participating Agency hereby designates at least two contacts as the principal initial contacts for the agency. These contacts may be changed at the Participating Agency's discretion upon notice to the other Participating Agencies. The following are the principal initial contacts for each agency:

### Department of the Army:

Chip Smith  
Assistant for Environment, Tribal and Regulatory Affairs  
Office of the Assistant Secretary of the Army (Civil Works)  
108 Army Pentagon 2E641  
Washington, D.C. 20310-0108  
chip.smith@hqda.army.mil  
703-693-3655 voice  
703-614-3588 fax

Michael D. Smith  
Acting Chief, Regulatory Branch  
Headquarters, U. S. Army Corps of Engineers  
441 G Street, N.W.  
Washington, D.C. 20314  
michael.d.smith@hq02.usace.army.mil  
(202) 761-4598 voice  
(202) 761-5096 fax

### Department of Agriculture:

Tom Thompson  
Deputy Chief, National Forest System  
USDA Forest Service  
14th & Independence SW

P.O. Box 96090  
Washington, D.C. 20090 - 6090  
(202) 205-1523 voice  
(202) 205-1758 fax

Jack Craven  
Director of Lands  
USDA Forest Service  
14th & Independence SW  
P.O. Box 96090  
Washington, D.C. 20090 - 6090  
jcraven@fs.fed.us  
(202) 205-1248 voice  
(202) 205-1604 fax

Department of Commerce:

Sloan Rappoport (for non-project specific issues)  
Senior Policy Advisor  
Office of the Secretary  
U.S. Department of Commerce  
14th and Constitution Ave. NW  
Washington, D.C. 20230  
SRappoport@doc.gov  
(202) 482-1707 voice  
(202) 482-4191 fax

Karen Abrams (for project-specific coordination)  
Marine Resource Habitat Specialist  
Office of Habitat Protection  
National Marine Fisheries Service  
SSMC 3
